- WAC 296-307-40005 Storage and handling of anhydrous ammonia.
- (1) All employees must use at least gloves and goggles and may supplement with a face shield while working on or with charged anhydrous ammonia equipment.
- (2) The employer must ensure that equipment is inspected before each day's work. Conditions that would contribute to leaks must be corrected.
- (3) Hose end-valves must be closed when not in use to prevent accidental discharge in case the main valve is opened.
- (4) Relief and vapor valves must discharge away from the operator's working position.
