

RCW 15.145.005 Finding—Intent. The legislature finds that healthy soil is a cornerstone of a high quality of life on earth and that soil health is integral to supporting agricultural viability, promoting positive environmental outcomes, and ensuring the long-term availability of nutritious food.

It is the intent of the legislature that the mission of the Washington soil health initiative be the promotion of collaborative soil health research, education, demonstration projects, and technical assistance activities designed to identify, promote, and implement soil health stewardship practices that are grounded in sound science and that can be voluntarily and economically implemented by farmers and ranchers across Washington's diverse agricultural communities, climates, and geographies.
