Background:

In 1988 regional AIDS service networks (AIDSNETs) were established to serve as local entities that conduct planning activities for coordinating the availability of community services for individuals who are HIV-positive or have AIDS. The boundaries of the AIDSNETs reflect the Department of Social and Health Services' six-region service system. The most populous county in each region is designated as the lead county to coordinate with the local health departments within the region to develop a regional plan. The regional plans include components related to administration; available services; a service delivery model; and budget, staffing, and caseload projections.

The Department of Health contracts with the AIDSNETs to implement the plans within each region. The plans emphasize contracting with community service providers, such as hospitals, major volunteer organizations, and health care organizations, to implement the plans. The Department of Health provides funding to the community providers through the AIDSNETs to conduct plan-related activities.

Summary of Engrossed Bill:

As of January 1, 2011, regional AIDS service networks (AIDSNETs) are eliminated and the requirement to conduct regional planning for community services for individuals with AIDS is discontinued. The Department of Health (Department), rather than the AIDSNETs, is responsible for distributing grants to support community services for people who are HIV-positive or have AIDS. The Department shall establish criteria for awarding the grants for testing, counseling, education, case management, notification of sexual partners regarding infected individuals, planning, coordination, and intervention strategies for high risk individuals.

Appropriation: None.

Fiscal Note: Requested on April 15, 2009.

Effective Date: The bill takes effect on January 1, 2011.

Staff Summary of Public Testimony:

(In support) This bill is motivated by the intention to restrict cuts to AIDS programs to those cuts that are strictly administrative. There is not much new in service provision that justifies the extent of planning that occurs. As administrative costs have grown, the actual money that goes to programs has been reduced.

(Opposed) None.

Persons Testifying: Representative Darneille, prime sponsor.
