- WAC 296-307-43003 Storage of containers. (1) Containers in storage must be located to minimize exposure to excessive temperature rise, physical damage, or tampering.
- (2) Containers stored inside must be located away from exits, stairways, or in areas normally used or intended for the safe exit of people.
- (3) Container valves must be protected while in storage as follows:
- (a) By setting into recess of container to prevent the possibility of their being struck if the container is dropped upon a flat surface; or
- (b) By ventilated cap or collar, fastened to container capable of withstanding blow from any direction equivalent to that of a thirty-pound weight dropped four feet. Construction must be such that a blow will not be transmitted to a valve or other connection.
  - (4) The outlet valves of containers in storage must be closed.
- (5) Empty containers that have been in LP-gas service should preferably be stored in the open. When stored inside, they must be considered full containers for the purpose of determining the maximum quantity of LP-gas permitted by this section.
