

WAC 296-307-62615 Use respirators.

You must:

• Require employees to use respiratory protection when respiratory hazards have not been removed using feasible controls. For example, use respirators at any of the following times:

- While controls are being evaluated or put in place
- When the respiratory hazard is not completely removed
- When controls are **not** feasible.

Reference: See WAC 296-307-594, Respirators, for respirator program requirements.
