STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

Documents are arranged within each issue of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence within an issue's material.

2. PROPOSED, ADOPTED, AND EMERGENCY RULES OF STATE AGENCIES AND INSTITUTIONS OF HIGHER EDUCATION

The three types of rule-making actions taken under the Administrative Procedure Act (chapter 34.05 RCW) may be distinguished by the size and style of type in which they appear.

- (a) **Proposed rules** are those rules pending permanent adoption by an agency and are set forth in eight point type.
- (b) **Adopted rules** have been permanently adopted and are set forth in ten point type.
- (c) **Emergency rules** have been adopted on an emergency basis and are set forth in ten point oblique type.

3. PRINTING STYLE—INDICATION OF NEW OR DELETED MATERIAL

RCW 34.05.395 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined material is new material;
 - (ii) ~~deleted material is ((lined out and bracketed between double parentheses))~~;
- (b) Complete new sections are prefaced by the heading NEW SECTION;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading REPEALER.

4. EXECUTIVE ORDERS, COURT RULES, NOTICES OF PUBLIC MEETINGS

Material contained in the Register other than rule-making actions taken under the APA does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

5. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules normally take effect thirty days after the rules and the agency order adopting them are filed with the code reviser's office. This effective date may be delayed or advanced and such an effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser's office unless a later date is provided by the agency. They remain effective for a maximum of one-hundred-twenty days from the date of filing.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

6. EDITORIAL CORRECTIONS

Material inserted by the code reviser's office for purposes of clarification or correction or to show the source or history of a document is enclosed in [brackets].

7. INDEX AND TABLES

A combined subject matter and agency index and a table of WAC sections affected may be found at the end of each issue.

WAC 260-48-327 DAILY TRIPLE. (1) The Daily Triple parimutuel pool is not a parlay and has no connection with or relation to any other parimutuel pool

conducted by the association, nor to any win, place, and show pool shown on the totalisator board, nor to the rules governing the distribution of such other pools.

(2) A valid Daily Triple ticket shall be evidence of the binding contract between the holder of the ticket and the racing association, and the said ticket shall constitute an acceptance of Daily Triple provisions and rules contained in the rules and regulations of the Washington horse racing commission.

(4) The Daily Triple parimutuel pool consists of amounts contributed for a selection for win only in each of three consecutive races designated by the association with the prior approval of the commission. ~~((12)))~~ (11) In the event a Daily Triple ticket designated a selection in any one or more of the races comprising the Daily Triple and that selection is scratched, excused, or determined by the stewards to be a nonstarter in the race, the actual favorite, as evidenced by the amounts wagered in the win pool at the time of the start of the race, will be substituted for the nonstarting selection for all purposes, including pool calculations and payoffs.

EMERGENCY RULES

DEPARTMENT OF FISHERIES

[Order 90-89—Filed September 7, 1990, 4:22 p.m.]

Date of Adoption: September 7, 1990.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order:
Repealing WAC 220-47-605.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Restrictions in Areas 6, 7 and 7A provide protection for United States and Canadian origin chinook stocks. Openings in Area 7E provide

opportunity to harvest non-Indian allocation of chinook destined for East Sound. Openings in Areas 7B, 10, 11, 12, 12A and 12B provide opportunity to harvest non-Indian allocation of coho destined for Nooksack-Samish, South Sound and Hood Canal regions of origin. In season area and maximum mesh restrictions in Area 7B are necessary to reduce incidental chinook harvest. In season restriction in Area 7E is necessary to protect milling chinook. In season restriction in Area 10 is necessary to provide commercial/recreational gear separation. All other Puget Sound areas are closed to prevent overharvest of local salmon stocks.

Effective Date of Rule: 12:01 a.m., September 9, 1990.

NEW SECTION

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Although harvestable chinook salmon are available in Grays Harbor, the 850 fish remaining on the Chehalis side quota would be exceeded by a 24-hour fishery. Therefore, a 12-hour fishery is being substituted for the original scheduled opening.

Effective Date of Rule: Immediately.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-32-05100A; and amending WAC 220-32-051.

Subsection (4)(d) took out unnecessary wording; WAC 296-46-45001(1), "Dry Type" added for clarity; WAC 296-46-600, last sentence deleted as unnecessary. As all jurisdictions are required to possess the Uniform Building Code, it will replace the NFPA reference.

NEW SECTION

WAC 296-14-410 REDUCTION, SUSPENSION, OR DENIAL OF COMPENSATION AS A RESULT OF NONCOOPERATION. In accordance with RCW 51.32.110, workers claiming benefits under this title are required to attend and cooperate at medical examinations and vocational evaluations requested by the department or self-insurer, to refrain from unsanitary or injurious practices which imperil or retard recovery, and to accept medical and surgical treatment reasonably essential for recovery from the industrial injury or occupational disease.

When a worker obstructs or delays recovery from the industrial injury or occupational disease or fails to attend or cooperate, without good cause, at scheduled examinations or evaluations, or engages in unsanitary or injurious practices, or refuses, without good cause, to undergo proper and necessary treatment, the department, or self-insurer upon approval of the department, may reduce, suspend, or deny benefits to the worker.

Actions of a worker's representative that result in refusal, obstruction, delay, or noncooperation will be imputed to the worker.

The department or self-insurer, upon approval of the department, may reduce, suspend, or deny benefits by any of the following means so long as the refusal, obstruction, delay, or noncooperation continues without good cause: Reduce current or future time-loss compensation by the amount of the charge incurred by the department or self-insurer for any examination, evaluation, or treatment which the worker fails to attend; reduce, suspend, or deny time-loss compensation in whole or in part; or suspend or deny medical benefits.

Unless otherwise agreed to by the worker, the department or self-insurer shall mail written notice of any requested examination directly to the worker and to the worker's representative, if any, at least fourteen calendar days prior to the requested examination but not greater than sixty days. The notice shall state the date, time, and location of the examination.

(3) The worker leaves the examination location later than one hour after the scheduled time of examination and the worker has not yet been called for the examination.

Prior to the issuance of an order reducing, suspending or denying benefits, the department or self-insurer must request, in writing, from the worker or worker's representative the reason for the refusal, obstruction, delay, or noncooperation.

If the department determines no good cause exists, or if the worker fails to respond to the department's request for the reason for the refusal, obstruction, delay or noncooperation, within thirty days after the letter is issued the department will issue an order reducing, suspending, or denying benefits.

NEW SECTION

(2) Pending entry of the order, benefits shall be paid promptly by the entity responsible as if the claim were determined to be a new injury or occupational disease.

EMERGENCY RULES

DEPARTMENT OF FISHERIES

[Order 90-92—Filed September 12, 1990, 3:06 p.m.]

Date of Adoption: September 11, 1990.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order: Amending WAC 220-40-026.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: A harvestable number of chinook and coho salmon are available in Willapa Bay. A public hearing was held but the permanent regulation for this fishery cannot be promulgated in time to put the fishery under the permanent regulation. The emergency regulation also relaxes the mesh size restrictions for the first 48-hours of the fishery.

Effective Date of Rule: Immediately.

EMERGENCY RULES

DEPARTMENT OF FISHERIES

[Order 90-88—Filed September 12, 1990, 3:08 p.m.]

Date of Adoption: September 7, 1990.

Purpose: Commercial fishing rule.

Citation of Existing Rules Affected by this Order:
Amending WAC 220-24-020.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: A harvestable number of fish have been allotted to conduct a limited participation fishery (WAC 220-24-50000A) in order to access the condition of the local stocks. This regulation is consistent with federal regulation.

Effective Date of Rule: Immediately.

EMERGENCY RULES
DEPARTMENT OF PERSONNEL
(Personnel Board)

[Order 360—Filed September 14, 1990, 1:15 p.m.]

Date of Adoption: September 13, 1990.

Purpose: This rule describes how salary changes are determined at time of promotion.

Citation of Existing Rules Affected by this Order: Amending WAC 356-14-140 Salary—Increase on promotion and 356-15-130 Special pay ranges; and new section WAC 356-14-067 Salary—Classes requiring licensure as registered nurse.

Statutory Authority for Adoption: RCW 41.06.040 and 41.06.150.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The State Personnel Board adopted this rule on an emergency basis because the staged implementation of comparable worth, under the present rule, changed the results of promotional advancement for many employees; and the October 1, 1990, implementation date set in SSB 6407, section 708.

Effective Date of Rule: Immediately.

Secretary

AMENDATORY SECTION (Amending Order 281, filed 7/16/87, effective 9/1/87)

WAC 356-14-140 SALARY—INCREASE ON PROMOTION. ~~(((1)) All promotional salary changes shall be determined as if the employee's old and new classes were both paid on the base ranges with the same whole-number designations as the point ranges which may be involved. Thus under the rules which follow in this section, a four-range promotion would be exemplified by movement from base range 30 to base range 34, not from base range 30 to point range 30.4. The following examples are cited to further clarify the intent of this rule:~~

~~(a) A four-range promotion from range 26.4 step i to range 30.2 would be determined as though the move were from range 26 step i to range 30 step e (same dollar amount) plus two increments to step g, then to step g of range 30.2.~~

~~(b) A six-range increase would occur if an employee promoted from range 26.4 to range 32.2, even though the actual dollar amount of the range increase is less than a promotion from range 26 to range 32.~~

(c) A five-range increase would occur if an employee promoted from range 26 to range 31.4 even though the actual dollar amount of the increase appears to be closer to six ranges.

(d) Promotional movement from range 30.1 step d to range 30.3 would be made as though the movement were from range 30 step d to range 30 step f, then to range 30.3 step f.

(2) An employee who is promoted less than six salary ranges shall receive a two-increment salary increase on the date of promotion, or

(a) To the minimum step of the newly assigned range, if the minimum dollar amount is higher, or

(b) To the maximum step of the newly assigned range, if a two-increment increase would have otherwise placed the employee above the maximum step of the range, or

(c) To the next higher salary schedule dollar amount which would represent more than a one-increment increase but [no] [not] more than a two-increment increase, if the employee's basic salary in the former class was Y-rated between two salary schedule steps, and (a) or (b) above do not apply.

(3) An employee who is promoted six or more ranges shall receive a four-increment salary increase on the date of promotion.

(4) An employee who is working in a position that is included in an approved class series study and who accepts a promotion within that agency to a classification impacted by the same study, shall be paid not less than the salary that would have been paid had the employee remained in the former position and benefited from an upward reallocation. In no event, however, shall the employee receive a salary higher than the maximum step of the classification to which promoted. The higher salary shall become effective on the effective date of the class study.

(5) An employee who is promoted in either situation (a) or (b) below, shall receive a four-increment salary increase:

(a) When the employee is promoted over an intervening class in the same class series, or

(b) When the employee is promoted from one class series to a higher class series and over an intervening class in the new series which would have represented a promotion.

(6) An employee whose promotion requires a change of residence to another geographic area to be within a reasonable commuting distance of the new place of work shall receive a four-increment increase on the date of promotion.

(7) An employee will be entitled to only one of the increases of (3), (5) or (6) above within a 12 month period. An employee whose salary would otherwise be increased under (3), (5) or (6) above shall receive a salary increase as provided in (2) above when the promotions occur within 12 months of each other.

(8) When the increase prescribed in (3), (5) and (6) above would result in a salary above the maximum of a range or the increase was from an amount between the steps, then the same limitations prescribed in (2)(a), (b) or (c) will prevail.

(9) Any additional salary ranges that were afforded by a special assignment pay provision shall not be used in the above computations.

(10) The dollar amount increase is stated otherwise in the compensation plan appendix or chapter 15 but will not be used in the above computation.

(11) Increases will not be provided as above when teachers' salaries are prescribed in the teachers and principal salary schedules.) (1) An employee who is promoted to a class whose base range is less than six ranges higher than the base range of the former class will advance to the step of the range for the new class which is nearest to 5% higher than the amount of the pre-promotional step.

(2) An employee who is promoted under any one or more of the following conditions shall advance to the step of the range for the new class which is nearest to 10% higher than the amount of the pre-promotional step.

(a) When the employee is promoted to a class whose base range is six or more ranges higher than the base range of the employee's former class.

(b) When the employee is promoted over an intervening class in the same class series.

(c) When the employee is promoted from one class series to a higher class in a different series and over an intervening class in the new series which would have represented a promotion.

(d) When an employee's promotion requires a change of residence to another geographic area to be within a reasonable commuting distance of the new place of work.

(3) When an employee is promoted from a Y-rate salary, the Y-rate shall first terminate, and the promotional increase shall be calculated from the next-lower step of the range for the class from which promoted. The calculation will then be completed as illustrated in 1 or 2.

(4) Any promotional increase must result in a salary which is not less than the first, and not more than the top, step of the range for the class to which the employee is promoted.

(5) No assignment pay or other special pay provision, except applicable comparable worth ranges, shall be considered in calculating promotional increases.

(6) Promotional increases for T-ranges (teachers and principals) are not calculated in the manner described above.

(7) An employee who is working in a position which is included in an approved class series study, and who accepts a promotion within that agency to a classification impacted by the same study, shall be paid not less than the salary that would have been paid if the employee had remained in the former position and benefited from an upward reallocation. The new higher salary must be within the range for the new class to which the employee is promoted, and shall be effective on the effective date of the class study.

(8) The salary of any employee who, after June 30, 1990, was promoted to a class whose range has a higher top step than that of the former class, and who received

less promotional increase than is provided under subsection 1 or 2 of this section, shall be recalculated. Effective September 16, 1990, such salary shall move to the even step of the range which would result if the promotion had occurred that day.

If such employee has received a periodic increment increase since June 30, 1990, the base salary on September 16, 1990 shall be not less than if the increment date had occurred on September 16, 1990.

(9) Promotional increases for "N" ranges (classes requiring licensure as a registered nurse) are not calculated in the manner described above.

An employee who is promoted into or between classes which have special pay range "N" shall advance to the step in the new range, as shown in the "N" range salary schedule, which represents the greater of (a) or (b) below.

(a) Placement on the step which coincides with the employee's total length of experience as a registered nurse (RN) and/or licensed practical nurse (LPN). Experience shall be credited as follows:

(i) RN experience shall be credited year for year.

(ii) Up to ten years LPN experience shall be credited at the rate of two years LPN experience equals one year of RN experience, for a maximum credit of five years.

OR

(b) Placement on the step of the new range which is nearest to 5% higher than the amount of the pre-promotional step.

AMENDATORY SECTION (Amending Order 355, filed 6/18/90)

WAC 356-15-130 SPECIAL PAY RANGES. These ranges are used to equal or approximate prevailing rate practices found in private industry or other governmental units. An affected class is identified either by a letter designation following the basic salary range number or by a letter designation preceding a number. In the latter case, a special salary schedule will be used for such classes.

(1) "E" RANGE: This range is used for classes having a prevailing pay range which is shorter than Washington's standard ranges. An "E" range is a standard range with the first four steps removed. Thus, the first step of such a range is the same as Step E of the standard range having the same range number. Periodic increases through the steps of this range are made at the same time intervals as through standard ranges, i.e., a two-step increase after six months at Step E and two annually thereafter up to the maximum step of the range.

