- WAC 296-150T-0500 When is an inspection required? (1) Before we issue an insignia, each factory-built temporary worker housing structure must be inspected at the manufacturing location as many times as are required by the temporary worker housing construction standard. (See WAC 296-150T-0600.) Inspections may include:
- (a) A "cover" inspection during construction of the unit before the electrical, plumbing, mechanical, and structural systems are covered;
  - (b) Insulation inspection, if installed;
- (c) A final inspection after the factory-built temporary worker housing structure is complete;

Note: Each factory-built temporary worker housing structure must have a serial number to enable us to track inspections.

- (2) If we discover a violation during inspection, we will issue a notice of noncompliance. You can correct the violation during the inspection. If you cannot correct the violation during inspection, you must leave the item uncovered until we approve your correction.
- (3) After a unit is manufactured but before occupancy, we must inspect a factory-built temporary worker housing structure if it is damaged in transit to the building site or during on-site installation. This is considered a repair inspection. (See WAC 296-150T-0540.)
  - (4) Approved design plans must be available for all inspections.
- (5) Once your unit is inspected and approved we will attach the insignia.

Note: We only inspect factory-built temporary worker housing structures before occupancy. After occupancy, the department of health agency is the inspection agency.
