WAC 296-307-59805 Make sure voluntary use of respirators is safe.

Definition:

Voluntary use is respirator use that is requested by the employee AND permitted by the employer when NO respiratory hazard exists.

IMPORTANT: If you choose to require respirator use, use is NOT voluntary and the required use sections of this part apply.

You must:

- (1) Make sure voluntary respirator use does NOT:
- Interfere with an employee's ability to work safely, such as restricting necessary vision or radio communication

· Create health hazards.

Note:

Examples of health hazards include:

- Skin irritation, dermatitis, or other health effects caused by using a dirty respirator
 Illness created by sharing contaminated respirators
 Health effects caused by use of an unsafe air supply, such as carbon monoxide poisoning.

You must:

(2) Provide all voluntary respirator users with the advisory information in Table 2 at no cost to them.

Note:

If you have provided employees with the advisory information required in the previous section, WAC 296-307-598, you do not need to provide the additional information in Table 2 to those employees.

- (3) Develop and maintain a written program that includes the following:
 - Medical evaluation provisions as specified in WAC 296-307-604.
- · Procedures to properly clean and disinfect respirators, according to WAC 296-307-62015, if they are reused.
- store respirators, properly WAC How to 296-307-61010, so that using them does not create hazards.
- · Procedures to make sure there is a safe air supply, according to WAC 296-307-616, when using air-line respirators and SCBAs.
- Training according to WAC 296-307-608 when necessary to ensure respirator use does NOT create a hazard.

• Pay for medical evaluations, training, travel related costs, and wages. You do NOT need to pay for respirators employees use only voluntarily. • If you have both voluntary and required respirator users, you may choose to treat voluntary users as required users. Doing this exceeds the requirements in this section.

Exemption:

If employees use only filtering-facepiece respirators and do so only voluntarily, you do not need to develop and maintain a written

Use Table 2 to provide information to employees who voluntarily use any type of respirator.

Table 2

Advisory Information for Employees Who Voluntarily Use Respirators

- Respirators protect against airborne hazards when properly selected and used. WISHA recommends voluntary use of respirators when exposure to substances is below WISHA permissible exposure limits (PELs) because respirators can provide you an additional level of comfort and protection.
- If you choose to voluntarily use a respirator (whether it is provided by you or your employer) be aware that respirators can create hazards for you, the user. You can avoid these hazards if you know how to use your respirator properly AND how to keep it clean. Take these steps:
 - Read and follow all instructions provided by the manufacturer about use, maintenance (cleaning and care), and warnings regarding the respirator's limitations.
 - Choose respirators that have been certified for use to protect against the substance of concern. The National Institute for Occupational Safety and Health (NIOSH) certifies respirators. If a respirator is not certified by NIOSH, you have no guarantee that it meets minimum design and performance standards for workplace use.
 - A NIOSH approval label will appear on or in the respirator packaging. It will tell you what protection the respirator provides.

Advisory Information for Employees Who Voluntarily Use Respirators

- Keep track of your respirator so you do not mistakenly use someone else's.
- **DO NOT** wear your respirator into:
 - Atmospheres containing hazards that your respirator is not designed to protect against.

For example, a respirator designed to filter dust particles will not protect you against solvent vapor, smoke or oxygen deficiency.

■ Situations where respirator use is required.
