

FINAL BILL REPORT

SHB 2779

C 191 L 08

Synopsis as Enacted

Brief Description: Requiring a specialized forest products permit to sell raw or unprocessed huckleberries.

Sponsors: By House Committee on Agriculture & Natural Resources (originally sponsored by Representatives Orcutt, Blake, Chase, McCoy, Lantz and Skinner).

House Committee on Agriculture & Natural Resources
Senate Committee on Natural Resources, Ocean & Recreation

Background:

Specialized Forest Products.

A specialized forest product (SFP) is, generally, an item found in the forest with a value other than that found with traditional timber. The term SFP is defined to include native shrubs, cedar products, cedar salvage, processed cedar products, speciality wood, edible mushrooms, and certain barks. Many of these terms are further defined to include items such as certain logs or slabs of cedar, spruce, maple, and alder, along with cedar shakes and fence posts.

A SFP permit, or a true copy of the permit, is required in order to possess or transport the following:

- a cedar product or salvage;
- specialty wood;
- more than five Christmas trees or native ornamental trees or shrubs;
- more than five pounds of picked foliage or Cascara bark; and
- more than five gallons of a single mushroom species.

The SFP permit must be obtained prior to harvesting or collecting the products, even from one's own land, and is available only from county sheriffs on forms provided by the Department of Natural Resources (DNR). The permit must be validated by a sheriff.

For cedar and speciality wood, a processor must keep records of the purchase for one year and have a bill of lading available to accompany all cedar or speciality wood products.

Violations of the law on SFPs are punishable as a gross misdemeanor, and a convicted individual may face a fine up to \$1,000 and/or up to one year in a county jail. In addition, a law enforcement officer with probable cause may seize and take possession of any SFPs found and, if the product seized was cedar or specialty wood, may also seize any equipment, vehicles, tools, or paperwork.

Huckleberries.

It is considered a violation of the law on SFPs if a person harvests huckleberries in any amount using a rake, mechanical device, or any other method that can damage the huckleberry bush.

Summary:

Requirements on Huckleberry Sellers.

An SFP permit must be obtained by a person planning to offer raw or unprocessed huckleberries for sale prior to actually selling the huckleberries. The requirement to obtain a permit prior to selling huckleberries applies regardless of whether the huckleberries were obtained from the land of the seller or a consenting landowner. The only exemption to the permit requirement is if the seller of the huckleberries can show that the huckleberries came from land owned by the United States Forest Service and is able to provide documentation that the huckleberries were harvested lawfully.

The SFP permit required to sell huckleberries may be obtained either before or after the huckleberry harvest, and is available directly from the DNR or from any county sheriff's office. The actual permit must contain information as to where the huckleberries were or are planned to be harvested, and the approximate amount of huckleberries offered for sale.

A SFP permit is not required to harvest, possess, or transport huckleberries. However, obtaining an SFP permit does not give the permit holder the authority to harvest huckleberries on land not owned by the permit holder. The permit holder must still seek permission from the landowner to harvest huckleberries and abide by whatever terms are negotiated between the landowner and the permit holder. The actual SFP permit must include a statement informing the holder of the requirement to obtain the landowner's permission prior to harvest.

Requirements on Huckleberry Buyers.

A buyer of raw or unprocessed huckleberries, other than a retail buyer, is required to record the permit number of the seller, the name of the permit holder, the license plate of the seller, and the amount of huckleberries purchased. The buyer must retain the records for one year and, if requested, make the records available to law enforcement or university research.

Huckleberries as an SFP.

The definition of an SFP is not expanded to include huckleberries. However, many of the provisions that apply to SFPs also apply to huckleberries. In addition, translation services and other community outreach efforts that are encouraged for SFP workers are also encouraged for huckleberry harvesters.

Votes on Final Passage:

House	95	0	
Senate	46	1	(Senate amended)
House	93	0	(House concurred)

Effective: June 12, 2008