(2) "L" RANGE: This special range is used only for the class of liquor store clerk (0628). The "L" range was designed to more closely parallel the prevailing pay structure for retail clerks in private industry. Periodic increases through the steps of the "L" range are made at the same time intervals as through a standard range. Normal progression is Steps A, D, G and K, which represents ten percent per periodic increase.

(3) "T" RANGE: Used only for the classes of institution teachers. These ranges are constructed by identifying

Step K of the correspondingly numbered regular state ranges as "Step 10" of the "T" range; the lower nine steps of the "T" range are each two regular-range steps (approximately 5%) apart. Advancement through these ranges is at the rate of one step per year.

(4) "V" RANGE: Used only for the classes of teachers of the deaf or blind and principals, school for the deaf or blind. "V" ranges are the same as the current ranges of Vancouver, Washington School District #37 for certificated employees of similar background and experience. Advancement through the range is at the rate of one step per year.

(5) "I" RANGE: This range is always ten ranges higher than the range approved for lottery district sales representative or lottery telemarketing representative 1 and 2 and it may be applied only to those classifications. Use of this range is limited to sales incentive programs which: (a) May not exceed ten weeks for any program; (b) may not exceed four programs in any consecutive twelve months; (c) require achievement of specific goals which are set for each program by the lottery, such goals to be in excess of normal performance standards for the class.

The lottery is authorized to compensate individual employees on the "I" range for not more than three months as a result of any one sales incentive program, with the number of months stipulated in the incentive program announcement. Within these limits, movement of any employee to and from the "I" range will be at the discretion of the lottery, and shall be from and to the same step, subject to change by the employee's periodic increment date.

(6) "N" RANGE: This range is used for classes requiring licensure as a registered nurse and having a prevailing pay range which is longer than Washington's standard ranges. An "N" range is a standard range, steps A through K, with five added steps, L through P. Periodic increases through step K of these ranges are made at the same intervals as through standard ranges. Thereafter, an employee receives a one-step increase each year up to the maximum step of the range.

~~((6))~~ (7) "J" RANGE: This range consists of the single rate of twenty dollars per hour. Use is limited to lottery employees who volunteer and are selected for lottery drawing duty as one of the following: a) the lottery drawing official (LDO); b) the lottery security official (LSO); or c) the headquarters drawing official (HDO), as described under lottery procedures.

Employees performing these functions during their normal working shift will not be eligible for "J" range compensation. Employees performing these functions outside of their shift will be compensated by the "J" rate on an hourly basis with a two-hour minimum per drawing period.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

NEW SECTION

WAC 356-14-067 SALARY - CLASSES REQUIRING LICENSURE AS REGISTERED NURSE.

 [Filed September 14, 1990, 3:19 p.m.]

Original Notice.

Title of Rule: Hospitals licensed under chapter 70.41 RCW; repealing WAC 248-18-534 Psychiatric nursing unit; new section 248-18-536 Psychiatric unit construction; and amending 248-18-240 Psychiatric units and services.

Statutory Authority for Adoption: RCW 70.41.030.

Statute Being Implemented: Chapter 70.41 RCW.

Summary: Standards of hospitalization are updated to reflect current knowledge and means for treating and caring for patients with psychiatric diagnoses who [are] present at hospitals licensed under chapter 70.41 RCW.

Explanation of Rule, its Purpose, and Anticipated Effects: Licensing standards for patient care and safety under WAC 248-18-240 require amendment to include psychiatric services as well as psychiatric units. Format is revised to active tense for clarity. After revising operational standards, construction rules were reviewed and revised, consistent with operation. No small business economic impact statement is required for this proposal by chapter 19.85 RCW.

No hospital licensed under chapter 70.41 RCW currently meets all three criteria in the definition of "small business" under RCW 43.31.025, as required under chapter 19.85 RCW.

NEW SECTION

WAC 458-20-22802 ELECTRONIC FUNDS TRANSFER (1) INTRODUCTION. Chapter 69, Laws of 1990, requires certain taxpayers to pay the taxes reported on the combined excise tax return with an electronic funds transfer (EFT). This EFT requirement for taxpayers with large monthly payments begins with the monthly tax return due January 25, 1991. EFT merely changes the method of payment and no other tax return procedures or requirements are changed.

(2) DEFINITIONS. For the purposes of this section, the following terms will apply:

(a) "Electric funds transfer" or "EFT" means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit an account.

(b) "ACH" or "Automated Clearing House" means a central distribution and settlement system for the electronic clearing of debits and credits between financial institutions.

(c) "ACH Debit" means the electronic transfer of funds cleared through the ACH system that is generated by the taxpayer instructing the department's bank to charge the taxpayer's account and deposit the funds to the department's account.

(d) "ACH Credit" means the electronic transfer of funds cleared through the ACH system that is generated by the taxpayer instructing the taxpayer's bank to charge the taxpayer's account and deposit the funds to the department's account.

(e) "Department's bank" means the bank with which the department of revenue has a contract to assist in the receipt of taxes and includes any agents of the bank.

(f) "Collectible funds" actually means collected funds that have completed the electronic funds transfer process and are available for immediate use by the state.

(g) "ACH CCD + addenda" and "ACH CCD + record" mean the information in a required ACH format that needs to be transmitted to properly identify the payment.

(3) TAXPAYERS REQUIRED TO PAY BY EFT.

(a) For the calendar year 1991, taxpayers who have taxes due of \$1,800,000 or more are required to pay by EFT.

(b) For the calendar years after 1991, the department shall by Washington Administrative Code (WAC) rule, establish the EFT threshold at \$240,000 or between \$240,000 and \$1,800,000 before the notification date provided in this section.

(c) In the interest of efficient tax administration, the department will notify those taxpayers required to pay by EFT at least three months prior to the start of their EFT payment requirement.

(d) The process of identifying taxpayers meeting the EFT threshold shall be based upon the taxes that were due in the last complete calendar year before the three month notification date. For example, taxpayers who will start paying by EFT in January, 1992 will be notified by the department by September 30, 1991. The base year for those taxpayers will be the calendar year 1990.

(e) Upon a showing by the taxpayer to the satisfaction of the department that it will not have taxes due in the payment year of more than the threshold amount, the department shall waive the requirement to pay by EFT.

(4) TAXES COVERED. The taxes covered by the EFT payment are taxes reported on the combined excise tax return. The included taxes are those administered by the department under Chapter 82.32 RCW except city and town taxes on financial institutions (Chapter 82.14A RCW), county tax on telephone access lines (Chapter 82.14B RCW), cigarette tax (Chapter 82.24 RCW), enhanced food fish tax (Chapter 82.27 RCW), leasehold excise tax (Chapter 82.29A), and forest tax (Chapter 84.33 RCW).

(5) REFUNDS BY EFT. Overpayments of tax will be either credited to future tax liabilities or, at the taxpayer's request, will be refunded. If the taxpayer is required to pay the taxes on the combined excise tax return by EFT, the taxpayer is entitled to a refund of those taxes by EFT. However, the taxpayer may agree in writing to waive this requirement. If the taxpayer wishes to have the refund made by EFT, the taxpayer shall provide the department with the information necessary to make an appropriate EFT.

(6) EFT METHODS. EFT shall be accomplished through the use of ACH Debit or ACH Credit. In an emergency, taxpayer shall contact the department for alternative methods of payment. The appropriate person to contact in the department will be included in the notification materials sent to all EFT remitters.

(7) DUE DATE OF EFT PAYMENT.

(a) The EFT payment is due on or before the banking day following the tax return due date. An EFT is timely when the state receives collectable U.S. funds on or before the EFT payment due date. The ACH system, either ACH Debit or ACH Credit, requires that the necessary information be in the originating bank's possession on the banking day preceding the date for completion. Each bank generally has its own transaction deadlines

and it is the responsibility of the taxpayer to insure timely payment.

(b) The tax return due date shall be the next business day after the original due date if the original due date falls on a Saturday, Sunday or legal holiday. Legal holidays are determined under state of Washington law and banking holidays are those recognized by the Federal Reserve System in the state of Washington.

(i) Example. The tax return due date is December 25th, a legal and banking holiday, which, for the example, falls on a Friday. The next business day would be Monday, December 28th, and this is the new tax return due date. EFT must be completed by Tuesday, December 29th, which is the next banking day after the new due date. For an ACH Debit user, the department's bank must have the appropriate information by 3:00 PM, Pacific time, on Monday, December 28th.

(8) COORDINATING RETURN AND PAYMENT. The filed return and the payment by EFT shall be coordinated by the department. A return shall be considered timely filed only if it is received by the department on or before the due date, or with a postmark on or before the due date. In addition, the payment by EFT must have been completed by the next banking day after the due date. If both events occur, there is timely filing and payment and no penalties apply.

(9) FORM AND CONTENTS OF EFT. The form and content of EFT will be as follows:

(a) If the taxpayer wishes to use the ACH Debit system of EFT, the taxpayer will furnish the department with the the information needed to complete the transaction. The department's bank will provide secrecy codes only to the taxpayer and all transactions must be initiated by the taxpayer.

(b) If the taxpayer wishes to use the ACH Credit system of the EFT, the taxpayer is responsible to see that its bank has the information necessary for timely completion. The taxpayer shall provide the information necessary for its bank to complete the ACH CCD + addenda for transmittal to the department's bank.

(10) VOLUNTARY USE OF EFT. The use of EFT by taxpayers other than those required by statute to use EFT shall be by the written permission of the department.

(11) CREDITING AND PROOF OF PAYMENT. The department will credit the taxpayer with the amount paid as of the date the payment is received by the department's bank. The proof of payment by the taxpayer shall depend on the means of transmission.

(a) An ACH Debit transaction may be proved by use of the verification number received from the department's bank that the transaction was initiated and bank statements or other evidence from the bank that the transaction was settled.

(b) An ACH Credit transaction is initiated by the taxpayer and the taxpayer has responsibility for the transaction. The taxpayer generally will be given a verification number by the taxpayer's bank. This verification number with proof of the ACH CCD + record showing the department's bank and account number, plus proof that the transaction has been settled will constitute proof of payment.

(12) CORRECTING ERRORS. Errors in EFT process will result in either an underpayment or an overpayment of the tax. In either case, the taxpayer needs to contact the department to arrange for appropriate action. Overpayments may be used as a credit or the taxpayer may apply for a refund. The department will expedite a refund where it is caused by an error in transmission. Underpayments should be corrected by the taxpayer immediately to mitigate any penalties.

(13) PENALTIES.

(a) There are no special provisions for penalties when payment is made by EFT. The general provisions for all taxpayers apply. To avoid the imposition of penalties, it is necessary for both the filing of the tax return and the payment to be timely. Penalties may be waived only when the circumstances causing delinquency are beyond the control of the taxpayer. See: WAC 458-20-228.

(b) In an ACH Debit transaction, the department's bank is the originating bank and is responsible for the accuracy of transmission. If the taxpayer has timely initiated the ACH Debit, received a verification number, and shows adequate funds were available in the account, no penalties shall apply with respect to those funds authorized.

(c) In an ACH Credit transaction, the taxpayer's bank is the originating bank and the taxpayer is primarily responsible for its accuracy. The taxpayer must have timely initiated the transaction, provided the correct information for the ACH CCD + record, and shown that there were sufficient funds in the account, in order to prove timely compliance. If the taxpayer can make this showing then no penalties shall apply as to those funds authorized if the transaction is not completed.

DEPARTMENT OF FISHERIES

[Order 90-93—Filed September 14, 1990, 4:30 p.m.]

Date of Adoption: September 14, 1990.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-24-02000X.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The harvestable coho quota will have been met. A harvestable number of fish have been allotted to conduct a limited participation fishery (WAC 220-24-05000A) in order to access the condition of the local stocks. This regulation is consistent with federal regulation.

Effective Date of Rule: Immediately.

WAC 220-24-02000Z LAWFUL ACTS—TROLL FISHERY. Prior to selling, all fish must be sampled by a Washington Department of Fisheries Port sampler in LaPush. All fish must be landed and sold on a Washington State Fish Receiving Ticket by 11:59 PM September 17, 1990, in the ports of Neah Bay, LaPush, or Westport.

(1a) Only those licensed fishers who have been issued a special permit by the Washington Department of Fisheries pursuant to WAC 220-24-50000A, may participate in this limited fishery,

(1b) The above open area will close permanently, when a coho quota of 3000 fish or a chinook guideline of 1000 fish has been caught.

(2) Effective 11:59 PM September 14, 1990, it is unlawful to fish for salmon taken from the above waters which lie south of Leadbetter Point.

(2a) All fish in possession in this area must be landed and sold on a Washington State Department of Fisheries Fish Receiving Ticket prior to 11:59 PM September 15, 1990.

(3) Lawful terminal gear is restricted to single point, single shank barbless hooks.

(5) It is unlawful to fish for or possess salmon taken for commercial purposes with any gear other than troll gear in the open fishery area.

(6) It is unlawful to transport through Coastal Salmon Management and Catch Reporting Areas 1, 2, 3, or 4 or land in the State of Washington any salmon taken for commercial purposes contrary to the provisions of Chapter 220-33 WAC or Chapter 220-47 WAC relative to seasons and species provided for in this section.

[Order 90-94—Filed September 14, 1990, 4:31 p.m.]

Date of Adoption: September 14, 1990.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order:
Repealing WAC 220-52-07100G.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The closure in Area 28D is continued through the end of the 1990 sea cucumber season because state-tribal negotiations, expected to result in filing of permanent shellfish regulations, have been delayed. Harvest opportunity in Areas 23C and 29 on stocks that remain abundant, transfers effort from the southern Puget Sound to the Strait of Juan de Fuca. Since southern Puget Sound will not reopen for three years, no further regulatory action in [Area] 28D is anticipated for nontreaty fishers.

Citation of Existing Rules Affected by this Order:
Repealing WAC 220-47-606.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Restrictions in Area 7A provide protection for United States and Canadian origin chinook stocks. Openings in Area 7E provide opportunity to harvest non-Indian allocation of chinook destined for East Sound. Openings in Areas 7 and 7A provide opportunity to harvest non-Indian allocation of United States and Canadian origin coho, per preseason agreement. Openings in Areas 7B, 8A, 8D, 10, 11, 12, 12A and 12B provide opportunity to harvest non-Indian allocation of coho destined for Nooksack-Samish, Stillaguamish-Snohomish, South Sound and Hood Canal regions of origin. In season area and maximum mesh restrictions in Area 7B are necessary to reduce incidental chinook harvest. In season restriction in Area 7E is necessary to protect milling chinook. In season restriction in Area 10 is necessary to provide commercial/recreational gear separation. All other Puget Sound areas are closed to prevent overharvest of local salmon stocks.

WSR 90-19-059**EMERGENCY RULES****DEPARTMENT OF FISHERIES**

[Order 90-97—Filed September 14, 1990, 4:34 p.m.]

Date of Adoption: September 14, 1990.

Purpose: Commercial and personal use rules.

