

HB 1855 - DIGEST

(SEE ALSO PROPOSED 1ST SUB)

Declares that it is in the public's best interest to ensure that young people are equipped with medically and scientifically accurate, age-appropriate information that will help them avoid unintended pregnancies, remain free of sexually transmitted diseases, and make informed, responsible decisions throughout their lives.

Declares an intent to support and advance the standards established in the January 2005 guidelines for sexual health information and disease prevention developed by the office of the superintendent of public instruction and the department of health. These guidelines are a fundamental tool to help school districts, teachers, guest speakers, health and counseling providers, community groups, parents, and guardians choose, develop, and evaluate sexual health curricula to better meet the health and safety needs of adolescents and young adults in their communities.

Provides that the office of the superintendent of public instruction shall, through its Washington state school health profiles survey or other existing reporting mechanism, ask schools to identify any curricula used to provide sexual health education, and shall report the results of this inquiry to the legislature on an annual basis, beginning with the 2008-09 school year.
