Z-0344.1

HOUSE BILL 1414

State of Washington 63rd Legislature 2013 Regular Session

By Representatives Chandler, Blake, Warnick, Tharinger, Stanford, McCoy, and Ross; by request of Governor Inslee

Read first time 01/25/13. Referred to Committee on Agriculture & Natural Resources.

AN ACT Relating to Yakima river basin water resource management; amending RCW 90.38.005, 90.38.010, 90.38.900, and 90.38.902; reenacting and amending RCW 43.84.092 and 43.84.092; adding new sections to chapter 90.38 RCW; providing a contingent effective date; providing an expiration date; and providing a contingent expiration date.

- 6 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:
- 7 **Sec. 1.** RCW 90.38.005 and 1989 c 429 s 1 are each amended to read 8 as follows:
 - (1) The legislature finds that:

9

- 10 (a) Under present physical conditions in the Yakima river basin
 11 there is an insufficient supply of ground and surface water to satisfy
 12 the present needs of the basin, and that the general health, welfare,
 13 and safety of the people of the Yakima river basin depend upon the
 14 conservation, management, development, and optimum use of all the
 15 basin's water resources;
- (b) ((Pursuant to P.L. 96-162,)) The future competition for water
 among municipal, domestic, industrial, agricultural, and instream water
 interests in the Yakima river basin will be intensified by continued
 population growth, and by changes in climate and precipitation

p. 1 HB 1414

anticipated to reduce the basin's snow pack and thereby reduce the total water supply available to existing water users, instream flows, and carryover storage;

- (c) To address the challenges described in this subsection, congress has enacted several bills to promote Yakima river basin water enhancement, each of which was urged for enactment by this state, the United States ((is now conducting)) has completed a study of ways to provide needed waters through improvements of the federal water project presently existing in the Yakima river basin, and federal, tribal, state, and local cooperators have developed an integrated water resource management plan for improving water supply, habitat, and stream flow conditions in the Yakima river basin;
- (d) As part of the Yakima river basin water enhancement project, the United States department of the interior's bureau of reclamation is now seeking funding to support implementation of the integrated water resource management plan for the Yakima river basin, which was jointly prepared by the Washington state department of ecology and the United States bureau of reclamation and published in a final programmatic environmental impact statement in March 2012;
- $((\frac{c}{c}))$ (e) The interests of the state will be served by developing programs, in cooperation with the United States and the various water users in the basin, that increase the overall ability to manage basin waters in order to better satisfy both present and future needs for water in the Yakima river basin; and
- (f) The interests of the state will also be served through coordination of federal and state policies and procedures in order to develop and implement projects within the framework of the integrated water resource management plan for the Yakima river basin. The pace of integrated plan implementation over the long term depends upon adequate funding and is subject to the availability of amounts appropriated for this purpose.
- (2) It is the purpose of this chapter, consistent with these findings, to:
- (a) Improve the ability of the state to work with the United States and various water users of the Yakima river basin in a program designed to satisfy both existing rights, and other presently unmet as well as future needs of the basin; and

- (b) Establish legislative intent to promote timely and effective implementation of the integrated plan in the Yakima river basin, and to promote the aggressive pursuit of water supply solutions that provide concurrent benefits to both instream and out-of-stream uses in the Yakima river basin as rapidly as possible.
- 6 (3) The provisions of this chapter apply only to waters of the Yakima river basin.
- **Sec. 2.** RCW 90.38.010 and 1989 c 429 s 2 are each amended to read 9 as follows:
- 10 ((Unless the context clearly requires otherwise,)) The definitions
 11 in this section apply throughout this chapter unless the context
 12 clearly requires otherwise.
 - (1) "Department" means the department of ecology.