Citation of Existing Rules Affected by this Order:
Repealing WAC 220-40-02600B.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: A harvestable number of chinook and coho salmon are available in Willapa Bay. Closure of the Tokeland Boat Basin provides protection for net pen rearing returns. A public hearing was held but the permanent regulation for this fishery cannot be promulgated in time to put the fishery under the permanent regulation. This provides sufficient area for the recreational fishery to operate during commercial fishery openings and will promote an orderly fishery.

Effective Date of Rule: Immediately.

NEW SECTION

WAC 296-127-400 APPLICABILITY. WAC 296-127-400 through 296-127-470 are issued pursuant to RCW 39.12.022, authorizing the director of the department of labor and industries, to the extent necessary in order to prevent curtailment of opportunities for employment, to issue special sub-prevailing wage certificates for employment of individuals whose earning capacity is impaired by physical or mental deficiency or injury at wages lower than the prevailing rate applicable under RCW 39.12.020. Sub-prevailing wage certificates shall be subject to the conditions prescribed in these regulations.

NEW SECTION

WAC 296-127-410 DEFINITIONS. For the purposes of WAC 296-127-400 through 296-127-470:

(1) "Developmental disability" means a disability attributable to mental retardation, cerebral palsy, epilepsy, autism, or another neurological or other condition of an individual found by the secretary of social and health services to be closely related to mental retardation or to require treatment similar to that required for individuals with mental retardation, which disability originates before the individual attains age eighteen, which has continued or can be expected to continue indefinitely, and which constitutes a substantial handicap to the individual.

(2) "Handicapped worker" means an individual whose earning capacity for the work to be performed is impaired by physical or mental deficiency or injury.

(3) "Prevailing rate" means the prevailing rate of wage as defined in RCW 39.12.010 and as determined by the industrial statistician.

NEW SECTION

WAC 296-127-420 APPLICATION FOR A SUB-PREVAILING WAGE CERTIFICATE. (1) Nonprofit vocational rehabilitation programs may apply for a sub-prevailing wage certificate authorizing the employment of one or more handicapped workers with a developmental disability at less than the prevailing rate. An application for each worker shall be filed with the office of the industrial statistician not less than annually upon forms approved by the director or an authorized representative of the director.

(2) The application shall be signed jointly by the employer, the handicapped worker for whom such application is being made, and by the parent or guardian of the handicapped worker except as otherwise authorized by

the director or an authorized representative of the director.

NEW SECTION

WAC 296-127-430 CONDITIONS FOR GRANTING A SUB-PREVAILING WAGE CERTIFICATE. (1) A sub-prevailing wage certificate may be issued to a nonprofit vocational rehabilitation program if the application is in proper form and sets forth facts showing:

(a) A wage below prevailing rate is necessary to prevent curtailment of the handicapped worker's opportunities for employment;

(b) The handicap impairs the earning capacity of the worker for the work to be performed;

(c) The percentage of full productivity at which the handicapped worker functions; and

(d) A description of the duties to be performed by each handicapped worker;

(e) The nature of the disability; and

(f) An addendum containing a detailed explanation of the nature of the disability.

(2) The industrial statistician shall not require a nonprofit vocational rehabilitation program to provide the information required in subsection (1)(f) of this section if it provides a notarized copy of a federal certificate granted by the United States department of labor under section 14(c) of the Federal Fair Labor Standards Act and any documentation deemed necessary by the industrial statistician identifying the workers with a developmental disability, a description of the duties to be performed, and the percentage of productivity at which each worker functions.

(3) The director or an authorized representative of the director may require the submission of additional information to that required by subsection (1) or (2) of this section shown on the application and may require the handicapped worker to take a medical examination where it is deemed necessary in order to determine whether or not the issuance of a certificate is justified.

NEW SECTION

WAC 296-127-440 ISSUANCE OF A SUB-PREVAILING WAGE CERTIFICATE. If the application and other available information indicate that the requirements of this regulation are satisfied, the director or an authorized representative of the director may issue a sub-prevailing wage certificate. If issued, copies of the sub-prevailing wage certificate shall be mailed to the employer, the handicapped worker, and to the parent or guardian of the handicapped worker. If denied, the employer, the handicapped worker, and the parent or guardian of the handicapped worker shall be given written notice of the denial.

NEW SECTION

WAC 296-127-450 TERMS OF SUB-PREVAILING WAGE CERTIFICATE. (1) A sub-prevailing wage certificate shall specify, among other things, the names of the handicapped workers, the name of the employer, the duties to be performed by the

handicapped worker, the percentage of the prevailing rate authorized to be paid, and the period of time during which that percentage of the prevailing rate may be paid. A certificate shall also indicate that the percentage of the prevailing rate to be paid a handicapped worker shall change to reflect an increase or decrease in the worker's productivity when the worker's productivity is determined to change.

(2) A sub-prevailing wage certificate shall be effective for a period of one year or less as designated by the director or an authorized representative of the director. A handicapped worker employed under such certificate may be paid at the specified percentage of the prevailing rate only during the effective period of the certificate.

(3) Notwithstanding the requirements of chapter 49.46 RCW and its administrative regulations, the percentage of the prevailing rate authorized to be paid shall be fixed at a figure designed to reflect adequately the percentage of productivity at which the handicapped worker functions.

(4) Any money received by a handicapped worker by reason of any state or federal pension or compensation program for handicapped persons shall not be considered as offsetting any part of the wage or remuneration due the handicapped worker by the employer.

(5) A handicapped worker shall be paid not less than one and one-half times the rate specified in the sub-prevailing wage certificate for hours worked in excess of forty hours per workweek or eight hours per day.

(6) The terms of any sub-prevailing wage certificate, including the percentage of the prevailing rate authorized to be paid, may be amended by the director or an authorized representative of the director upon written notice to the parties concerned, if the facts justify such amendment.

NEW SECTION

WAC 296-127-460 RENEWAL OF SUB-PREVAILING WAGE CERTIFICATE. Application for renewal of any sub-prevailing wage certificate shall be filed in the same manner as an original application. An application for renewal shall include the most recent evaluation conducted within the past year of the productivity level at which the handicapped worker functions. If such application has been filed prior to the expiration date of the certificate, the certificate shall remain in effect until the application for renewal has been granted or denied.

NEW SECTION

WAC 296-127-470 REVIEW. Any person aggrieved by any action of the director or an authorized representative of the director taken pursuant to this regulation may, within fifteen days after notice of such action has been mailed, file with the director a petition for review of the action complained of, setting forth grounds for seeking such review. If reasonable grounds exist, the director or an authorized representative of the director may grant such review and to the extent deemed appropriate afford all interested persons an opportunity to be heard on such review.

(5) "Impaired air quality" means a condition declared by ~~((the department or an air))~~ ecology or an authority whenever:

(a) Meteorological conditions are conducive to an accumulation of air contamination concurrent with:

(i) Total suspended particulate at an ambient level of one hundred twenty-five micrograms per cubic meter measured on a twenty-four-hour average; or

(ii) Particulate that is ten micron and smaller in diameter (PM10) at an ambient level of ninety micrograms per cubic meter measured on a twenty-four-hour average; or

(iii) Carbon monoxide at an ambient level of eight parts of contaminant per million parts of air by volume (ppm) measured on an eight-hour average; or

(b) Air quality reaches other limits established by ~~((the department or an air))~~ ecology or an authority.

(5) "Land clearing" means removing structures, trees, shrubbery, or other natural vegetation from a plot of land.

(6) "No burn area" means an area designated by ~~((the department))~~ ecology as an area exceeding or threatening to exceed a state ambient air quality standard.

(a) Whenever ~~((the department))~~ ecology has declared an air pollution episode for the geographical area pursuant to chapter 173-435 WAC; or

(b) Whenever ~~((the department))~~ ecology or an ~~((air))~~ authority has declared impaired air quality for the geographical area.

(2) A person responsible for an open fire at the time an episode or impaired air quality is declared shall extinguish that fire. Open fires conducted under the auspices of the department of natural resources for the purpose of burning forest slash pursuant to RCW 70.94.660 through 70.94.700 are to be extinguished by withholding new fuel and allowing the fire to burn down.

(3) Smoke visible from a small fire after a time period of three hours has elapsed from the time of declaration of the episode or impaired air quality shall constitute prima facie evidence of unlawful open burning.

(4) Smoke visible from a fire other than a small fire after a time period of ten hours has elapsed from the time of declaration of the episode or impaired air quality shall constitute prima facie evidence of unlawful open burning.

(b) Small fires set for hand-warming purposes.

~~((6) At any solid waste disposal site, compliance with any schedule given in any comprehensive solid waste management plan approved by the department shall be~~

~~considered compliance with this chapter. For any solid waste disposal site not subject to an approved plan, the department may authorize up to six months for a corrective program. If more time is needed, and no comprehensive solid waste management plan has been adopted covering a solid waste disposal site, a compliance schedule for meeting the requirements of this chapter will be adopted by the department for the site.)~~

~~(e) If the fire is larger than a small fire.)~~

The premises of a residence include the real property immediately adjacent to the residence which is owned by the same person who owns the residence, and which is not devoted to agricultural use, other than yard and gardening activities connected with the residence.

(2) Small fires on the premises of a residence may be allowed to dispose of wood, paper, and natural vegetation, if:

~~(a) ((None of the provisions of subsection (1) of this section are violated;))~~ The wood and paper cannot be recycled and no feasible method of disposal is available;

~~(b) The burning will not violate any regulations of a local fire protection agency authorized to issue burning permits, ((to prevent or abate nuisances;)) or any local, county, or city ordinance or resolution ((pertaining to a nuisance)); and~~

~~((d))~~ (c) The burning is necessary to control disease or insect infestation, and other measures are not available; or

~~((e))~~ (d) The burning is necessary to develop physiological conditions conducive to increased crop yield, and other measures are not available.

In making a determination under (c) or (d) ~~((or (e)))~~ of this subsection, ~~((the department))~~ ecology will consult the county extension agent.

~~((3))~~ (2) Agricultural open burning may be conducted without a permit if:

(a) None of subsection (1) of this section would be violated by the burning;

(b) The burning will not violate any regulations of a local fire protection agency authorized to issue burning permits ~~((to prevent or abate nuisances;))~~ or any local, county, or city ordinance or resolution ~~((pertaining to a nuisance))~~; and

AMENDATORY SECTION (Amending Order 88-39, filed 1/3/89)

WAC 173-425-095 NO BURN AREA DESIGNATION. (1) ~~((The department))~~ Ecology shall designate as no burn areas those geographic areas where ambient air quality standards for particulate matter, as set forth in WAC 173-470-100, are being exceeded or are threatened to be exceeded. These designations shall be based on monitoring data gathered ~~((at primary air mass stations))~~ with monitoring equipment meeting EPA siting criteria.

(2) ~~((The department))~~ Ecology shall not designate "no burn" areas within the boundaries of any activated air pollution control authority, unless data exist to support that designation and the authority, after being notified, refuses to make such a designation.

(3) The designation of any area as a "no burn" area by ~~((the department))~~ ecology or an authority shall be made by rule-making procedure and only after public hearing.

(4) Open burning shall not be conducted in any designated "no burn" area.

(5) A list of any "no burn" areas will be kept on file at ecology or the authority that has jurisdiction over the area(s).

AMENDATORY SECTION (Amending Order DE 77-19, filed 10/24/77)

WAC 173-425-100 DELEGATION OF AGRICULTURAL OPEN BURNING PROGRAM. (1) When ~~((the department))~~ ecology finds that any county,

which is outside the jurisdictional boundaries of an activated air pollution control authority, is capable of administering the permit program of WAC 173-425-085 and desires to do so, ~~((the department))~~ ecology may delegate the administration and authority of the program to the county.

(2) This delegation may be withdrawn if ~~((the department))~~ ecology finds that the county is not effectively administering and enforcing the permit program. Before withdrawing delegation, ~~((the department))~~ ecology shall give the county a chance to correct permit program deficiencies.

AMENDATORY SECTION (Amending Order DE 77-19, filed 10/24/77)

WAC 173-425-115 ~~((LIMITED OUTDOOR BURNING))~~ LAND CLEARING PROJECTS. (1) To further the policies of this chapter and policies expressed in RCW 70.94.745, ~~((the department))~~ ecology has determined ~~((;))~~ that alternate technology and methods exist for disposing of wood waste residue resulting from highway right of way land clearing projects or commercial land clearing projects which generate five hundred or more tons of wood waste residue (two thousand or more cubic yards). Further, these methods and technology are considered less harmful to the environment than open burning. These alternates are ~~((also))~~ to be considered reasonably economical when the cost of disposal is nine hundred dollars or less per acre.

(2) These alternate methods and technology are:

(a) Chipping, with chips disposed of commercially or by on-site dispersal, haul to landfill, ~~((burning in an approved way;))~~ or other approved methods ~~((, as may be available)).~~

(b) Hauling for disposal elsewhere, such as landfill, commercial use, or other approved methods ~~((, as may be available)).~~

(c) On-site disposal in landfill.

(d) On or off-site disposal by a waste combustion method capable of complying with the emission standards set forth in WAC 173-425-115(3).

(e) Combustion, using a forced air pit destructor capable of complying with the emission standards set forth in WAC 173-425-115(3).

(3) As a result of the determination made in WAC 173-425-115(1) for disposing of wood waste residue that results from highway right of way land clearing projects which generate five hundred or more tons of wood waste residue (two thousand or more cubic yards) or from commercial land clearing projects which generate five hundred or more tons of wood waste residue (two thousand or more cubic yards):

(a) For on-site disposal no person shall cause or permit the emission, for more than three minutes in any one hour, of an air contaminant from any disposal method covered by WAC 173-425-115 (2)(d) and (e) which, at the emission point or within a reasonable distance from the emission point, exceeds twenty percent opacity, except as follows:

(i) The emission may exceed twenty percent opacity for the first fifteen minutes after a startup, for not more than two startups every twenty-four hours.

(ii) When the person responsible for the source can show that the emission over twenty percent opacity will not exceed fifteen minutes in any eight consecutive hours after startup.

(b) No person shall cause or permit the emission of particulate matter from any source, which then becomes deposited beyond the property directly controlled by the owner or operator of the source in sufficient quantity to interfere unreasonably with using and enjoying the property where the material was deposited. (WAC 173-400-040(2)).

(c) No person shall cause or permit the emission of any air contaminant or water vapor from any source, including any air contaminant whose emission is not otherwise prohibited by this regulation, if the air contaminant or water vapor harms the health, safety, or welfare of any person or damages property or business. (WAC 173-400-040(5)).

(4) ~~((Using))~~ The alternates listed in WAC 173-425-115(2) ((is)) are to be considered reasonably economical for the projects described in WAC 173-425-115(3) when the alternates can be provided without undue delay in the project ((which will create an economic or other hardship, and)) without costing more than nine hundred dollars per acre.

If the requirement to use an alternate will cause a delay of sixty days or more in completing a project, then the alternate will not be required. Any delay shorter than sixty days will be evaluated on a case-by-case basis.

