

WAC 110-301-0255 Pest control. (1) A school-age provider must have a pest control policy that emphasizes prevention and natural, nonchemical, low-toxicity methods where pesticides or herbicides are used as a last resort (i.e., integrated pest management). In areas where local pest control policies are already in place, such as a school district, a school-age program may adopt or amend such policies when developing their own policy.

(2) For any school-age program that does not operate on public or private school premises, a provider must take appropriate steps to safely prevent or control pests that pose a risk to the health and safety of adults and children in and around the licensed space. Pest control steps must include:

(a) **Prevention.** A provider must take steps to prevent attracting pests including, but not limited to, identifying and removing food and water sources that attract pests.

(b) **Inspection.** Indoor and outdoor areas in and around the licensed space must be inspected for evidence of pests. A provider must document the date and location if evidence is found.

(c) **Identification.** Pests found in the licensed space must be identified and documented so the pest may be properly removed or exterminated.

(d) **Management.** A provider must document steps taken to remove or exterminate pests found in the licensed space.

(e) **Notification.** If pesticides are used, the school-age provider must notify the parents or guardians of enrolled children what pesticide will be applied and where it will be applied no less than forty-eight hours before application, unless in cases of emergency (such as a wasp nest).

(f) **Application.** Pesticide must be applied to school-age program space when children are not present. When pesticide is applied, the school-age provider must comply with chapter 17.21 RCW.

[Statutory Authority: RCW 43.216.055 and 43.216.065. WSR 21-10-035, § 110-301-0255, filed 4/27/21, effective 6/1/21.]
