

**RCW 28A.230.070 AIDS education in public schools—Limitations—  
Program adoption—Model curricula—Student's exclusion from  
participation.** (1) The life-threatening dangers of acquired immunodeficiency syndrome (AIDS) and its prevention shall be taught in the public schools of this state. AIDS prevention education shall be limited to the discussion of the life-threatening dangers of the disease, its spread, and prevention. Students shall receive such education at least once each school year beginning no later than the fifth grade.

(2) Each district board of directors shall adopt an AIDS prevention education program which is developed in consultation with teachers, administrators, parents, and other community members including, but not limited to, persons from medical, public health, and mental health organizations and agencies so long as the curricula and materials developed for use in the AIDS education program either (a) are the model curricula and resources under subsection (3) of this section, or (b) are developed by the school district and approved for medical accuracy by the office on AIDS established in \*RCW 70.24.250. If a district elects to use curricula developed by the school district, the district shall submit to the office on AIDS a copy of its curricula and an affidavit of medical accuracy stating that the material in the district-developed curricula has been compared to the model curricula for medical accuracy and that in the opinion of the district the district-developed materials are medically accurate. Upon submission of the affidavit and curricula, the district may use these materials until the approval procedure to be conducted by the office of AIDS has been completed.

(3) Model curricula and other resources available from the superintendent of public instruction may be reviewed by the school district board of directors, in addition to materials designed locally, in developing the district's AIDS education program. The model curricula shall be reviewed for medical accuracy by the office on AIDS established in \*RCW 70.24.250 within the department of social and health services.

(4) Each school district shall, at least one month before teaching AIDS prevention education in any classroom, conduct at least one presentation during weekend and evening hours for the parents and guardians of students concerning the curricula and materials that will be used for such education. The parents and guardians shall be notified by the school district of the presentation and that the curricula and materials are available for inspection. No student may be required to participate in AIDS prevention education if the student's parent or guardian, having attended one of the district presentations, objects in writing to the participation.

(5) The office of the superintendent of public instruction with the assistance of the office on AIDS shall update AIDS education curriculum material as newly discovered medical facts make it necessary.

(6) The curriculum for AIDS prevention education shall be designed to teach students which behaviors place a person dangerously at risk of infection with the human immunodeficiency virus (HIV) and methods to avoid such risk including, at least:

(a) The dangers of drug abuse, especially that involving the use of hypodermic needles; and

(b) The dangers of sexual intercourse, with or without condoms.

(7) The program of AIDS prevention education shall stress the life-threatening dangers of contracting AIDS and shall stress that abstinence from sexual activity is the only certain means for the prevention of the spread or contraction of the AIDS virus through sexual contact. It shall also teach that condoms and other artificial means of birth control are not a certain means of preventing the spread of the AIDS virus and reliance on condoms puts a person at risk for exposure to the disease.