If the cost of disposing of the wood waste residue is greater than nine hundred dollars per acre, then the alternate will not be required. The cost of clearing and grubbing will not be considered as part of the cost of disposal, unless certain additional costs are required to use the alternate, such as the cost of building a road which would not otherwise be required.

(5) ~~((Using))~~ Use of an alternate must comply with all other applicable statutes, regulations, ordinances, and/or resolutions of state or local government ((entities. These include noise regulations, solid waste regulations, and those requirements of local air pollution control authorities which are more stringent than those of the department)).

(6) The requirements for owner(s) or operator(s) of the source to comply with opacity standards per WAC 173-425-115 (3)(a) may be waived. Open burning may then be authorized by ~~((the department or air pollution control))~~ ecology or the authority, as appropriate, if the owner or operator of the source shows((, to the department or air pollution control authority;)) that:

(a) A delay will result from using the alternates, causing an economic or other hardship;

(b) Other legal requirements may be violated;

(c) A bid cannot be obtained for disposal using an alternate described in WAC 173-425-115, at a cost of nine hundred dollars per acre or less; or

(d) The wood waste residue to be disposed of from the land clearing project is less than five hundred tons (two thousand cubic yards).

(7) ~~((The department or air pollution control))~~ Ecology or the authority may charge a fee to cover administrative costs of processing the waiver request.

(8) When an alternate is to be used at any site for six or more months, the requirements of WAC 173-400-110 (notice of construction) shall be met.

(9) In this chapter, land clearing projects located close to one another and burned near the same time, which appear to be a single project, shall be presumed to be one project.

(10) In this chapter, normal clearing and grubbing do not include any activity or action related to using alternate methods and technology listed in WAC 173-425-115(2).

(11) In this chapter, one cubic yard of wood waste residue equals five hundred pounds.

AMENDATORY SECTION (Amending Order DE 77-19, filed 10/24/77)

WAC 173-425-120 DEPARTMENT OF NATURAL RESOURCES—SMOKE MANAGEMENT PLAN. The department of natural resources has the responsibility for issuing and regulating burning permits for open fire in areas protected by the department of natural resources, when such fires are for:

(1) Abating a forest fire hazard;

(2) Preventing a fire hazard in a forested area;

(3) Instructing public officials in methods of forest fire fighting;

(2) Authority to enforce all provisions of this regulation, including establishing permit conditions and issuing permits, is delegated to and shall be carried out by all activated air pollution control authorities ~~((in))~~ or ecology for those areas not under the jurisdiction of ((any activated air pollution control)) an authority ~~((, the department of ecology shall enforce these regulations, including establishing permit conditions and issuing permits)).~~

(3) The purpose of this chapter is to:

(a) Minimize adverse effects on air quality from the open burning of field and forage, and turf grasses grown for seed;

(b) Provide for implementation of a research program to explore and identify economical and practical alternative agricultural practices to the open burning of field and forage, and turf grasses grown for seed;

(c) Provide for interim regulation of such burning until practical alternatives are found.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-030 PERMITS, CONDITIONS, AND RESTRICTIONS. (1) No open burning of field or forage grasses, or turf grasses shall be undertaken unless a permit has been obtained from ~~((the department or from an activated air pollution control))~~ ecology or an authority, as appropriate. The issuance, denial, or conditioning of permits shall be governed by consideration of air quality conditions in the area affected by the proposed burning, the time of year, meteorological conditions, the size and duration of the proposed burning activity, the amount of straw removal required, the applicant's need to carry out such burning, and the public's interest in the environment. Permits will be conditioned to minimize air pollution ((effects as far as practical)). Until approved alternatives become available, ((the department)) ecology or the authority may limit the number of acres, on a pro rata basis, among those affected for which permits to burn will be issued in order to control emissions ((from this source)).

(2) ~~((The department or activated air pollution control authority may deny permits or establish permit conditions based on the considerations cited in WAC 173-430-030(1)).~~

~~Permit conditions may include requirements for straw removal and limits on acreage to be burned.))~~ Burning of acreage not previously under permit may be banned or subject to more restrictive conditions. Burning of field and forage grasses may be restricted, and other measures may be required to minimize air pollution ((effects)).

Permits issued before 1978 will establish a permit history for the applicant. This permit history will apply to an applicant and not to specific parcels of land ~~((, except))~~ and is established only for the maximum amount of acreage included in any permit issued before 1978. Land transferred to a spouse, son, or daughter, will retain a permit history as established by the original applicant.

~~((Permit history will be established only for the maximum amount of acreage included in any permit issued before 1978.~~

~~Denying permits or establishing more restrictive permit conditions may become necessary. This))~~ Any permit denial or restriction may first be applied to applicants without a permit history and to amounts of acreage not included in an applicant's permit history.

Applicants who received permits before 1978 may be given priority for burning the amount of acreage cited in the permit history ~~((, if any program is implemented to limit acreage burned or to impose more stringent permit conditions)).~~

(3) Open burning of field and forage grasses shall be prohibited. However, a permit using restrictions or conditions, may be issued to burn field and forage grasses for disease, pest, or weed control, if such need is certified by a county agent or other agricultural authority; or if such grasses were planted as part of a soil erosion control plan approved by a conservation district.

(4) ~~((Permit restrictions or conditions for burning turf grasses may be established for the reasons cited in WAC 173-430-030(3)).~~

(5) Open burning of all grasses scheduled for tear-out shall be prohibited unless a permit specifically allows such burning.

~~((6))~~ (5) Practical alternative production methods and disease controls which would reduce or eliminate open burning shall be used when reasonably available. These methods and controls shall be used regardless of specific provisions of the compliance program described in this section.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-040 MOBILE FIELD BURNERS. Mobile field burners, and other methods of incineration not classified as open burning, shall not be prohibited by the restrictions in WAC 173-430-030: PROVIDED, That emissions do not exceed the following standards:

(1) Visible emissions shall not exceed an opacity of 20 percent for more than three minutes in any one hour;

(2) Particulate emissions shall not exceed 0.1 grains per standard dry cubic foot of exhaust gas, corrected to seven percent oxygen ~~((at standard conditions, dry))~~.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-050 OTHER APPROVALS. ~~((Nothing in this chapter shall relieve any applicant for a permit hereunder from obtaining))~~ A person applying for a permit under this chapter is still required to obtain permits, licenses, or approvals required by any other laws, regulations, or ordinances.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-060 STUDY OF ALTERNATIVES. ~~((The department))~~ Ecology shall conduct, cause to be conducted, or approve of a study or studies to explore and identify economical and practical alternative practices to open burning of field and forage, and turf grasses ~~((grown for seed))~~. To conduct any such study, ~~((the department))~~ ecology may contract with public or private entities. Any approved study shall provide for the identification of such alternatives as soon as possible. ~~((The department))~~ Ecology shall annually review the progress of such studies ~~((The department shall, by January 1, 1981))~~, review provisions of this regulation and available alternatives to open burning and determine if continuing open burning of field and forage, and turf grasses is justified.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-070 FEES. (1) To support the study or studies described in WAC 173-430-060, ~~((the department or activated air pollution control))~~ ecology or an authority ~~((, as appropriate,))~~ shall collect a fee of

fifty cents per acre of crop to be burned before any permit is issued under WAC 173-430-030. This fee shall be submitted with individual permit applications.

(2) When a permit is granted to burn fewer acres than requested in the permit application, ~~((the department or))~~ ecology or the authority ~~((, as appropriate,))~~ shall refund to the permit applicant ~~((that))~~ the unused part of the permit fee ~~((which applies to the acreage not permitted to burn))~~.

(3) ~~((Permits issued under this chapter grant approval to burn the number of acres specified in the permit. If, after receiving a permit, a grower burns fewer acres than allowed under the permit,))~~ No part of the permit fee will be refunded if a grower decides to burn fewer acres than the permit allows.

(4) After granting any permit and making any refund required under WAC 173-430-070(2), ~~((any))~~ the authority shall transfer the permit fee to ~~((the department))~~ ecology.

(5) ~~((The department))~~ Ecology shall deposit all permit fees in a special grass seed burning research account in the general fund.

(6) ~~((The department))~~ Ecology shall allocate moneys annually from this account to support approved studies provided for in WAC 173-430-060, up to the amount appropriated to ~~((the department))~~ ecology for such purpose.

(7) When ~~((the department))~~ ecology concludes that enough reasonably available alternative practices to the open burning of field and forage, and turf grasses grown for seed have been developed, and at such time as all costs of any studies have been paid, the grass seed burning research account shall be dissolved. Any money remaining in the account shall revert to the general fund.

AMENDATORY SECTION (Amending Order DE 77-20, filed 11/9/77)

WAC 173-430-080 CERTIFICATION OF ALTERNATIVES. When enough information on alternative practices to open burning becomes available, ~~((the department))~~ ecology shall conduct public hearings to receive testimony from interested parties. If ~~((the department))~~ ecology then concludes that any procedure, program, technique, or device is a practical alternative to the open burning of field and forage ~~((, or))~~ and turf grasses grown for seed, ~~((the department))~~ ecology shall, by order, approve such alternative. After approval, any alternative that is reasonably available shall be used; and open burning of field and forage, and turf grasses grown for seed shall not be allowed.

AMENDATORY SECTION (Amending Order 88-38, filed 1/3/89)

WAC 173-433-030 DEFINITIONS. The definitions of terms contained in chapter 173-400 WAC are incorporated by reference. If disapproved, the solid fuel burning device shall remain subject to the ~~((USEPA))~~ EPA testing protocol. If the application is approved, the manufacturer shall propose

an alternative or modified testing procedure. If the procedure is approved by ~~((the department))~~ ecology, it shall be the responsibility of the manufacturer to submit the device to an accredited testing laboratory and furnish ~~((the department))~~ ecology with final test reports. If test results are equivalent to those required by ~~((USEPA))~~ EPA testing, Washington certification may be issued. Interim certification, for a period not to exceed sixty days, may be issued by ~~((the department))~~ ecology to cover the testing period. Interim certification may be renewed.

AMENDATORY SECTION (Amending Order 87-44, filed 12/16/87)

WAC 173-433-110 OPACITY STANDARDS. (1) Phase 1 opacity level. A person shall not cause or allow emission of a smoke plume from any solid fuel burning device to exceed an average of forty percent opacity for six consecutive minutes in any one-hour period.

(2) Phase 2 opacity level. After July 1, 1990, a person shall not cause or allow emission of a smoke plume from any solid fuel burning device to exceed an average of twenty percent opacity for six consecutive minutes in any one-hour period.

(3) State-wide opacity standard. An ~~((air))~~ authority shall not adopt or enforce an opacity level for solid fuel burning devices that is more stringent than the state-wide standard.

(4) Test method and procedures. EPA reference method 9 - Visual Determination of the Opacity of Emissions from Stationary Sources shall be used to determine compliance with subsections (1) and (2) of this section.

(5) Enforcement. Smoke visible from a chimney, flue or exhaust duct in excess of the opacity standard shall constitute prima facie evidence of unlawful operation of an applicable solid fuel burning device. This presumption may be refuted by demonstration that the smoke was not caused by an applicable solid fuel burning device. The provisions of this requirement shall:

(a) Be enforceable on a complaint basis.

(b) Not apply during the starting of a new fire for a period not to exceed twenty minutes in any four-hour period.

AMENDATORY SECTION (Amending Order 88-38, filed 1/3/89)

WAC 173-433-120 PROHIBITED FUEL TYPES. A person shall not cause or allow any of the following materials to be burned in a solid fuel burning device:

- (1) Garbage;
- (2) Treated wood;
- (3) Plastic and plastic products;
- (4) Rubber products;
- (5) Animal~~((s))~~ carcasses;
- (6) Asphaltic products;
- (7) Waste petroleum products;
- (8) Paints and chemicals; or
- (9) Any substance, other than paper to start the fire, properly seasoned fuel wood, or coal with sulfur content less than 1.0% by weight burned in a ~~((coal stove))~~ coal-

only heater, which normally emits dense smoke or obnoxious odors.

AMENDATORY SECTION (Amending Order 88-38, filed 1/3/89)

WAC 173-433-130 GENERAL EMISSION STANDARDS. In addition to the general applicability of chapter 173-400 WAC to all emission sources;

(1) Emissions ~~((of air contaminants))~~ detrimental to persons or property. No person shall cause or permit the emission of any air contaminant from any solid fuel burning device, including any air contaminant whose emission is not otherwise prohibited by this chapter, if the air contaminant emission directly impacts the property of another so as to cause detriment to the health, safety, or welfare of a person, plant or animal, or causes damage to property or business. Direct impact means that emissions from an identifiable solid fuel burning device are present in amounts which reasonably constitute a threat to the health, safety, or welfare of a person(s).

(2) Odors. Any person who shall cause or allow the generation of any odor from any solid fuel burning device which may interfere with any other property owner's use or enjoyment of his property must use recognized good practice and procedures to reduce these odors to a reasonable minimum.

AMENDATORY SECTION (Amending Order 87-44, filed 12/16/87)

WAC 173-433-150 CURTAILMENT. (1) A person in a residence or commercial establishment with an adequate source of heat other than the burning of solid fuel shall not burn solid fuel in any solid fuel burning device:

(a) Whenever ~~((the department))~~ ecology has declared an air pollution episode for the geographical area pursuant to chapter 173-435 WAC; or

(b) Whenever ~~((the department))~~ ecology or an ~~((air))~~ authority has declared impaired air quality for the geographical area, except when the solid fuel burning device is certified under WAC 173-433-100.

(2) A person responsible for a solid fuel burning device already in operation at the time an episode is declared shall ~~((extinguish that device by withholding))~~ withhold new solid fuel for the duration of the episode. A person responsible for a solid fuel burning device that is not certified under WAC 173-433-100 already in operation at the time impaired air quality is declared shall ~~((extinguish that device by withholding))~~ withhold new solid fuel for the duration of the impaired air quality. Smoke visible from a chimney, flue or exhaust duct after ~~((a time period of))~~ three hours has elapsed from the ~~((time of))~~ declaration of the episode or impaired air quality shall constitute prima facie evidence of unlawful operation of an applicable solid fuel burning device. This presumption may be refuted by demonstration that the smoke was not caused by ~~((an applicable))~~ a solid fuel burning device.

((7) Masking. No incinerator operator shall cause or permit the installation or use of any device, or the use of any means which, without resulting in a reduction in the total amount of air contaminant emitted, conceals an emissions of an air contaminant which would otherwise violate any provision of this chapter.

(8) Fallout. No incinerator owner or operator shall cause or permit the emission of particulate matter from any emissions unit which becomes deposited beyond the property boundary under direct control of the owner or operator of the incinerator facility in such quantities or of such character or duration as is, or is likely to be, injurious to human health, plant or animal life, or property, or will interfere unreasonably with the use and enjoyment of the property upon which the material is deposited.

((10)) (6) Source testing. ((In order)) To demonstrate compliance with this chapter, ((the department or cognizant local authority may require that a test be made of any emissions unit using procedures contained in Source Test Manual - Procedures for Compliance Testing, state of Washington, department of ecology, on file at the department. At no time when solid waste is being burned shall the temperature of the final combustion zone fall)) nor below 871°C (1600°F) for any reading.

