(Effective until January 1, 2023)

- WAC 246-101-301 Notifiable conditions and health care facilities. This section describes the conditions that Washington's health care facilities must notify public health authorities of on a statewide basis. The board finds that the conditions in Table HF-1 of this section are notifiable for the prevention and control of communicable and noninfectious diseases and conditions.
- (1) Health care facilities shall notify public health authorities of cases that occur in their facilities of the conditions identified in Table HF-1 of this section following the requirements in WAC 246-101-305, 246-101-310, 246-101-315, and 246-101-320. This is not intended to require health care facilities to confirm the absence of conditions listed in Table HF-1 in facility patients.
- (2) Health care facilities may choose to assume the notification for their health care providers for conditions designated in Table HF-1 of this section.
- (3) Health care facilities may not assume the reporting requirements of laboratories that are components of the health care facility.
- (4) Local health officers may require additional conditions to be notifiable within the local health officer's jurisdiction.

Table HF-1	(Conditions	Notifiable	by	Health	Care	Facilities)	
------------	-------------	------------	----	--------	------	-------------	--

Notifiable Condition	Time Frame for Notification	Notifiable to Local Health Department	Notifiable to State Department of Health
Acquired Immunodeficiency Syndrome (AIDS)	Within 3 business days		V
Animal Bites (when human exposure to rabies is suspected)	Immediately	V	
Anthrax	Immediately	V	
Arboviral Disease (acute disease only including, but not limited to, West Nile virus, eastern and western equine encephalitis, dengue, St. Louis encephalitis, La Crosse encephalitis, Japanese encephalitis, and Powassan)	Within 3 business days	V	
Asthma, occupational	Monthly		V
Birth Defects - Abdominal Wall Defects (inclusive of gastroschisis and omphalocele)	Monthly		V
Birth Defects - Autism Spectrum Disorders	Monthly		V
Birth Defects - Cerebral Palsy	Monthly		V
Birth Defects - Down Syndrome	Monthly		V
Birth Defects - Alcohol Related Birth Defects	Monthly		V
Birth Defects - Hypospadias	Monthly		V
Birth Defects - Limb reductions	Monthly		V
Birth Defects - Neural Tube Defects (inclusive of anencephaly and spina bifida)	Monthly		V
Birth Defects - Oral Clefts (inclusive of cleft lip with/without cleft palate)	Monthly		V
Botulism (foodborne, infant, and wound)	Immediately	V	
Brucellosis (Brucella species)	Within 24 hours		

Notifiable Condition	Time Frame for Notification	Notifiable to Local Health Department	Notifiable to State Department of Health
Burkholderia mallei (Glanders) and pseudomallei (Melioidosis)	Immediately	V	
Cancer (See chapter 246-430 WAC)	Monthly		√
Chancroid	Within 3 business days	V	
Chlamydia trachomatis infection	Within 3 business days	V	
Cholera	Immediately	V	
Cryptosporidiosis	Within 3 business days	V	
Cyclosporiasis	Within 3 business days	V	
Diphtheria	Immediately	V	
Disease of suspected bioterrorism origin	Immediately	V	
Domoic acid poisoning	Immediately	V	
E. coli - Refer to "Shiga toxin-producing E. coli"	Immediately	√	
Emerging condition with outbreak potential	Immediately	√	
Giardiasis	Within 3 business days	V	
Gonorrhea	Within 3 business days	√	
Granuloma inguinale	Within 3 business days	V	
Gunshot wounds (nonfatal)	Monthly		V
Haemophilus influenzae (invasive disease, children under age 5)	Immediately	√	
Hantavirus pulmonary syndrome	Within 24 hours	V	
Hepatitis A (acute infection)	Within 24 hours	V	
Hepatitis B (acute infection)	Within 24 hours	V	
Hepatitis B surface antigen + pregnant women	Within 3 business days	√	
Hepatitis B (chronic infection) - Initial diagnosis, and previously unreported prevalent cases	Monthly	V	
Hepatitis C - Acute infection	Within 3 business days	V	
Hepatitis C - Chronic infection	Monthly	V	
Hepatitis D (acute and chronic infection)	Within 3 business days	V	
Hepatitis E (acute infection)	Within 24 hours	$\sqrt{}$	
Human immunodeficiency virus (HIV) infection	Within 3 business days	√	
Influenza, novel or unsubtypable strain	Immediately	$\sqrt{}$	
Influenza-associated death (laboratory confirmed)	Within 3 business days	V	
Legionellosis	Within 24 hours	V	
Leptospirosis	Within 24 hours	√	
Listeriosis	Within 24 hours	V	
Lyme Disease	Within 3 business days	V	
Lymphogranuloma venereum	Within 3 business days	√	
Malaria	Within 3 business days	V	
Measles (rubeola) - Acute disease only	Immediately	V	
Meningococcal disease (invasive)	Immediately	√	
Monkeypox	Immediately	V	
Mumps (acute disease only)	Within 24 hours	V
