- WAC 296-876-70010 Inspection and repair. (1) You must keep ladders in safe condition.
- (2) You must have employees inspect fixed ladders for visual defects, as follows:
- Competent person, when required by Table 1 (see WAC 296-876-30005), Ladder inspection criteria.
- (b) Trained ladder user, prior to the user's initial use in each shift, and as necessary during the use to identify defects or damage that may occur during a work shift after the initial check. For example, if a ladder tips over, falls off a structure (e.g., roof) or vehicle, is struck by an object (e.g., vehicle or machine), or used in a corrosive environment, evidence of this damage would necessitate the authorized ladder user to initiate a ladder competent person inspection to determine whether the ladder is still safe to use.

EXEMPTION: WAC 296-876-70010 (2)(c) applies to general industry only. See the exemption list in the scope section of this chapter (WAC 296-876-100) for more information.

(3) You must make sure any ladder with structural damage or other hazardous defect is immediately removed from service.

Notes:

- 1. Structural damage includes, but is not limited to, any of the following:
- a. Broken or missing rungs, cleats, or steps. b. Broken or split rails.

- c. Corroded components.d. Bolts and welds missing or not secure.2. A ladder is considered to be removed from service if any of the following are done:
- a. It is marked to identify it as defective.
- b. It is tagged with "do not use" or similar language.
 c. It is blocked so that it cannot be used, for example, by using a plywood attachment that spans several rungs.
- (4) You must make sure repairs restore the ladder to a condition meeting its original design criteria.
- (5) You must ensure wooden fixed ladders are not coated with any material that may obscure structural defects.
- (6) You must maintain fixed ladder parts and surfaces free of splinters, sharp edges, burrs, projections, puncture, and laceration hazards that may be hazardous to persons using the ladder.
- (7) You must ensure fixed ladders are capable of supporting their maximum intended load.
- (8) You must ensure fixed ladder rungs, steps, and cleats are parallel, level, and uniformly spaced.
