## WAC 296-848-40005 Exposure control plan.

## IMPORTANT:

Use of employee rotation to control exposures is not advisable since inorganic arsenic is a known carcinogen.

- (1) You must establish and implement a complete written exposure control plan that includes at least the following, for exposure control areas:
- (a) A description of each operation releasing inorganic arsenic, for example:
  - (i) Crew size.
  - (ii) Current exposure controls.
  - (iii) Materials processed.
  - (iv) Machinery used.
  - (v) Operating procedures.
  - (vi) Maintenance practices.
  - (b) Exposure evaluation data.
  - (c) A report of the technology considered for exposure controls.
- (d) Engineering plans and studies used as a basis for selecting exposure controls.
  - (e) A detailed schedule for implementing:
- (i) Feasible exposure controls, if immediate implementation is not possible.
- (ii) Changes to enhance current exposure controls, when necessary.
- (f) An analysis of the effectiveness of the exposure controls considered, when controls will not reduce exposures to or below the permissible exposure limit (PEL).
  - (g) Other relevant information.
- $(\bar{2})\ \mbox{You must review and update your exposure control plan at least every six months to keep it current.$
- (3) You must implement exposure controls on the quickest schedule feasible if controls will not reduce exposure to or below the PEL.
- (4) You must provide a copy of your exposure control plan to affected employees and their designated representatives, when they ask to review or copy it.
