

Chapter 35A.92 RCW
FIRE DEPARTMENTS—PERFORMANCE MEASURES

Sections

35A.92.010	Intent.
35A.92.020	Definitions.
35A.92.030	Policy statement—Service delivery objectives.
35A.92.040	Annual evaluations—Annual report.
35A.92.050	Maintenance of response times in newly annexed areas— Firefighter transfers.

RCW 35A.92.010 Intent. The legislature intends for code cities to set standards for addressing the reporting and accountability of substantially career fire departments, and to specify performance measures applicable to response time objectives for certain major services. The legislature acknowledges the efforts of the international city/county management association, the international association of fire chiefs, and the national fire protection association for the organization and deployment of resources for fire departments. The arrival of first responders with automatic external defibrillator capability before the onset of brain death, and the arrival of adequate fire suppression resources before flash-over is a critical event during the mitigation of an emergency, and is in the public's best interest. For these reasons, this chapter contains performance measures, comparable to that research, relating to the organization and deployment of fire suppression operations, emergency medical operations, and special operations by substantially career fire departments. This chapter does not, and is not intended to, in any way modify or limit the authority of code cities to set levels of service. [2005 c 376 § 201.]

RCW 35A.92.020 Definitions. The definitions in this section apply throughout this chapter unless the context clearly requires otherwise.

(1) "Advanced life support" means functional provision of advanced airway management, including intubation, advanced cardiac monitoring, manual defibrillation, establishment and maintenance of intravenous access, and drug therapy.

(2) "Aircraft rescue and firefighting" means the firefighting actions taken to rescue persons and to control or extinguish fire involving or adjacent to aircraft on the ground.

(3) "Brain death" as defined by the American heart association means the irreversible death of brain cells that begins four to six minutes after cardiac arrest.

(4) "Code city" means a code city that provides fire protection services, which may include firefighting actions, emergency medical services, and other special operations, in a specified geographic area.

(5) "Fire department" means a code city fire department responsible for firefighting actions, emergency medical services, and other special operations in a specified geographic area. The department must be a substantially career fire department, and not a substantially volunteer fire department.

(6) "Fire suppression" means the activities involved in controlling and extinguishing fires.

(7) "First responder" means provision of initial assessment and basic first-aid intervention, including cardiac pulmonary resuscitation and automatic external defibrillator capability.

(8) "Flash-over" as defined by national institute of standards and technology means when all combustibles in a room burst into flame and the fire spreads rapidly.

(9) "Marine rescue and firefighting" means the firefighting actions taken to prevent, control, or extinguish fire involved in or adjacent to a marine vessel and the rescue actions for occupants using normal and emergency routes for egress.

(10) "Response time" means the time immediately following the turnout time that begins when units are en route to the emergency incident and ends when units arrive at the scene.

(11) "Special operations" means those emergency incidents to which the fire department responds that require specific and advanced training and specialized tools and equipment.

(12) "Turnout time" means the time beginning when units receive notification of the emergency to the beginning point of response time. [2005 c 376 § 202.]

RCW 35A.92.030 Policy statement—Service delivery objectives.

(1) Every code city shall maintain a written statement or policy that establishes the following:

- (a) The existence of a fire department;
- (b) Services that the fire department is required to provide;
- (c) The basic organizational structure of the fire department;
- (d) The expected number of fire department employees; and
- (e) Functions that fire department employees are expected to perform.

(2) Every code city shall include service delivery objectives in the written statement or policy required under subsection (1) of this section. These objectives shall include specific response time objectives for the following major service components, if appropriate:

- (a) Fire suppression;
- (b) Emergency medical services;
- (c) Special operations;
- (d) Aircraft rescue and firefighting;
- (e) Marine rescue and firefighting; and
- (f) Wildland firefighting.

(3) Every code city, in order to measure the ability to arrive and begin mitigation operations before the critical events of brain death or flash-over, shall establish time objectives for the following measurements:

- (a) Turnout time;
- (b) Response time for the arrival of the first arriving engine company at a fire suppression incident and response time for the deployment of a full first alarm assignment at a fire suppression incident;
- (c) Response time for the arrival of a unit with first responder or higher level capability at an emergency medical incident; and
- (d) Response time for the arrival of an advanced life support unit at an emergency medical incident, where this service is provided by the fire department.

(4) Every code city shall also establish a performance objective of not less than ninety percent for the achievement of each response time objective established under subsection (3) of this section. [2005 c 376 § 203.]

RCW 35A.92.040 Annual evaluations—Annual report. (1) Every code city shall evaluate its level of service and deployment delivery and response time objectives on an annual basis. The evaluations shall be based on data relating to level of service, deployment, and the achievement of each response time objective in each geographic area within the code city's jurisdiction.

(2) Beginning in 2007, every code city shall issue an annual written report which shall be based on the annual evaluations required by subsection (1) of this section.

(a) The annual report shall define the geographic areas and circumstances in which the requirements of this standard are not being met.

(b) The annual report shall explain the predictable consequences of any deficiencies and address the steps that are necessary to achieve compliance. [2005 c 376 § 204.]

RCW 35A.92.050 Maintenance of response times in newly annexed areas—Firefighter transfers. Code cities conducting annexations of all or part of fire protection districts shall, at least through the budget cycle, or the following budget cycle if the annexation occurs in the last half of the current budget cycle, in which the annexation occurs, maintain existing fire protection and emergency services response times in the newly annexed areas consistent with response times recorded prior to the annexation as defined in the previous annual report for the fire protection district and as reported in RCW 52.33.040. If the code city is unable to maintain these service levels in the newly annexed area, the transfer of firefighters from the annexed fire protection district as a direct result of the annexation must occur as outlined in RCW 35A.14.485. [2009 c 60 § 12.]
