**WAC 508-14-025 Authority.** This chapter is promulgated by the department of ecology pursuant to chapters 43.21, 43.21A, 43.27A, 90.03, 90.44, and 90.54 RCW.

[Statutory Authority: RCW 43.21A.060, 86-04-058 (Order DE 86-02), § 508-14-025, filed 2/4/86.]

**WAC 508-14-030 Withdrawal of groundwaters—Permit required—Certain conditions and areas declared appropriate.** (1)(a) All who are acquainted with the state of Washington know of the Grand Coulee Dam and the Columbia Basin project. In 1943, the congress of the United States passed the Columbia Basin Project Act, 57 Stat. 14 (1943), 16 U.S.C. 835 (1958) so that waters made available by the dam for irrigation purposes could be beneficially used. The state's historical position, as set forth in both state legislation and executive statements, has been one of full cooperation with the federal government to insure that the project's purpose of settling and developing the agricultural lands within said project is realized.

(b) Under state law, subject to existing rights, all natural groundwaters of the state and all "artificially stored" groundwaters that have been abandoned or forfeited are public groundwaters available for appropriation as provided for in chapters 90.44 and 90.03 RCW.

(c) Beneath the surface of the lands within and adjoining the Columbia Basin project are large quantities of naturally occurring and artificially stored groundwater, the source,

extent, volume and flow characteristics being generally known, but the depth being largely unknown.

(d) With the development of the Columbia Basin project, by the United States Department of the Interior, Bureau of Reclamation, the groundwater characteristics of the land within the project have, without doubt, undergone change, including a substantial commingling of natural and "artificially stored" groundwaters.

(e) Within the Columbia Basin project, but outside the Quincy groundwater management subarea, established by chapter 173-124 WAC, and the Odessa groundwater management subarea established by chapter 173-128A WAC, certain persons and entities presently claim interests in portions of these commingled waters.

(f) To insure that the public interest is protected as well as the interests of those claiming interests in said groundwaters and that at the same time public waters are, when appropriate, made available for beneficial use, this office, in carrying out its duties and obligations, deems it necessary to set forth certain interim policies which shall guide the department in granting authority to make withdrawal from these commingled waters until groundwater subareas are established under the procedures set forth in RCW 90.44.130.

(2)(a) Applications filed with the department of ecology pursuant to RCW 90.44.060 requesting permission to withdraw public groundwaters within the exterior boundaries of the Columbia Basin project underlying lands within the legal description described in subsection (3) of this rule shall be received, and permits issued if it appears to the department as a tentative conclusion that public groundwaters are available; however, all such permits shall be conditioned that if it is subsequently determined by the department that public waters are not available in the amounts authorized for withdrawal by such permits, the department shall, by order of notification, withdraw or modify the authority granted therein as may be appropriate.

(b) No certificates of water right as provided for in RCW 90.44.080, relating to public groundwaters underlying lands described in the following subsection (3), shall be issued by the department until such time as a more definite determination can be reached as to the availability of public waters.
