

**WAC 296-806-42568 Follow these requirements for hand-fed moulders.** (1) You must provide hand-fed moulders with **either** of the following, so employee's hands cannot enter the hopper and contact in-running rolls:

(a) A hopper that can be extended high enough to protect the employee. The top edge of the hopper needs to be well rounded to prevent injury when struck or bumped by an employee's hand; or

(b) A belt feed device.

(2) You must provide **each** of these workers with a stopping device that can be easily reached:

(a) The operator feeding the moulder.

(b) The employee taking the dough away from the moulder.