- (2) "Integrated plan" means the Yakima river basin integrated water resource management plan developed through a consensus-based approach by a diverse work group of representatives of the Yakama Nation, federal, state, county, and city governments, environmental organizations, and irrigation districts and for which the final programmatic environmental impact statement was made available for review through public notice published in the federal register (77 FR 12076 (2012)).
- (3) "Net water savings" means the amount of water that through hydrological analysis is determined to be conserved and usable for other purposes without impairing existing water rights, reducing the ability to deliver water, or reducing the supply of water that otherwise would have been available to other water users.
- $((\frac{3}{2}))$ $\underline{(4)}$ "Trust water right" means that portion of an existing water right, constituting net water savings, that is no longer required to be diverted for beneficial use due to the installation of a water conservation project that improves an existing system. The term "trust water right" also applies to any other water right acquired by the department under this chapter for management in the Yakima river basin trust water rights program.
- $((\frac{4}{}))$ (5) "Water conservation project" means any project funded to further the purposes of this chapter and that achieves physical or operational improvements of efficiency in existing systems for

p. 3 HB 1414

diversion, conveyance, or application of water under existing water rights.

- (6) "Yakima river basin water enhancement project" means a series of congressional enactments, originally initiated by the United States congress in 1979 under P.L. 96-162, with subsequent federal implementing legislation being passed in 1984 under section 109 of P.L. 98-381 to promote fish passage improvements, and in 1994 under P.L. 103-434, as amended by P.L. 105-62 in 1997 and P.L. 106-372 in 2000, to promote water conservation, water supply, habitat, and stream enhancement improvements in the Yakima river basin.
- NEW SECTION. Sec. 3. A new section is added to chapter 90.38 RCW to read as follows:

The department is authorized to implement the integrated water resource management plan in the Yakima river basin, through a coordinated effort of affected federal, state, and local agencies and resources, to develop water supply solutions that provide concurrent benefits to both instream and out-of-stream uses, and to address a variety of water resource and ecosystem problems affecting fish passage, habitat functions, and agricultural, municipal, and domestic water supply in the Yakima river basin, consistent with the integrated plan.

- (1) Authorized department actions include, but are not limited to:
- (a) Accepting funds from any entity, public or private, as necessary to implement the objectives of this chapter;
- (b) Assessing, planning, and developing projects under the Yakima river basin integrated water resource management plan, or for any other action designed to provide access to new water supplies within the Yakima river basin, consistent with the integrated plan and including but not limited to: Enhanced water conservation and efficiency measures, water reallocation markets, in-basin surface and groundwater storage facilities, fish passage at existing in-basin reservoirs, structural and operational modifications to existing facilities, habitat protection and restoration, and general watershed enhancements as necessary to implement the objectives of this chapter and the integrated plan; and
 - (c) Entering into contracts to ensure the effective delivery of

HB 1414 p. 4

water and to provide for the design and construction of facilities necessary to implement the objectives of the integrated plan and this chapter.

- (2) Consistent with the integrated plan, the goals and objectives of department actions authorized under this chapter include, but are not limited to:
- (a) Protection, mitigation, and enhancement of fish and wildlife through improved water management; improved instream flows; improved water quality; protection, creation, and enhancement of wetlands; improved fish passage, and by other appropriate means of habitat improvement, including the protection and enhancement of natural wetlands, floodplains, and groundwater storage systems;
- (b) Improved water availability and reliability, and improved efficiency of water delivery and use, to enhance basin water supplies for agricultural irrigation, municipal, commercial, industrial, domestic, and environmental water uses;
- (c) Establishment of more efficient water markets and more effective operational and structural changes to manage variability of water supplies and to prepare for the uncertainties of climate change, including but not limited to the facilitation of water banking, water right transfers, dry year options, the voluntary sale and lease of land, water, or water rights from any entity or individual willing to limit or forego water use on a temporary or permanent basis, and any other innovative water allocation tools used to maximize the utility of existing Yakima river basin water supplies, as long as the establishment and use of these tools is consistent with the integrated plan.
- (3) Water supplies secured through the development of new storage facilities or expansion of existing storage facilities made possible with funding from the Yakima integrated plan implementation account, the Yakima integrated plan implementation taxable bond account, and the Yakima integrated plan implementation revenue recovery account must be allocated for out-of-stream uses and to augment instream flows consistent with the Yakima river basin integrated water resource management plan. Water to be made available to benefit out-of-stream uses under this subsection, but not yet appropriated, must be temporarily available to augment instream flows to the extent that it

p. 5 HB 1414

- 1 does not impair existing water rights and is consistent with the 2 integrated plan.
- 3 <u>NEW SECTION.</u> **Sec. 4.** A new section is added to chapter 90.38 RCW 4 to read as follows:

- (1) The Yakima integrated plan implementation account is created in the state treasury. All receipts from direct appropriations from the legislature, moneys directed to the account pursuant to this chapter, or moneys directed to the account from any other sources must be deposited in the account. The account is intended to fund projects using tax exempt bonds. Moneys in the account may be spent only after appropriation. Expenditures from the account may be used only as provided in this section. Interest earned by deposits in the account will be retained in the account.
- (2) Expenditures from the account created in this section may be used to assess, plan, and develop projects under the Yakima river basin integrated water resource management plan or for any other actions designed to provide access to new water supplies within the Yakima river basin for both instream and out-of-stream uses, consistent with the integrated plan and the authorities, goals, and objectives set forth in section 3 of this act.
- 21 (3)(a) Funds may not be expended from the account for the 22 construction of a new storage facility until the department evaluates 23 the following:
 - (i) Water uses to be served by the facility;
- 25 (ii) The quantity of water necessary to meet the needs of those 26 uses;
 - (iii) The benefits and costs to the state of serving those uses, including short-term and long-term economic, cultural, and environmental effects; and
 - (iv) Alternative means of supplying water to meet those uses, including the costs of those alternatives and an analysis of the extent to which the long-term water supply needs are able to be met using those alternatives.
- 34 (b) The department may rely on studies and information developed 35 through compliance with other state and federal requirements and other 36 sources. The department shall compile its findings and conclusions and 37 provide a summary of the information it reviewed.

(c) Before finalizing its evaluation under the provisions of this subsection, the department shall make the preliminary evaluation available to the public. Public comment may be made to the department within thirty days of the date the preliminary evaluation is made public.

(4) For water supplies developed under the integrated plan to support future municipal and domestic water needs, the department shall give preference to other entities in managing water service contracts. Where the department determines that the management of such contracts by other entities is not feasible or suitable, the department may enter into water service contracts with applicants receiving water from the program to recover all or a portion of the cost of developing water supplies made possible with funding from the account created in this The department may deny an application if the applicant does not enter into a water service contract. Revenue collected from water service contracts must be deposited into the Yakima integrated plan implementation revenue recovery account created in section 6 of this The department may adopt rules describing the methodology as to how charges will be established and direct costs recovered for water supply developed under the Yakima river basin integrated water resource management plan implementation program.

NEW SECTION. Sec. 5. A new section is added to chapter 90.38 RCW to read as follows:

- (1) The Yakima integrated plan implementation taxable bond account is created in the state treasury. All receipts from direct appropriations from the legislature, moneys directed to the account pursuant to this chapter, or moneys directed to the account from any other sources must be deposited in the account. The account is intended to fund projects using taxable bonds. Moneys in the account may be spent only after appropriation. Expenditures from the account may be used only as provided in this section. Interest earned by deposits in the account will be retained in the account.
- (2) Expenditures from the account created in this section may be used to assess, plan, and develop projects under the Yakima river basin integrated water resource management plan or for any other actions designed to provide access to new water supplies within the Yakima

p. 7 HB 1414

river basin for both instream and out-of-stream uses, consistent with the integrated plan and the authorities, goals, and objectives set forth in section 3 of this act.