(2) Residence time. The minimum combustion chamber temperature must be maintained for at least one second (1.0 second) in a zone after the last over fire air has entered the combustion chamber. If overfire air is not used, the combustion chamber shall maintain the minimum combustion temperature or greater for at least one second with all combustion gases. Procedures for determining the residence time shall be a part of the new source review.

(3) Excess air. The combustion gases leaving the final combustion zone must contain at least three percent ((free)) oxygen measured on a wet basis.

PROPOSED RULES
DEPARTMENT OF HEALTH
 [Filed September 17, 1990, 3:10 p.m.]

Original Notice.

Title of Rule: Repealing WAC 308-25-010; amending WAC 308-25-015 and 308-25-035; and new sections WAC 308-25-011, 308-25-041, 308-25-013, 308-25-072, 308-25-073, 308-25-074 and 308-25-180. Licensure and education program approval for dental hygienists. Also to establish continuing education requirements for licensees.

Purpose: To implement RCW 18.29.021, [18.29.]045 and [18.29.]130.

Statutory Authority for Adoption: Chapter 18.29 RCW.

Statute Being Implemented: Chapter 18.29 RCW.

Summary: To establish the licensure requirements by examination and interstate endorsement of credentials. To establish the standards and procedures for approval of education programs. To establish continuing education requirements for licensees.

Reasons Supporting Proposal: To implement RCW 18.29.021, [18.29.]045 and [18.29.]130.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Carol Lewis, Program Manager, Olympia, Washington, (206) 586-1867.

Name of Proponent: Department of Health, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Establishes the application eligibility requirements for licensure by examination and interstate endorsement

of credentials. Also, establishes the standards and procedures for education program approval for dental hygiene expanded functions. And, establishes continuing education requirements for licensees. The education requirements will assure that minimum requirements have been met relative to the entire scope of practice which was not the case in the past. The approval of education programs will provide an avenue to obtain the appropriate education if they have not already done so. Continuing education requirements will ensure an effort by the licensees to keep up to date. All will ensure protection of the health, safety and welfare of the public.

Proposal Changes the Following Existing Rules: Repeals WAC 308-25-010 and replaces it with WAC 308-25-011. WAC 308-25-011 is basically the same except it expands on the education requirements. It is now a statutory mandate to require education relative to the entire scope of practice. This was not in the statutory authority prior to new legislation which passed in the 1989 legislative session (SHB 1894); and amending WAC 308-25-015 and 308-25-035 to eliminate the theory examination in place of the national board examination for dental hygienists. This does not create any impact of any degree.

No small business economic impact statement is required for this proposal by chapter 19.85 RCW.

Hearing Location: General Administration Auditorium, 11th and Columbia, Olympia, Washington, on October 23, 1990, at 9:00 a.m.

Submit Written Comments to: Carol Lewis, Program Manager, Dental Hygiene Program, 1300 S.E. Quince Street, Mailstop EY-26, Olympia, WA 98504, by October 22, 1990.

Date of Intended Adoption: October 29, 1990.

(1) "All districts accepting applications from nonresident students for admission to the district's schools shall consider equally all applications received. Each school district shall adopt a policy establishing rational, fair, and equitable standards for acceptance and rejection of applications by June 30, 1990." The following shall be considered in applying this subsection:

(a) Applications from nonresident students for the purpose of this section do not include students who are attending the district pursuant to arrangements or entitlements noted in WAC 392-137-110.

(b) The requirement to consider all applications equally does not preclude the establishment of a priority system that is fair and equitable under equal protection standards.

(c) The failure of a district to have adopted an admission policy at the time of the student's denial of admission, not the June 30, 1990 deadline, will govern an order to admit for failure to adopt any policy regarding admission.

(2) "The district shall provide to applicants written notification of the approval or denial of the application in a timely manner. If the application is rejected, the notification shall include the reason or reasons for denial and the right to appeal under RCW 28A.225.230(3)." EMERGENCY RULES
BOARD FOR
VOCATIONAL EDUCATION

[Filed September 17, 1990, 4:33 p.m.]

Date of Adoption: September 11, 1990.

Purpose: To amend rules previously filed December
31, 1986, and June 22, 1987; to add new sections; and to
recodify under chapter 490-100 WAC.

Citation of Existing Rules Affected by this Order:
Repealing chapter 490-800 WAC.

Statutory Authority for Adoption: Chapter 28C.10 RCW.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The agency has prioritized among numbers of needed revisions, choosing to adopt the most necessary changes on an emergency basis in September and adding others (after scheduling public hearings through the fall) for a permanent adoption in December.

Effective Date of Rule: Immediately.

(5) Transition into tuition recovery fund. A training location operated prior to June 7, 1990, as an "additional instruction site" (WAC 490-800-100(2)) under a license issued to a common owner but required to be individually licensed as a consequence of RCW 28C.10.020(7) will, upon the expiration of its current license to operate:

(a) Be considered to have commenced its participation in the tuition recovery fund under the terms of RCW 28C.10.084 on the first date that participation under the fund was commenced by its common owner(s); and

(b) Be considered to have satisfied the requirement for an "initial capitalization" deposit (RCW 28C.10.084(5) and WAC 490-800-180(3)) by recognizing in its name the initial capitalization deposit received on its behalf from its common owner(s); and

(c) Begin, effective with the date it is required to be separately licensed and thereafter, to make semiannual contributions to the tuition recovery fund on the basis of

its reported total tuition income, calculated under subsection (4) of this section; and

((d) Begin, effective with the date it is required to be separately licensed and thereafter, to make semiannual deposits that are the same in number as remained unpaid by its common owner(s) on that date, until it has completed the schedule of ten payments described under subsection (4) of this section.

((5)) (6) The agency will prepare and mail to each licensee semiannual notices of the due dates and amounts of deposits required under subsection (4) of this section. The fee for late filings under WAC 490-800-120(3) of this chapter shall apply to late payments of deposits into the fund for a period cumulating to thirty days. (c) A notation showing the cumulated balance existing in the fund at the most recent half-year accounting; and

(d) A summary showing any disbursements made from the fund to satisfy claims in the period since the last such similar summary was disseminated.

((7) Only when) (8) Within thirty days after disbursements made to settle claims reduce the operating balance below two hundred thousand dollars ((following such disbursements)) and recovery of such funds has not been ensured under the provisions of RCW 28C.10.084 (9)(d) and/or (10), the agency shall assess each licensee a pro rata share of an amount required to restore the deficiency created by such disbursements((, employing for calculations)). In making calculations of each respective share the agency shall employ the same percentages of liability established by the matrix appearing under subsection (2) of this section. In the event that the amount of any single such assessment equals or is less than the semiannual amount of deposit established for a licensee under subsection (4) of this section, the assessment shall be paid within thirty days of notice. In the event any single assessment exceeds the amount of its semiannual deposit, the entity may apply to the agency for a schedule of deferred payments. The agency shall grant such deferrals on application, but in no case shall the time extended exceed one year beyond the date of an assessment.

((8)) (9) Funds disbursed to settle claims against a current licensee shall be recovered by the agency under a schedule to be negotiated with the affected entity on a case-by-case basis following such disbursement. To secure deferral of payment more than thirty days after demand for recovery is made, the burden to prove manifest hardship rests on the entity but in no case shall the time extended exceed one year beyond the date of the initial demand notice.

AMENDATORY SECTION (Amending Resolution No. 86-81-3, filed 12/31/86)

WAC 490-800-190 PROHIBITIONS. (See RCW 28C.10.110(11).) In addition to the act, it is deemed an unfair business practice for a private vocational school or agent to:

~~(1) ((Represent that the school is approved, recommended, or endorsed by the state of Washington or by the agency, except the fact that the school is authorized to operate under this chapter may be stated as follows: THIS SCHOOL IS LICENSED UNDER CHAPTER 28C.10 RCW; INQUIRIES REGARDING THIS OR ANY OTHER PRIVATE VOCATIONAL SCHOOL MAY BE MADE TO THE WASHINGTON STATE COMMISSION FOR VOCATIONAL EDUCATION, BUILDING 17, AIR INDUSTRIAL PARK, MS LS-10, OLYMPIA, WASHINGTON 98504 (206/753-5673);~~

~~(2)) Advertise, offer, sell, or award any educational credential without requiring the consumer to enroll in and successfully complete a prescribed program of study, as outlined in the school's catalog or brochure;~~

~~((3)) (2) Sell, discount, or transfer contracts or promissory notes for tuition to third parties without the signed consent of the student or his/her financial sponsors, and a statement notifying all parties that the cancellation and refund policy continues to apply;~~

~~((4)) (3) Misrepresent to students the availability and/or amount of federal grants/loans potentially available.~~

~~(4) A school is prohibited under RCW 28C.10.110(3) from advertising in portions of publications devoted to recruiting employees for available jobs — commonly called "help wanted columns": PROVIDED HOWEVER, That a school can advertise under a help wanted classification for the purposes of:~~

~~(a) Making an offer of employment for its own bona fide job openings;~~

~~(b) Soliciting job opportunities for available graduates.~~

~~(c) To establish consistency in the implementation of this section, the following definitions will apply:~~

~~(i) "Advertise" means the publishing by a school of information that establishes its identity, location, and nature of course offerings available, and that may or may not contain an offer of training.~~

~~(ii) "Help wanted section" means any classified advertising section/subdivision in a publication that contains offers of employment. The particular wording any publication may choose to caption such a section is not material.~~

~~(iii) "Newspaper" means a printed publication usually issued daily or weekly, containing news, editorials, advertisements, etc. The proportionate mixture of contents is immaterial. The definition extends, for example, to tabloids such as "nickel-savers" that contain primarily or exclusively advertising. It is not material whether the publication is sold or given away.~~

~~(d) For purposes of this section, it is not considered "advertising" if a licensee elects to insert a notice in a "help wanted column" for the purpose of referring the reader to different classified heading in the same issue of the same publication, provided that:~~

~~(i) An offer of training is being made by the licensee under an appropriate other section in the same issue of the same publication; and~~

~~(ii) Such referral notice contains only the name of the licensee and not its address, telephone number, or description of program(s); and~~

~~(iii) The overall size and general appearance of what appears as a notice is consistent with its purpose only to refer readers elsewhere.~~

~~(5) RCW 28C.10.110(12) makes it an unfair business practice to attempt to recruit students within forty feet of a building that contains a welfare or unemployment office. The term "recruiting" is defined by statute. Other terms employed in the statute are further defined as follows:~~

~~(a) The distance of "forty feet from a building" shall be measured in a straight line from any doorway affording public access, extended parallel to the building in all directions along sidewalks or curb lines and extending at right angles to the building into adjacent spaces such as, but not limited to, parking lots. In instances of buildings with multiple entrances, the furthest distant point from any part of the structure that can be determined by the described methodology shall prevail throughout as the minimum distance permitted.~~

~~(b) "Welfare or unemployment office" means when applied to state government, buildings offering public access to provide services to clients of:~~

~~(i) Employment security department: Employment services division; family independence/opportunities branch; labor exchange branch; and special program branch; and~~

~~(ii) Department of social and health services: Children, youth and family services administration; economic and medical services administration; aging and adult services administration; and health and rehabilitative services administration.~~

~~(c) In the instance of county and municipal agencies, "welfare or unemployment office" means those buildings offering public access for the purpose of providing shelter, food, employment, health, and social services.~~

~~(d) The term "welfare or unemployment office" includes established locations operated by community-based, nonprofit organizations for the purpose of providing shelter, food, employment, health, and social services to disadvantaged populations.~~

WAC 490-800-255 **READOPTION/RECODIFICATION.** This chapter is readopted and recodified under the same section numbers but under a new chapter, chapter 490-100 WAC. Chapter 490-800 WAC is repealed.

EMERGENCY RULES

DEPARTMENT OF FISHERIES

[Order 90-98—Filed September 18, 1990, 10:12 a.m.]

Date of Adoption: September 18, 1990.

Purpose: Commercial fishing rule.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-24-02000Z.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: A harvestable number of coho are available in the waters south of Leadbetter Point. In order to meet conservation constraints careful monitoring of this fishery is necessary. A harvestable number of fish have been allotted to conduct a limited participation fishery (WAC 220-24-50000A) in order to access the condition of the local stocks. This regulation is consistent with federal regulation.

Effective Date of Rule: Immediately.

EMERGENCY RULES
BOARD FOR

COMMUNITY COLLEGE EDUCATION

[Resolution 90-22, Order 123—Filed September 18, 1990, 2:18 p.m.]

Date of Adoption: September 13, 1990.

Purpose: Section 410, chapter 9, Laws of 1990 1st ex. sess., requires joint adoption of rules governing a program known as "Running Start." The proposed rules have been designated in Title 392 WAC and are adopted here by reference.

Statutory Authority for Adoption: Section 410, chapter 9, Laws of 1990 1st ex. sess.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The "Running Start" program allows high school students to concurrently enroll in community colleges commencing with the fall quarter, 1990. There was insufficient time to prepare the necessary joint rules in cooperation with the SPI and the HECB and observe the filing requirements for permanent rule adoption.

Effective Date of Rule: Immediately.

PROPOSED RULES
DEPARTMENT OF ECOLOGY

[Filed September 18, 1990, 3:13 p.m.]

Original Notice.

Title of Rule: Chapter 173-204 WAC, Sediment management standards.

Purpose: To establish sediment quality standards and sediment dilution zone standards per requirements of chapter 90.70 RCW, Puget Sound Water Quality Act, and the Puget Sound water quality management plan, and RCW 90.48.520 Water Pollution Control Act.

Statutory Authority for Adoption: Chapters 43.21C, 70.105D, 90.48, 90.52, 90.54 and 90.70 RCW.

Statute Being Implemented: Chapters 70.105D, 90.48 and 90.70 RCW.

Summary: Chapter 90.70 RCW authorizes state agencies to adopt regulations to implement provisions of the Puget Sound water quality management plan. Chapter 90.48 RCW requires the Department of Ecology to establish criteria for sediment dilution zones. Chapter 70.105D RCW requires development of cleanup standards for all environmental media including sediments.

Reasons Supporting Proposal: To provide standards to reduce and eliminate adverse effects to biological resources and significant health threats to humans from sediment contamination.

Name of Agency Personnel Responsible for Drafting: Brett Betts, Abbot Raphael, 459-6824; Implementation and Enforcement: Greg Sorlie, Abbot Raphael, 459-6037.

Name of Proponent: Department of Ecology, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: This rule will establish standards for the quality of all surface sediments; apply these standards as the basis for management and reduction of the discharge of pollutants; and provide a management and decision process for the cleanup of contaminated sediments.

Proposal does not change existing rules.

