(2) For purposes of determining the operating permit fee, service connections shall be counted as follows:

(a) For community water systems, the operating permit fee is based on the total number of residential service connections and non-residential service connections.

(b) Nonresidential service connections are counted as one service connection for each property as defined in WAC 246-294-010(11) regardless of how many buildings are on the property.

(3) For NTNC and TNC systems, owners shall pay the fee in Table 2 based on equivalent number of service connections. Population information used in calculating equivalent number of service connections shall come from the WFI. The department shall use the following formulas to determine equivalent number of service connections:

(a) For NTNC populations, divide the average population served each day by two and one-half; and

(b) For TNC populations, which include recreational service connections, divide the average population served each day by twenty-five.
