

SB 6063 - DIGEST

Requires the applicator of crop protection products to provide written notification to an affected school facility forty-eight hours before an aerial application that is conducted within one-quarter mile of the school facility.

Requires a school or a licensed day care center, that receives an aerial application notice, to post notification of the aerial application at least twenty-four hours before the application.

Requires the licensed day care center to keep children inside the center during the intended date and time of the application.
