SB 6495 - DIGEST

Requires the University of Washington medical school extension for community healthcare outcomes program to report the following to the legislative health care and fiscal committees on the program's activities: (1) The number of certain health care professionals who received training and consultation services through the program during the preceding year in mental health care, diabetes treatment, telestroke care, and chronic pain management, including opioid disorder treatment; and

(2) The number of continuing education hours that each profession could potentially accrue if continuing education credits are awarded for participation in the program.

Makes an appropriation from the general fund to the University of Washington to expand the extension for the community healthcare outcomes program.