- (3)(a) Funds may not be expended from the account for the construction of a new storage facility until the department evaluates the following:
 - (i) Water uses to be served by the facility;

- 8 (ii) The quantity of water necessary to meet the needs of those 9 uses;
 - (iii) The benefits and costs to the state of serving those uses, including short-term and long-term economic, cultural, and environmental effects; and
 - (iv) Alternative means of supplying water to meet those uses, including the costs of those alternatives and an analysis of the extent to which the long-term water supply needs are able to be met using those alternatives.
 - (b) The department may rely on studies and information developed through compliance with other state and federal requirements and other sources. The department shall compile its findings and conclusions and provide a summary of the information it reviewed.
 - (c) Before finalizing its evaluation under the provisions of this subsection, the department shall make the preliminary evaluation available to the public. Public comment may be made to the department within thirty days of the date the preliminary evaluation is made public.
 - (4) For water supplies developed under the integrated plan to support future municipal and domestic water needs, the department shall give preference to other entities in managing water service contracts. Where the department determines that the management of such contracts by other entities is not feasible or suitable, the department may enter into water service contracts with applicants receiving water from the program to recover all or a portion of the cost of developing water supplies made possible with funding from the account created in this section. The department may deny an application if the applicant does not enter into a water service contract. Revenue collected from water service contracts must be deposited into the Yakima integrated plan implementation revenue recovery account created in section 6 of this act. The department may adopt rules describing the methodology as to

- 1 how charges will be established and direct costs recovered for water
- 2 supply developed under the Yakima river basin integrated water resource
- 3 management plan implementation program.

- 4 <u>NEW SECTION.</u> **Sec. 6.** A new section is added to chapter 90.38 RCW to read as follows:
 - (1) The Yakima integrated plan implementation revenue recovery account is created in the state treasury. All receipts from direct appropriations from the legislature, moneys directed to the account pursuant to this chapter, or moneys directed to the account from any other sources must be deposited in the account. The account is intended to fund projects using revenues from water service contracts as authorized in this chapter. Moneys in the account may be spent only after appropriation. Expenditures from the account may be used only as provided in this section. Interest earned by deposits in the account will be retained in the account.
 - (2) Expenditures from the account created in this section may be used to assess, plan, and develop projects under the Yakima river basin integrated water resource management plan or for any other actions designed to provide access to new water supplies within the Yakima river basin for both instream and out-of-stream uses, consistent with the integrated plan and the authorities, goals, and objectives set forth in section 3 of this act.
 - (3)(a) Funds may not be expended from the account for the construction of a new storage facility until the department evaluates the following:
 - (i) Water uses to be served by the facility;
- 27 (ii) The quantity of water necessary to meet the needs of those uses;
- (iii) The benefits and costs to the state of serving those uses, including short-term and long-term economic, cultural, and environmental effects; and
- (iv) Alternative means of supplying water to meet those uses, including the costs of those alternatives and an analysis of the extent to which the long-term water supply needs are able to be met using those alternatives.
- 36 (b) The department may rely on studies and information developed

p. 9 HB 1414

through compliance with other state and federal requirements and other sources. The department shall compile its findings and conclusions and provide a summary of the information it reviewed.

- (c) Before finalizing its evaluation under the provisions of this subsection, the department shall make the preliminary evaluation available to the public. Public comment may be made to the department within thirty days of the date the preliminary evaluation is made public.
- 9 (4) For water supplies developed under the integrated plan to 10 support future municipal and domestic water needs in the Yakima basin, the department shall give preference to other entities in managing 11 12 water service contracts. Where the department determines that the 13 management of such contracts by other entities is not feasible or 14 suitable, the department may enter into water service contracts with applicants receiving water from the program to recover all or a portion 15 of the cost of developing water supplies made possible with funding 16 17 from the account created in this section. The department may deny an 18 application if the applicant does not enter into a water service 19 Revenue collected from water service contracts must be contract. deposited into the Yakima integrated plan implementation revenue 20 21 recovery account created in this section. The department may adopt 22 rules describing the methodology as to how charges will be established 23 and direct costs recovered for water supply developed under the Yakima 24 river basin integrated water resource management plan implementation 25 program.
- 26 **Sec. 7.** RCW 90.38.900 and 1989 c 429 s 7 are each amended to read 27 as follows:

The policies and purposes of this chapter shall not be construed as replacing or amending the policies or the purposes for which funds available under chapter 43.83B ((or)), 43.99E, or 90.90 RCW may be used within or without the Yakima river basin.

