WAC 296-806-30030 Safeguard shafting.

EXEMPTION:

You do not need to safeguard shafting that is in a room, vault, or similar space that contains only power transmission parts or equipment

1. Is controlled by lock and key or has similarly restricted access that allows only authorized persons to enter.

- 3. Has a dry, level, and firm floor.
 4. Has a well-marked route with a vertical clearance of at least five feet six inches for authorized employees to follow to perform their
- (1) You must enclose shafting that is seven feet or less above the floor or working surface.
 - (2) You must make sure projecting shaft ends either:
- (a) Have a smooth edge, smooth end, and project no more than onehalf the diameter of the shaft; or
 - (b) Are guarded by a nonrotating cap or safety sleeve.
- (3) You must safeguard shafting under a bench or table by enclosing it in a stationary casing or by using a trough with sides that both:
- (a) Cover the shafting to within six inches of the bottom of the table or to within six inches of the floor or working surface, whichever is appropriate; and
 - (b) Extend two inches beyond the end of the shafting.
