

WAC 388-97-3160 Night lights in new construction. The nursing home must install in each resident room a night light that is:

- (1) Flush mounted on the wall;
- (2) Designed to prevent viewing the light source from thirty inches or more above the floor;
- (3) Located to provide safe pathway lighting for the staff and residents; and
- (4) Controlled by a switch at each resident room entrance door or by a master switch.

[Statutory Authority: Chapters 18.51 and 74.42 RCW and 42 C.F.R. 489.52. WSR 08-20-062, § 388-97-3160, filed 9/24/08, effective 11/1/08.]
