

WAC 296-806-42524 Use properly designed covers for screw conveyors (augers).

EXEMPTION: This requirement does not apply to screw conveyors where there are drop or hinged bottom sections that cannot remain airtight.

You must design covers for screw conveyors that are:

- (1) Removable in convenient sections.
- (2) Held in place with stationary clamps. Locate stationary clamps at intervals that will keep all covers dust tight.
