- WAC 246-291-170 Water quality requirements for groundwater source approval. (1) All water quality samples collected under this section must be:
- (a) Collected without chlorine, ultraviolet light, ozone, or other disinfectant in use to treat the source;
- (b) Collected after the well has been pumped long enough to allow for collection of a representative sample of the aquifer, as described in the *Group B Water System Design Guidelines (2012)*; and
  - (c) Analyzed by a certified lab.
- (2) To meet the requirements for design approval under WAC 246-291-120, a purveyor shall obtain, at a minimum:
- (a) Satisfactory results from two raw source water samples analyzed for coliform bacteria;
- (b) Results from one raw source water sample that has been analyzed for, and does not exceed, any primary MCL in Table 2 of this section; and  $\frac{1}{2}$
- (c) In areas known or suspected to have contaminants of public health concern, one raw source water sample analyzed for the contaminant(s) as directed by the department or health officer.
- (3) When analytical results indicate a presence of coliform bacteria, a purveyor shall do the following:
- (a) Disinfect the source using procedures under WAC 246-291-220; and
- (b) Collect two repeat samples and analyze for coliform bacteria by a certified lab.
- (4) A purveyor shall collect a confirmation raw source water sample and have the sample analyzed for each parameter that exceeded the MCL in the initial sample, if:
- (a) An analysis exceeds a primary MCL in Table 2 of this section; or
- (b) A contaminant of public health concern under subsection (2)(c) of this section exceeds the primary MCL under WAC 246-290-310.
- (5) The department or health officer shall not approve the proposed source if:
- (a) The average concentration from all samples for each substance taken under this section exceeds a primary MCL in Table 2 of this section;
- (b) The repeat sample results collected under subsection (3) of this section indicate a presence of coliform bacteria; or
- (c) A contaminant of public health concern collected under this section exceeds the primary MCL under WAC 246-290-310.
- (6) When an analysis exceeds a secondary MCL in Table 3 or 4 of this section, a purveyor shall include treatment in the Group B system design under WAC 246-291-200 so that drinking water delivered to consumers does not exceed a secondary MCL.

Table 2
Primary Inorganic Chemical Contaminants

Substance	MCLs (mg/L)
Antimony (Sb)	0.006
Arsenic (As)	0.010*
Barium (Ba)	2.0
Beryllium (Be)	0.004
Cadmium (Cd)	0.005
Chromium (Cr)	0.1

Substance	MCLs (mg/L)
Cyanide (HCN)	0.2
Fluoride (F)	4.0
Mercury (Hg)	0.002
Nitrate (as N)	10.0
Nitrite (as N)	1.0
Selenium (Se)	0.05
Thallium (Tl)	0.002

Note:

Table 3
Secondary Inorganic Chemical Contaminants

Substance	MCLs (mg/L)
Chloride (Cl)	250.0
Fluoride (F)	2.0
Iron (Fe)	0.3
Manganese (Mn)	0.05
Silver (Ag)	0.1
Sulfate (SO <sub>4</sub> )	250.0
Zinc (Zn)	5.0

Table 4
Secondary Physical Characteristics

Substance	MCLs
Color	15 color units
Specific conductivity	700 umhos/cm
Total dissolved solids (TDS)	500 mg/L

[Statutory Authority: RCW 43.20.050 and chapter 70.119A RCW. WSR 12-24-070, § 246-291-170, filed 12/4/12, effective 1/1/14.]

<sup>\*</sup>The arsenic MCL in Table 2 applies to new and expanding Group B systems. For Group B systems constructed prior to January 1, 2014, the arsenic MCL is 0.05 mg/L. WAC 246-291-360 (3) and (4) establish public notification requirements for Group B systems constructed prior to January 1, 2014, with an arsenic concentration exceeding 0.010 mg/L.