Small Business Economic Impact Statement: The Washington Department of Ecology (ecology) is proposing a management process for implementing sediment standards pursuant to requirements of the Model Toxics Control Act (chapter 70.105D RCW), the Water Pollution Control Act (chapter 90.48 RCW) and the Puget Sound Water Quality Authority Act (chapter 90.70 RCW). The management standards will establish surface sediment quality standards (WAC 173-204-300 through 173-204-350) and define procedures for use in source control and cleanup of contaminated sediment sites. Source control includes provisions for sediment impact zones (WAC 173-204-410 through 173-204-420). Sediment cleanup includes provisions for cleanup levels and a decision process (WAC 173-204-500 through 173-204-580), and sediment recovery zones

(WAC 173-204-590). The provisions for sediment impact and recovery zones allow, under certain circumstances, contamination of marine, low-salinity, or fresh-water sediments to exceed sediment quality standards within a defined range of contamination levels.

This document summarizes the economic impacts of the proposed rule on small businesses in Washington in accordance with the Regulatory Fairness Act. Under this act, regulations that have an economic impact on more than 20 percent of all industrial categories or more than 10 percent of businesses in any one industrial category must be reviewed and amended to the extent possible to minimize impacts on small businesses. Certain provisions of the rule may place disproportionate economic impacts on small businesses according to the criteria of the Regulatory Fairness Act. Therefore, mitigating factors that would reduce impacts were examined.

Businesses in 35 industrial categories currently hold National Pollutant [Discharge] Elimination System (NPDES) permits for direct discharge to Puget Sound and may be affected by the proposed management rules. In particular, these rules may affect > 10 percent of all businesses statewide in at least 10 of these industrial categories. These industrial categories include pulp mills, paper mills, paperboard mills, industrial inorganic chemicals, plastics materials and synthetics, industrial organic chemicals, petroleum refining, paving and roofing materials, blast furnaces and basic steel products, and primary nonferrous metals. Based on the 10 percent criterion, the proposed rule affects a sufficient percentage of businesses in individual industrial categories to warrant a thorough small business economic impact analysis. Impacts on public entities were considered separately in a broader analysis conducted under the State Economic Policy Act.

The small business impact analysis compared the estimated costs of complying with the proposed rule with the number of employees and sales revenue of selected businesses that may be subject to additional discharge requirements or liable for cleanup actions. Total costs for establishing and monitoring sediment impact zones ranged from approximately \$27,100 to \$232,100 for a 5-year permit. The major factor influencing the compliance costs for the proposed rule is monitoring costs, many of which may be attributable to evolving NPDES requirements. In addition, applicants for sediment impact zones must comply with all known available and reasonable methods of treatment (AKART), which is assumed to be equivalent to federal requirements already established in NPDES permits. Therefore, the economic analysis assumes that there will be no additional costs of attaining AKART in complying with the proposed rule. The total compliance costs for sediment impact zones may pose disproportionate costs to small businesses (\leq 50 employees) when compared with costs for large businesses as a percentage of sales. However, the total costs are not significant (\leq 1 percent of sales) for the industrial categories examined in detail.

For the cleanup decision process, a wide range of low, medium, and high compliance costs was used to reflect a range of actions that may be required for different sites in Puget Sound. At the lower range of costs for the

cleanup decision process (including cleanup actions and monitoring), businesses may have total costs of up to approximately \$256,000. The middle range of total costs (approximately \$256,000 to \$10,800,000) also encompasses the range of costs that have been estimated for remedial action and monitoring at eight cleanup sites within a marine superfund site in Puget Sound. At the upper range of costs for this process, businesses could have total costs of approximately \$10,800,000 to \$56,000,000. Two major factors affecting these ranges in costs include the type of remedial action (e.g., capping vs. upland disposal of contaminated sediments) and the total amount of contaminated sediment at any one site. Order-of-magnitude cost estimates were made using average unit costs of cleanup and assumptions from the record of decision for the Commencement Bay superfund site. The amount of contaminated sediment that might be expected at a site was estimated by applying the cleanup decision process in the proposed rule to scenarios for 10 sites representing the major kinds of sediment contamination in Puget Sound. Other costs for applications, investigations, reports, and monitoring were estimated using federal and ecology information.

For each industrial category, the cleanup cost estimates were compared with the annual sales and number of employees for both small and large businesses. Small businesses in each industrial category examined are projected to have disproportionate impacts compared with large businesses, assuming that comparable cleanup and monitoring costs could be encountered at any given site. Therefore, implementation of the cleanup decision process was considered to have disproportionate impacts on small business.

The proposed rule contains several elements that were designed to mitigate economic impacts of implementing the sediment standards, including provisions for temporary variances from sediment standards for ongoing discharges, elimination from active remediation of small localized areas of contamination or broader areas of minor contamination, and the ability to consider the feasibility of cleanup in setting site-specific cleanup levels (between the sediment standard and a minimum cleanup level). A "mixed funding" provision also allows ecology to provide remediation funding for small businesses experiencing hardships as a result of the rule. This provision enables case-by-case evaluation of impacts and mitigation that can range, depending on need, from a partial subsidy to full funding of activities. Ecology may also provide technical support to small businesses in complying with the rule and facilitate resource sharing during data collection activities related to monitoring. In addition, ecology has the discretion to pursue one or many potentially liable parties in enforcing cleanup requirements. This flexibility can lessen the burden on small businesses to the extent that multiple parties may share cleanup costs for a site.

(4) The sediment criteria of WAC 173-204-320 through 173-204-340 shall constitute surface sediment quality standards and be used to establish an inventory of surface sediment sampling stations which pass or fail the applicable sediment quality standards.

(5) Part IV, Sediment source control standards, of this chapter shall be used as a basis for controlling point and nonpoint source discharges to state waters through the National Pollutant Discharge Elimination System (NPDES) federal permit program, other state water quality management permit programs, issuance of administrative orders or other means determined appropriate by the department.

(6) Part V, Sediment cleanup standards of this chapter establishes administrative procedural requirements and criteria to identify, screen, rank and prioritize, and cleanup contaminated surface sediment sites. The sediment cleanup standards of WAC 173-204-500 through 173-204-590 shall be used pursuant to authorities established under chapters 90.48 and 70.105D RCW.

(7) This chapter establishes and defines a goal of minor adverse effects as the maximum level of sediment contamination allowed under the provisions of both Part IV, Sediment source control standards and Part V, Sediment cleanup standards.

(8) Local ordinances establishing requirements for the designation and management of marine, low salinity and freshwater sediments shall not be less stringent than this chapter.

Note: All codes, standards, statutes, rules or regulations cited in this chapter are available for inspection at the Department of Ecology, Mailstop PV-11, Olympia, Washington 98504-8711.

The sediment recovery zone standards of WAC 173-204-590 shall apply to each person's cleanup action decision made pursuant to WAC 173-204-580 where the selected action leaves in place marine, low salinity, or freshwater sediments that exceed the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(2) The sediment quality standards of WAC 173-204-320 through 173-204-340 shall not apply:

- (a) Within a sediment impact zone as authorized by the department under WAC 173-204-415; or
- (b) Within a sediment recovery zone as authorized by the department under WAC 173-204-590; or
- (c) To particulates suspended in the water column; or
- (d) To particulates suspended in a permitted effluent discharge.

NEW SECTION

WAC 173-204-120 ANTIDegradation POLICY. The anti-degradation policy of the state of Washington as generally guided by chapters 90.48 and 90.54 RCW, shall apply to this chapter as follows:

(1) Existing beneficial uses shall be maintained and protected and no further degradation which would interfere with or become injurious to existing beneficial uses shall be allowed.

(2) No degradation shall be allowed of waters constituting an outstanding national resource, such as waters of national and state parks and scenic and recreation areas, wildlife refuges, and waters of exceptional recreational or ecological significance.

(3) Whenever surface sediments are of a higher quality (i.e., lower chemical concentrations or adverse biological response) than the criteria assigned to said sediments, the existing surface sediment quality shall be protected and waste and other materials and substances shall not be allowed to contaminate such sediments or reduce the existing sediment quality thereof, except in those instances where:

- (a) It is clear that overriding considerations of the public interest will be served;
 - (b) All wastes and other materials and substances proposed for discharge that may contaminate such sediments are provided with all known, available, and reasonable methods of prevention, control and treatment and best management practices at a minimum; and
 - (c) The reduction of existing surface sediment quality is authorized by the department under WAC 173-204-415, Sediment impact zones.
- (4) In no case shall any degradation of surface sediment quality be allowed if that degradation interferes with and/or becomes injurious to existing sediment beneficial uses and/or causes long-term, irreparable harm to the environment.

NEW SECTION

WAC 173-204-130 ADMINISTRATIVE POLICIES. The department shall implement this chapter in accordance with the following policies:

(1) The department shall seek to implement, and as necessary modify this chapter to fully protect biological resources and human health using methods that accurately reflect the latest scientific knowledge.

(2) When the department cannot make a distinction between ground water, surface water or sediments, the applicable standards shall depend on which beneficial use is or could be adversely affected. If beneficial uses of more than one resource are affected, the most restrictive standards shall apply.

(3) It shall be the goal of the department to modify this chapter so that methods such as sediment impact zone models, use of area weighted averaging, use of contaminated sediment site ranking models, etc., continue to accurately reflect the latest scientific knowledge through ongoing validation and refinement.

(4) Any person or the department may propose the application of an alternate technical method to replace a specific technical method required under this chapter. Using best professional judgment, the department shall provide advance review and approval of any alternate technical method proposed prior to its application. Application and use of alternate technical methods shall be allowed when the department

determines that the technical merit of the resulting decisions will improve the department's ability to implement and meet the intent of this chapter. The department shall maintain a record of the department's decisions concerning application for use of alternate technical methods pursuant to this subsection. The record shall be made available to the public on request.

(5) Intergovernmental coordination. The department shall ensure appropriate coordination and consultation with federally recognized Indian tribes and local, state, and federal agencies to provide information on and to implement this chapter.

(6) This chapter is subject to review and revision, pursuant to the procedures established within chapter 34.05 RCW, the Administrative Procedure Act, when the department determines:

- (a) New or additional marine, low salinity, or freshwater surface sediment data are available relating sediment chemical quality to acute or chronic adverse effects on biological resources;
 - (b) New or additional information is available relating human health risk to marine, low salinity, or freshwater surface sediment chemical contaminant levels;
 - (c) New or additional information is available relating levels of other toxic, radioactive, biological and deleterious substances in marine, low salinity, or freshwater sediments to acute or chronic adverse effects on biological resources, or to a significant health risk to humans; or

PART III—SEDIMENT QUALITY STANDARDS

NEW SECTION

WAC 173-204-300 PURPOSE. The sediment quality standards of WAC 173-204-320 through 173-204-340 include chemical concentration criteria, biological effects criteria, human health criteria, other toxic, radioactive, biological, or deleterious substances criteria, and nonanthropogenically affected sediment quality criteria which are used to identify surface sediments that have no adverse effects on biological resources, and correspond to no significant health risk to humans. Designation determinations using the sediment quality standards of WAC 173-204-320 through 173-204-340 shall be conducted as stipulated in WAC 173-204-310, Sediment quality standards designation procedures.

NEW SECTION

WAC 173-204-310 SEDIMENT QUALITY STANDARDS DESIGNATION PROCEDURES. Any person may use these procedures to determine a surface sediment's designation using the applicable sediment quality standards of WAC 173-204-320 through 173-204-340. A surface sediment sample that passes the initial designation procedures is designated as complying with the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, until such time as any person or the department confirms the sediment designation as failing the applicable sediment quality standards of WAC 173-204-320 through 173-204-340. A surface sediment sample that fails the initial designation procedures is designated as not complying with the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, until such time as any person or the department confirms the sediment designation as passing the applicable sediment quality standards of WAC 173-204-320 through 173-204-340. A surface sediment sample that passes or fails the confirmatory designation procedures is designated as such under the procedures of WAC 173-204-310. Surface sediment shall be designated with the applicable sediment quality standards of WAC 173-204-320 through 173-204-340 as follows:

(1) Initial designation. Surface sediments that have been chemically analyzed for the applicable chemical concentration criteria of WAC 173-204-320 through 173-204-340 shall be designated as follows:

(a) Surface sediments with chemical concentrations equal to or less than all the applicable chemical or human health criteria are designated as having no adverse effects on biological resources, and not posing a significant health threat to humans, and pass the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(b) Surface sediments with chemical concentrations which exceed any one applicable chemical or human health criterion in WAC 173-204-320 through 173-204-340 are designated as having adverse effects, and fail the sediment quality standards of WAC 173-204-320 through 173-204-340, pending confirmatory designation.

(2) Confirmatory designation. Any person or the department may confirm the designation of surface sediments which have either passed or failed initial designation procedures listed in subsection (1) of this section using the applicable biological testing of WAC 173-204-315, as required below. Surface sediment samples that pass all the required confirmatory biological tests are designated as passing the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, notwithstanding the sediment's previous initial designation under subsection (1) of this section. Any surface sediment sample which fails any one of the required confirmatory biological tests shall be designated as failing the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, notwithstanding the sediment's previous initial designation under subsection (1) of this section. The confirmatory biological test standards are described below.

(a) To confirm the designation of a surface sediment which exceeds any applicable chemical concentration criterion established in WAC 173-204-320 through 173-204-340, the sediment must be tested for:

(i) Two of the acute effects biological tests described in the applicable standards of WAC 173-204-315; and

(ii) One of the chronic effects biological tests described in the applicable standards of WAC 173-204-315.

(b) Surface sediments with chemical concentrations which exceed any applicable human health criterion of WAC 173-204-320 through 173-204-340 shall be eligible for confirmatory designation as follows: Reserved: The department shall determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

Table I Footnotes

1 Where laboratory analysis indicates a chemical is not detected in a sediment sample, the detection limit shall be reported and must be at or below the criteria value shown in this table. Where chemical criteria in this table represent

the sum of individual compounds or isomers, and a chemical analysis identifies an undetected value for one or more individual compounds or isomers, the detection limit shall be used for calculating the sum of the respective compounds or isomers.

- 2 The listed chemical parameter criteria represent concentrations in parts per million, "normalized," or expressed, on a total organic carbon basis. To normalize to total organic carbon, the dry weight concentration for each parameter is divided by the decimal fraction representing the percent total organic carbon content of the sediment.
- 3 The LPAH criterion represents the sum of the following "low molecular weight polynuclear aromatic hydrocarbon" compounds for: Naphthalene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, and Anthracene. The LPAH criterion is not the sum of the criteria values for the individual LPAH compounds as listed.
- 4 The HPAH criterion represents the sum of the following "high molecular weight polynuclear aromatic hydrocarbon" compounds: Fluoranthene, Pyrene, Benz(a)anthracene, Chrysene, Total Benzofluoranthenes, Benzo(a)pyrene, Indeno(1,2,3-c,d)pyrene, Dibenzo(a,h)anthracene, and Benzo(g,h,i)perylene. The HPAH criterion is not the sum of the criteria values for the individual HPAH compounds as listed.
- 5 The TOTAL BENZOFUORANTHENES criterion represents the sum of the concentrations of the "B," "J," and "K" isomers.

(3) Biological effects criteria. Surface sediments are determined to have adverse effects on biological resources when any one of the confirmatory marine sediment biological tests of WAC 173-204-315(1) demonstrate the following results:

(a) Amphipod: The test sample has a higher (statistically significant, t test, $p \leq 0.05$) mean mortality than the reference sample and the test mean mortality exceeds twenty-five percent, on an absolute basis.

