

HB 3080 - DIGEST

Expands the duties of the department of information services and the director of the department with regard to information technology in state government.

Requires the director of each state agency to designate an existing employee to be the agency's information technology resource.

Requires the office of financial management to: (1) In consultation with the director and department of information services, develop a migration strategy to consolidate all operational information technology staff and resources within the department; and

(2) Review information technology functions and services being used in state government.

Authorizes the office of financial management to enter into and consummate certain agreements to contract with one or more authorized preferred providers to provide certain information technology functions and services for state government.

Authorizes the information services board to review certain technology investments in research projects, research initiatives, or instructional programs at institutions of higher education.
