- WAC 173-157-130 What must I include in the project operation plan? Your project operation plan should include, at a minimum, the following information:
- (1) The quantity and times of year source water is available for recharge.
 - (2) The proposed rate of injection and withdrawal of water.
 - (3) The length of time the water is proposed to be stored.
- (4) The location, number, and capacity of proposed recharge wells or infiltration basins, and recovery facilities.
- (5) Any variability in quality and reliability of the source water.
- (6) A description of any water treatment method(s) you will use at the time of injection and recovery to ensure compliance with the water quality standards set forth in chapter 173-200 WAC, as well as the department's antidegradation policy.
- (7) Any plans to discharge ASR water to a surface body should include information on the quantity, timing, duration, and water quality parameters such as chlorine, pH and dissolved oxygen of the ASR discharge water.
- (8) Any operation and maintenance plans to discharge groundwater and suspended sediment from the ASR well shall provide information on the quantity, duration, quality, and means of discharge.
- (9) Destination(s) and permitting for water used for operation and maintenance (e.g., flushing water).