(b) Larval: The test sample has a mean survivorship of normal larvae that is less (statistically significant, t test, $p \leq 0.05$) than the mean normal survivorship in the reference sediment sample and the test mean normal survivorship is less than eighty-five percent of the mean normal survivorship in the reference sample, i.e., the test sample has a mean combined abnormality and mortality that is greater than fifteen percent relative to time-final in the reference sample.

(c) Benthic abundance: The test sediment has less than fifty percent of the reference sediment mean abundance of any one of the following major taxa: Crustacea, Mollusca or Polychaeta, and the test sample abundance is statistically different (t test, $p \leq 0.05$) from the reference abundance.

(d) Worm: The test sediment has a mean biomass of less than seventy percent of the reference mean biomass and the test biomass is statistically different (t test, $p \leq 0.05$) from the reference biomass.

(e) Microtox: The mean light output of the highest concentration of the test sediment is less than eighty percent of the mean light output of the reference sediment, and the two means are statistically different from each other (t test, $p \leq 0.05$).

(4) Marine sediment human health criteria. Reserved: The department may determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

The department shall determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

(6) Nonanthropogenically affected sediment quality criteria. Whenever the nonanthropogenically affected surface sediment quality is of a lower quality (i.e., higher chemical concentrations or adverse biological response) than the applicable sediment quality standards assigned for said sediments by this chapter, the existing surface sediment chemical and biological quality shall be identified on an area-wide basis as determined by the department, and used in place of the sediment quality standards of WAC 173-204-320.

PART IV—SEDIMENT SOURCE CONTROL

NEW SECTION

WAC 173-204-400 **GENERAL CONSIDERATIONS.** (1) Permits authorizing wastewater discharges to surface waters of the state of Washington under authority of chapter 90.48 RCW shall be conditioned so that the discharge receives all known, available and reasonable methods of prevention, control and treatment prior to discharge, as required by chapters 90.48, 90.52, and 90.54 RCW. The department shall provide consistent guidance on the collection, analysis and evaluation of wastewater, receiving-water, and surface sediment samples to meet the intent of this section using consideration of pertinent sections of the Department of Ecology Permit Writers' Manual, as amended, and other guidance approved by the department.

(2) As determined necessary, the department shall require any person who proposes a new discharge to evaluate the potential for the proposed discharge to cause a violation of the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(3) As determined necessary, the department shall require existing permitted discharges to evaluate the potential for the permitted discharge to cause a violation of the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(4) Within permits authorizing existing discharges to surface waters of the state of Washington, the department may specify appropriate locations and methodologies for the collection and analysis of representative samples of wastewater, receiving-water, and surface sediments to evaluate the potential for the discharge to cause a violation of the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(5) In establishing the need for, and the appropriate, individual permit monitoring conditions, the department may consider multiple factors relating to the potential for a discharge to cause a violation of the applicable sediment quality standards of WAC 173-204-320 through 173-204-340 including but not limited to:

- (a) Discharge particulate characteristics;
- (b) Discharge contaminant concentrations, flow, and loading rate;
- (c) Receiving water characteristics;
- (d) The geomorphology of surface sediments; and
- (e) Other factors determined necessary by the department.

(6) As determined necessary, the department shall stipulate permit terms and conditions which include wastewater discharge average and maximum mass loading per unit time, and wastewater discharge average and maximum chemical concentrations within new and existing facility permits authorizing wastewater discharges to surface waters of the state of Washington. Part of the purpose of the wastewater discharge permit terms and conditions shall be to ensure the wastewater discharge does not cause a violation of the applicable standards of WAC 173-204-320 through 173-204-340, except as authorized by the department under WAC 173-204-415, Sediment impact zones.

(7) As determined necessary, the department shall modify wastewater discharge permits whenever it appears the discharge causes a violation, or creates a substantial potential to cause a violation of the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, as authorized by RCW 90.48.520.

(8) As determined necessary, the department shall use issuance of administrative actions under authority of chapters 90.48 or 70.105D RCW to implement this chapter.

(9) Wastewater dilution zones. Water quality mixing zones authorized by the department pursuant to chapter 173-201 WAC, Water quality standards for surface waters of the state of Washington, do not satisfy the standards of WAC 173-204-415, Sediment impact zones.

NEW SECTION

WAC 173-204-410 SEDIMENT QUALITY GOAL AND SEDIMENT IMPACT ZONE APPLICABILITY. (1) Goal. It is the established goal of the department to manage source control activities to reduce and ultimately eliminate adverse effects on biological resources and significant health threats to humans from surface sediment contamination. Therefore, the department shall only authorize sediment impact zones so as to minimize the number, size, and adverse effects of all zones, with the intent to eliminate the existence of all such zones whenever practicable.

(2) A sediment impact zone authorization issued by the department under the authority of chapter 90.48 RCW does not constitute authorization to trespass on lands not owned by the applicant. These standards do not address and in no way alter the legal rights, responsibilities, or liabilities of the permittee or landowner of the sediment impact zone for any applicable requirements of proprietary, real estate, tort, and/or other laws not directly expressed as a requirement of this chapter.

(3) Except as identified in subsection (5)(d) of this section, any person may apply for a sediment impact zone under the following conditions:

(a) The person's discharge is provided with all known available and reasonable methods of prevention, control and treatment, and meet best management practices as stipulated by the department; and

(b) The person's discharge activity removes or disturbs surface sediments which exceed, or otherwise cause or potentially cause marine, low salinity, or freshwater surface sediments to exceed the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, or the antidegradation policy standards of WAC 173-204-120(3) within a period of ten years from the later date of either the department's formal approval of the application for a sediment impact zone authorization or the starting date of the discharge.

(4) The department shall only authorize sediment impact zones for permitted wastewater and stormwater discharges, and other discharges authorized by the department. The department shall authorize all sediment impact zones via discharge permits or other formal administrative actions. The department shall not limit a sediment impact zone authorization via consideration of surface sediment contamination determined by the department to be the result of unknown or unpermitted or historic discharge sources.

(5) As determined necessary by the department, any person with a permitted discharge shall be required to meet the standards of WAC 173-204-400 through 173-204-420, as follows:

(a) Any person with a new or existing permitted wastewater discharge shall meet the standards of WAC 173-204-400 through 173-204-420;

(b) Any person with a new or existing permitted industrial stormwater discharge, regulated as process wastewater in National Pollutant Discharge Elimination System or state discharge permits, shall meet the standards of WAC 173-204-400 through 173-204-420;

(c) Any person with a new or existing permitted stormwater discharge, which fully uses all known, available and reasonable methods of prevention, control and treatment, and best management practices as stipulated by the department at the time of the person's application for a sediment impact zone, shall meet the standards of WAC 173-204-400 through 173-204-420;

(d) Any person with a stormwater discharge, existing prior to the adoption of this chapter, and determined by the department to not be fully using best management practices stipulated by the department at the time of the person's application for a permit from the department, shall be eligible for a sediment impact zone as follows:

(i) The department shall issue sediment impact zone authorizations with requirements for application of best management practices stipulated by the department on an approved time schedule. The sediment impact zone maximum criteria of WAC 173-204-420 shall not be applicable during the approved time schedule authorized by the department.

(ii) Sediment impact zones authorized by the department for permitted stormwater discharges under the applicability provisions of subsection (5)(d) of this section shall be subject to cleanup action determinations made by the department pursuant to WAC 173-204-500 through 173-204-590 when the sediment impact zone maximum criteria of WAC 173-204-420 are exceeded within the authorized sediment impact zone.

(iii) The department shall identify and include best management practices required to meet the sediment impact zone design standards of WAC 173-204-415(4) as soon as practicable within sediment impact zone authorizations established for stormwater discharges per WAC 173-204-410 (5)(d).

(6) Dredged material and fill discharge activities subject to authorization under Section 401 of the federal Clean Water Act via chapter 90.48 RCW and chapter 173-225 WAC, establishment of implementation procedures of application for certification, are not subject to the standards of WAC 173-204-415 but are subject to the standards of WAC 173-204-400 through 173-204-410 and 173-204-420 as follows:

(a) Requirements for dredging activities and disposal sites shall be established by the department using best available dredged material management guidelines and applicable federal and state rules. These guidelines shall include the Puget Sound dredged disposal analysis (PSDDA) dredged material testing and disposal requirements cited in:

(i) Management Plan Report - Unconfined Open-Water Disposal Of Dredged Material, Phase I, (Central Puget Sound), June 1988, or as amended;

(ii) Management Plan Report - Unconfined Open Water Disposal Of Dredged Material, Phase II, (North And South Puget Sound), September 1989, or as amended; and

(iii) Users Manual For Unconfined, Open-Water Disposal Of Dredged Material In Puget Sound, September 1990, or as amended.

(b) In coordination with other applicable federal and state and local dredged material management programs, the department may issue administrative orders to establish approved disposal sites, to specify disposal site use conditions, and to specify disposal site monitoring requirements.

(c) The department may authorize sediment impact zones for dredged material disposal via federal Clean Water Act Section 401 certification actions.

(d) As determined necessary by the department, the department may authorize sediment impact zones for dredged material disposal via

administrative orders issued under authority of chapter 90.48 RCW. The department shall authorize sediment impact zones for all Puget Sound dredged disposal analysis disposal sites via administrative orders issued under authority of chapter 90.48 RCW.

(e) Administrative orders and certifications establishing sediment impact zones for dredged material disposal sites shall describe establishment, maintenance, and closure requirements for the authorized site, as determined by the department.

(7) In cases where the applicable sediment quality standards of WAC 173-204-320 through 173-204-340 are reserved, the department shall determine on a case-by-case basis, the applicability of WAC 173-204-400 through 173-204-410, and the conditions for the issuance or denial of a sediment impact zone authorization.

NEW SECTION

WAC 173-204-415 SEDIMENT IMPACT ZONES. The purpose of this section is to set forth the standards for establishment, maintenance, and closure of sediment impact zones to meet the intent of sediment quality dilution zones authorized pursuant to RCW 90.48-.520, except for sediment impact zones authorized under WAC 173-204-410 (6) and (7). The department shall authorize all sediment impact zones via discharge permits or other formal administrative actions.

(1) General requirements. Authorization of a sediment impact zone by the department shall require compliance with the following general requirements:

(a) Permits authorizing wastewater discharges to surface waters of the state of Washington under authority of chapter 90.48 RCW shall be conditioned so that the discharge receives:

(i) All known, available, and reasonable methods of prevention, control, and treatment prior to discharge, as required by chapters 90.48, 90.52, and 90.54 RCW; and

(ii) Best management practices as stipulated by the department.

(b) The maximum area, and maximum chemical contaminant concentration and/or allowable maximum biological effect level within surface sediments assigned to a sediment impact zone shall be as authorized by the department, in accordance with the standards of this section.

(c) The department shall determine that the person's activity generating effluent discharges which require authorization of a sediment impact zone is in the public interest.

(d) The department shall determine that any person's activity generating effluent discharges which require authorization of a sediment impact zone has adequately addressed alternative waste reduction, recycling, and disposal options through application of all known, available, and reasonable methods of prevention, control, and treatment to minimize as best practicable the volume and concentration of waste contaminants in the discharge.

(e) The area boundaries of the sediment impact zone established by the department shall include the minimum practicable surface area, not to exceed the surface area allowed under subsection (4) of this section.

(f) Adverse effects to biological resources within an authorized sediment impact zone shall be maintained at the minimum chemical contamination and biological effects levels practicable at all times. Adverse effects to biological resources within an authorized sediment impact zone shall not exceed a minor adverse effects level as a result of the discharge. Adverse effects to biological resources within an authorized sediment impact zone shall be determined by the procedures of subsection (5) of this section.

(g) The operational terms and conditions for the sediment impact zone shall be maintained at all times.

(h) Final closure of the sediment impact zone shall be conducted in strict accordance with the department's sediment impact zone authorization.

(i) Documents authorizing a sediment impact zone shall require that the permitted discharge does not result in a violation of the applicable sediment quality standards, WAC 173-204-320 through 173-204-340, outside the area limits of the established zone.

(2) Application requirements.

(a) Whenever, in the opinion of the department, as a result of an ongoing or proposed effluent discharge, a person violates, shall violate, or creates a substantial potential to violate the sediment quality standards of WAC 173-204-320 through 173-204-340 as applicable within a period of ten years from the later date of either the department's formal approval of the application for a sediment impact zone authorization or the starting date of the discharge, the department

may require application for a sediment impact zone authorization under authority of chapter 90.48 RCW. For the purpose of requiring a sediment impact zone application, the department shall not consider surface sediment contamination determined by the department to be the result of unknown or unpermitted or historic discharge sources.

(b) Any person with a proposed or permitted effluent discharge shall apply to the department for authorization of a sediment impact zone when:

(i) The department requires the sediment impact zone application by written notification; or

(ii) The person independently identifies that the ongoing effluent discharge violates, shall violate, or creates a substantial potential to violate the applicable sediment quality standards of WAC 173-204-320 through 173-204-340 within a period of ten years from the later date of either the department's formal approval of the application for a sediment impact zone authorization or the starting date of the discharge, using the procedures of this section.

(c) As necessary, the department may require any person to submit a sediment impact zone application in multiple steps concurrent with its ongoing review and determination concerning the adequacy of the application. The application shall provide the sediment impact zone design information required in subsection (4) of this section and other such information the department determines necessary. The application shall also provide the legal location and landowner(s) of property proposed for use as, or potentially affected by, a sediment impact zone, and shall be accompanied by such other relevant information as the department may require. The department shall issue a written approval of the complete sediment impact zone application prior to or concurrent with authorizing a sediment impact zone.

(d) Submittal of an application to the department for authorization of a sediment impact zone under the terms and conditions of this section shall establish the applicant's interim compliance with requirements of chapter 90.48 RCW and this chapter, as determined by the department. The department may authorize an interim compliance period within a valid discharge permit or administrative order to ensure ultimate compliance with chapter 90.48 RCW and this chapter. The interim compliance period shall not continue beyond the date of issuance of a sediment impact zone authorization within a valid discharge permit issued by the department.

(e) Prior to authorization, the department shall make a reasonable effort to identify and notify all landowners, adjacent landowners, and lessees affected by the proposed sediment impact zone. The department shall issue a sediment impact zone notification letter to any person it believes to be a potentially affected landowner and other parties determined appropriate by the department. The notification letter shall be sent by certified mail, return receipt requested, or by personal service. The notification letter shall provide:

(i) The name of the person the department believes to be the affected landowner;

(ii) The names and addresses of other affected landowners to whom the department has sent a proposed sediment impact zone notification letter;

(iii) The name and address of the sediment impact zone applicant;

(iv) A general description of the location, size, and contamination level proposed for the sediment impact zone;

(v) The intention of the department to release all specific sediment impact zone application information to the public upon written request to the department;

(vi) The determination of the department concerning whether the proposed sediment impact zone application meets the standards of this section;

(vii) The intention of the department whether to authorize the proposed sediment impact zone; and

(viii) Notification that the affected landowners, adjacent landowners, and lessees may comment on the proposed sediment impact zone. Any comments on the proposed sediment impact zone authorization shall be submitted in writing to the department within thirty days from the date of receipt of the notification letter, unless the department provides an extension.

