

WAC 388-97-2480 Resident isolation rooms. If a nursing home provides an isolation room, the nursing home must ensure the room is uncarpeted and contains:

- (1) A handwashing sink with water supplied through a mixing valve;
- (2) Its own adjoining toilet room containing a bathing facility; and
- (3) **In new construction**, the handwashing sink must be located between the entry door and the nearest bed.

[Statutory Authority: Chapters 18.51 and 74.42 RCW and 42 C.F.R. 489.52. WSR 08-20-062, § 388-97-2480, filed 9/24/08, effective 11/1/08.]