- 32 **Sec. 8.** RCW 90.38.902 and 1989 c 429 s 9 are each amended to read 33 as follows:
- 34 <u>(1)</u> Nothing in this chapter shall authorize the impairment <u>of</u>, or operate to impair, any existing water rights.
 - (2) Nothing in this chapter may be construed to alter or diminish:

(a) Any treaty or other federal rights of the Yakama Nation;

1

26

30

31

3233

34

35

36

- 2 (b) Any powers, rights, or authorities conferred upon irrigation
 3 districts under existing law;
- 4 (c) Any rights or jurisdictions of the United States, the state of
 5 Washington, or other person or entity over waters in the Yakima river
 6 basin.
- NEW SECTION. Sec. 9. A new section is added to chapter 90.38 RCW to read as follows:
- 9 (1) By December 1, 2015, and by December 1st of every odd-numbered year thereafter, and in compliance with RCW 43.01.036, the department, 10 11 in consultation with the United States bureau of reclamation, the 12 Yakama Nation, Yakima river basin local governments, and key basin stakeholders, shall provide a Yakima river basin integrated water 13 resource management plan implementation status 14 report legislature and to the governor that includes: A description of 15 measures that have been funded and implemented in the Yakima river 16 17 basin and their effectiveness in meeting the objectives of this act, a project funding list that represents the state's percentage cost share 18 to implement the integrated plan measures for the current biennium and 19 20 cost estimates for subsequent biennia, a description of progress toward 21 concurrent realization of the integrated plan's fish passage, watershed 22 enhancement, and water supply goals, and an annual summary of all 23 associated costs to develop and implement projects within the framework 24 of the integrated water resource management plan for the Yakima river 25 basin.
 - (2) This section expires December 31, 2045.
- 27 **Sec. 10.** RCW 43.84.092 and 2012 c 198 s 2, 2012 c 196 s 7, 2012 c 187 s 14, and 2012 c 83 s 4 are each reenacted and amended to read as follows:
 - (1) All earnings of investments of surplus balances in the state treasury shall be deposited to the treasury income account, which account is hereby established in the state treasury.
 - (2) The treasury income account shall be utilized to pay or receive funds associated with federal programs as required by the federal cash management improvement act of 1990. The treasury income account is subject in all respects to chapter 43.88 RCW, but no appropriation is

p. 11 HB 1414

- required for refunds or allocations of interest earnings required by 1 2 the cash management improvement act. Refunds of interest to the federal treasury required under the cash management improvement act 3 4 fall under RCW 43.88.180 and shall not require appropriation. office of financial management shall determine the amounts due to or 5 6 from the federal government pursuant to the cash management improvement 7 The office of financial management may direct transfers of funds 8 between accounts as deemed necessary to implement the provisions of the 9 cash management improvement act, and this subsection. Refunds or allocations shall occur prior to the distributions of earnings set 10 11 forth in subsection (4) of this section.
 - (3) Except for the provisions of RCW 43.84.160, the treasury income account may be utilized for the payment of purchased banking services on behalf of treasury funds including, but not limited to, depository, safekeeping, and disbursement functions for the state treasury and affected state agencies. The treasury income account is subject in all respects to chapter 43.88 RCW, but no appropriation is required for payments to financial institutions. Payments shall occur prior to distribution of earnings set forth in subsection (4) of this section.
 - (4) Monthly, the state treasurer shall distribute the earnings credited to the treasury income account. The state treasurer shall credit the general fund with all the earnings credited to the treasury income account except:
 - (a) The following accounts and funds shall receive their proportionate share of earnings based upon each account's and fund's average daily balance for the period: The aeronautics account, the aircraft search and rescue account, the Alaskan Way viaduct replacement project account, the budget stabilization account, the capital vessel replacement account, the capitol building construction account, the Cedar River channel construction and operation account, the Central Washington University capital projects account, the charitable, educational, penal and reformatory institutions account, the cleanup settlement account, the Columbia river basin water supply development account, the Columbia river basin taxable bond water supply development account, the Columbia river basin water supply revenue recovery account, the common school construction fund, the county arterial preservation account, the county criminal justice assistance account, deferred compensation administrative account, the deferred
