WAC 296-807-12005 Make sure portable circular saws are safe to use. (1) You must use a constant pressure switch to turn on or operate any circular saw using a blade that has a diameter greater than two inches.

(2) You must remove cracked saws and saw blades from service.

(3) You must make sure power driven circular saws that have a blade diameter larger than two inches have guards above and below the base plate (shoe) as listed in Table 2, Portable circular saw guarding requirements.

| Upper Guard  | Lower Guard   |  |  |
|--|---|--|--|
| Covers the blade to the<br>depth of the teeth, except<br>for the minimum arc<br>necessary to allow the<br>base to tilt for bevel cuts. | <ul><li>(1) Covers the blade to the depth of the teeth, except for the minimum arc necessary to allow proper:</li><li>(a) Retraction of the guard;</li><li>(b) Contact with the work.</li></ul> |  |  |
|  | (2) Automatically and<br>instantly returns to the<br>position covering the blade<br>when the saw is withdrawn<br>from contact with the work.  |  |  |
