- WAC 246-272C-0001 Purpose and objectives. (1) Purpose. The purpose of this chapter is to protect public health and safety by assuring proper design and construction of all tanks used in on-site sewage systems. Proper sewage tank design and construction will help prevent:
- (a) Surface or groundwater leaking into tanks and adversely impacting the treatment and dispersal functions of system components; and
- (b) Sewage from tanks leaking into the soil and adversely impacting groundwater or surface water, or causing sewage to surface on the ground.
- (2) **Objectives.** This chapter establishes requirements and provides measures to achieve effective long-term sewage treatment and limit the discharge of contaminants to waters of the state. The objectives include:
 - (a) Establishing design and construction standards;
- (b) Requiring department review and approval of design and construction plans for prefabricated tanks and cast-in-place tanks; and
- (c) Creating a process to register prefabricated tank sizes and models built from approved design and construction plans.