(f) Prior to authorization, the department shall issue a sediment impact zone notification letter to affected port authorities, the Washington state department of natural resources marine lands division, the U.S. Army Corps of Engineers, and other parties determined appropriate by the department. The notification letter shall be sent by certified mail, return receipt requested, or by personal service. The notification letter shall provide the information required under (e) of this subsection.

(3) Locational considerations. The department shall require any person applying for a sediment impact zone to submit information concerning potential location considerations of the zone. The location of an authorized sediment impact zone shall avoid whenever possible and minimize adverse impacts to areas of special importance. Prior to authorization of a sediment impact zone, the department shall consider all pertinent information from the applicant, all affected parties, local, state and federal agencies, federally recognized Indian tribes, and the public concerning locational considerations, including but not limited to:

- (a) Spawning areas;
- (b) Nursery areas;
- (c) Waterfowl feeding areas;
- (d) Shellfish harvest areas;
- (e) Areas used by species of economic importance;
- (f) Tribal areas of significance;
- (g) Areas determined to be ecologically unique;
- (h) Water supply intake areas; and
- (i) Areas used for primary contact public recreation.

(4) Design requirements. The location, areal limitations, and degree of effects allowed within an authorized sediment impact zone shall be determined by application of the department's sediment impact zone computer models "CORMIX" and/or "WASP 4," or an alternate sediment impact zone model(s) approved by the department under WAC 173-204-130(4), as limited by the standards of this section and the department's best professional judgment. The models shall be used to estimate the impact of any person's wastewater or stormwater discharge on the receiving water and surface sediment quality for a period of ten years from the later date of either the department's formal approval of the application for a sediment impact zone authorization or the starting date of the discharge.

(a) Data requirements. The discharger shall submit the following information to determine requirements for establishment and authorization of a sediment impact zone, as required by the department:

(i) Data reports and analyses results for all samples of wastewater or stormwater, receiving water, and surface sediments collected by the discharger or other parties relating to evaluation of the potential effects of the permitted discharge, as required by WAC 173-204-400.

(ii) Data reports and analyses results determined necessary to:

(A) Apply discharge modeling to the permitted discharge; and

(B) To identify and evaluate potential alternative chemical and biological effects of the discharge on the receiving water and surface sediments; and

(C) To identify and evaluate potential alternatives to define the areal size and location of a sediment impact zone needed by the discharge.

(iii) Data reports and analyses results from the discharger's application of the "CORMIX" and/or "WASP 4" or an alternate sediment impact zone model(s) approved by the department under WAC 173-204-130(4), or other discharge models, to the permitted discharge to identify and evaluate:

(A) Potential alternative chemical and biological effects of the discharge on the receiving water and surface sediments; and

(B) Potential alternatives for the areal distribution and location of a potential sediment impact zone required by the discharge.

(b) Overlapping sediment impact zones. Overlapping sediment impact zones, as predicted by the "CORMIX" and/or "WASP 4" models or an alternate sediment impact zone model(s) approved by the department under WAC 173-204-130(4), and the department's best professional judgment, shall be authorized only as follows:

(i) The applicable sediment impact zone maximum criteria of WAC 173-204-420 shall not be exceeded as a result of the multiple discharge sediment impact zones overlap; and

(ii) If the department determines that the applicable chemical contaminant concentration and biological effects restrictions of WAC 173-204-420 would be exceeded as a result of the overlap of multiple discharge sediment impact zones, the department may authorize the sediment impact zones after:

(A) Application of a waste load allocation process to the individual permitted discharges to identify individual permit effluent limitations necessary to meet:

(I) The applicable chemical contaminant concentration and biological effects restrictions for sediment impact zones required by this section; and/or

(II) Stormwater best management practices required by the department; and

(B) Establishment of individual permit compliance schedules for the multiple permitted discharges to ensure compliance with:

(I) The permit effluent limitations established by the department using the waste load allocation process and best professional judgment; and

(II) The standards of WAC 173-204-400 through 173-204-420.

(5) Maintenance requirements.

(a) The department shall review sediment impact zone monitoring conducted by the discharger to evaluate compliance with the department's sediment impact zone authorization and the standards of WAC 173-204-400 through 173-204-420. The department may require additional sediment impact zone monitoring when the department determines that any sediment sampling station within an authorized sediment impact zone exceeds the sediment impact zone maximum criteria of WAC 173-204-420 as a result of the discharge. Whenever the department can clearly demonstrate that, as a result of an effluent discharge, a discharger violates, shall violate, or creates a substantial potential to violate the department's sediment impact zone authorization, or the sediment impact zone maximum criteria of WAC 173-204-420, the department may at its discretion revise the sediment impact zone authorization requirements to meet the standards of WAC 173-204-400 through 173-204-420. For the purpose of this section, a clear demonstration shall consist of one or more of the following:

(i) Use of the sediment impact zone model(s) "CORMIX" and/or "WASP 4" to demonstrate a discharge(s) is the source of the violation or potential violation; and

(ii) Use of one or more of the following methods to demonstrate a violation of the sediment impact zone authorization or the sediment impact zone maximum criteria of WAC 173-204-420:

(A) Direct surface sediment sampling. A violation of the sediment impact zone authorization and/or the sediment impact zone maximum criteria of WAC 173-204-420 is demonstrated when:

(I) The area-weighted average chemical concentration for three stations within the sediment impact zone exceeds the sediment impact zone maximum criteria of WAC 173-204-420 due to the discharge source; or

(II) The biological effects at each of any three stations within the sediment impact zone exceeds the sediment impact zone maximum biological effects criteria of WAC 173-204-420 due to the discharge source; or

(B) Monitoring data which demonstrates a chemical contaminant concentration gradient toward the discharge source exists in surface sediments which violates the sediment impact zone authorization or the standards of WAC 173-204-420; or

(C) A trend analysis of the effluent chemical discharge quality and in-place surface sediment monitoring data which statistically demonstrates an ongoing violation or substantial potential to violate the sediment impact zone authorization or the standards of WAC 173-204-420; or

(D) Field depositional (e.g., sediment traps) and/or effluent particulate (e.g., centrifuge analysis) data which demonstrate an ongoing violation or substantial potential to violate the sediment impact zone authorization or the standards of WAC 173-204-420; or

(E) Mathematical or computer modeling which demonstrates an ongoing violation or substantial potential to violate the sediment impact zone authorization or the standards of WAC 173-204-420.

(b) The department's response to a clear demonstration of a violation or potential violations shall be in the following order:

(i) Require reanalysis of whether the discharger's effluent treatment complies with all known available and reasonable methods of prevention, control, and treatment and best management practices based on the data used to establish the clear demonstration;

(ii) Alter the authorized sediment impact zone size and/or degree of effects consistent with the standards of this section and the results of direct surface sediment sampling;

(iii) Reduce impacts of the existing or potential violation by requiring additional discharge controls or sediment impact zone maintenance activities;

(iv) Limit the quantity and/or quality of the existing permitted discharge; and/or

(v) Withdraw the department's sediment impact zone authorization and require final closure of the zone.

(c) The department shall require maintenance activities consistent with the standards of this section which may include, but are not limited to:

(i) Dredging and removal of surface sediments, solely for sediment impact zone maintenance needs or coordinated with maintenance

dredging of commercially important areas, e.g., navigational lanes or ship berthing areas;

(ii) Dredging, treatment, and replacement of surface sediments within the sediment impact zone; and/or

(iii) Capping of surface sediments within the sediment impact zone.

(d) All sediment impact zone maintenance actions conducted under this chapter shall provide for landowner review of the maintenance action plans and obtain written landowner(s) approval of the proposed maintenance action prior to implementation of the action.

(6) Closure requirements. The department shall specify specific closure requirements within the sediment impact zone authorization. The department may require closure of authorized sediment impact zones when the department determines that:

(a) The discharger has violated the sediment impact zone maintenance standards of subsection (5) of this section; or

(b) The department determines that:

(i) The wastewater or stormwater discharge quality will not violate the applicable sediment quality standards of WAC 173-204-320 through 173-204-340;

(ii) A sediment impact zone is no longer needed or eligible under the standards of WAC 173-204-410 through 173-204-415.

(7) Modification of sediment impact zones. The department may modify sediment impact zone authorization requirements where the nature of a person's activity which generates, transports, disposes, prevents, controls, or treats effluent discharges has substantially changed and been demonstrated to the department's satisfaction. The modification may occur after consideration of the following:

(a) Reduction of effects. Assessment of the discharge activities and treatment methods shall be conducted by the discharger to demonstrate to the satisfaction of the department that:

(i) Elimination of the sediment impact zone is not practicable; and

(ii) Further reduction in any existing or proposed sediment impact zone area size and/or level of contamination or effects is not practicable.

(b) Alterations. There are substantial alterations or additions to the person's activity generating effluent discharges which require authorization of a sediment impact zone which occur after permit issuance and justify application of permit conditions different from, or absent in, the existing permit.

(c) New information. Sediment impact zones may be modified when new information is received by the department that was not available at the time of permit issuance that would have justified the application of different sediment impact zone authorization conditions.

(d) New regulations. The standards or regulations on which the permit was based have changed by amended standards, criteria, or by judicial decision after the permit was issued.

(e) Changes in technology. Advances in waste control technology that qualify as "all known available and reasonable methods of prevention, control, and treatment" and "best management practices" shall be adopted as permit requirements, as appropriate, in all permits reissued by the department.

(8) Renewal of previously authorized sediment impact zones. Renewal of sediment impact zones previously granted under the standards of WAC 173-204-410 and this section shall be allowed under the following conditions:

(a) The department determines the discharge activities and treatment methods meet all known available and reasonable methods of prevention, control, and treatment and best management practices as stipulated by the department; and

(b) The discharger demonstrates to the department's satisfaction that the discharge activities comply with the standards of WAC 173-204-400 through 173-204-420 and with the existing sediment impact zone authorization; and

(c) Reduction of effects. The discharger conducts an assessment of the permitted discharge activities and treatment methods and demonstrates to the department's satisfaction that:

(i) Elimination of the sediment impact zone is not practicable; and

(ii) A further reduction in any existing or proposed sediment impact zone area size and/or level of contamination is not practicable.

NEW SECTION

WAC 173-204-420 **SEDIMENT IMPACT ZONE MAXIMUM CRITERIA.** This section establishes the minor adverse effects level as the maximum chemical contaminant concentration, maximum health risk to humans, maximum biological effects level, maximum other toxic, radioactive, biological, or deleterious substance level, and maximum nonanthropogenically affected sediment quality level allowed within

authorized sediment impact zones due to an existing or proposed discharge. Using the procedures of WAC 173-204-415(5), if the department determines that the standards of this section are or will be exceeded as a result of an existing or proposed discharge(s), the department shall authorize a sediment impact zone or modify a sediment impact zone authorization consistent with the standards of WAC 173-204-400 through 173-204-420 such that individual permit effluent limitations, requirements, and compliance time periods are sufficient to meet the standards of this section as applicable.

(1) Applicability.

(a) The marine sediment impact zone maximum chemical criteria, and the marine sediment biological effects criteria, and the marine sediment human health criteria, and the marine sediment other toxic, radioactive, biological or deleterious substance criteria and the marine sediment nonanthropogenically affected sediment criteria of this section shall apply to marine surface sediments within Puget Sound.

(b) Non-Puget Sound marine sediment impact zone maximum criteria. Reserved: The department shall determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection.

- Where laboratory analysis indicates a chemical is not detected in a sediment sample, the detection limit shall be reported and must be at or below the criteria value shown in this table. Where chemical criteria in this table represent the sum of individual compounds or isomers, and a chemical analysis identifies an undetected value for one or more individual compounds or isomers, the detection limit shall be used for calculating the sum of the respective compounds or isomers.
- The listed chemical parameter criteria represent concentrations in parts per million, "normalized," or expressed, on a total organic carbon basis. To normalize to total organic carbon, the dry weight concentration for each parameter is divided by the decimal fraction representing the percent total organic carbon content of the sediment.
- The LPAH criterion represents the sum of the following "low molecular weight polynuclear aromatic hydrocarbon" compounds: Naphthalene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, and Anthracene. The LPAH criterion is not the sum of the criteria values for the individual LPAH compounds as listed.
- The HPAH criterion represents the sum of the following "high molecular weight polynuclear aromatic hydrocarbon" compounds: Fluoranthene, Pyrene, Benz(a)anthracene, Chrysene, Total Benzo(a)fluoranthenes, Benzo(a)pyrene, Indeno(1,2,3-c,d)pyrene, Dibenzo(a,h)anthracene, and Benzo(g,h,i)perylene. The HPAH criterion is not the sum of the criteria values for the individual HPAH compounds as listed.
- The TOTAL BENZOFLUORANTHENES criterion represents the sum of the concentrations of the "B," "J," and "K" isomers.

(3) Puget Sound marine sediment impact zone maximum biological effects criteria. The maximum biological effects level that may be allowed within an authorized sediment impact zone shall be a or below a minor adverse biological effects level. The acute and chronic effects biological tests of WAC 173-204-315(1) may be used to determine compliance with the minor adverse biological effects restriction within an authorized sediment impact zone as follows:

(a) When using biological testing to determine compliance with the maximum biological effects criteria within a sediment impact zone, a person shall select and conduct any two acute effects tests and any one chronic effects test.

(b) The biological tests shall not be considered valid unless test results for the appropriate control and reference sediment samples meet the performance standards described in WAC 173-204-315(2).

(c) The sediment impact zone maximum biological effects level is established as that level below which any two of the biological tests in any combination exceed the criteria of WAC 173-204-320(3), or one of the following biological test determinations is made:

(i) Amphipod: The test sample has a higher (statistically significant, t test, $p \leq 0.05$) mean mortality than the reference sample and the test mean mortality is more than thirty percent higher than the reference mean mortality, on an absolute basis; or

(ii) Larval: The test sample has a mean survivorship of normal larvae that is less (statistically significant, t test, $p \leq 0.05$) than the mean normal survivorship in the reference sediment sample and the test mean normal survivorship is less than seventy percent of the mean normal survivorship in the reference sample (i.e., the test sample has a mean combined abnormality and mortality that is greater than thirty percent relative to time-final in the reference sample); or

(iii) Benthic abundance: The test sediment has less than fifty percent of the reference sediment mean abundance of any two of the following

major taxa: Crustacea, Mollusca or Polychaeta and the test sample abundances are statistically different (t test, $p \leq 0.05$) from the reference abundances; or

(iv) Worm: The test sediment has a mean biomass of less than fifty percent of the reference mean biomass and the test biomass is statistically different (t test, $p \leq 0.05$) from the reference biomass.

(4) Puget Sound marine sediment impact zone maximum other human health criteria. Reserved: The department may determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

(5) Puget Sound marine sediment impact zone maximum other toxic, radioactive, biological, or deleterious substances criteria. Other toxic, radioactive, biological or deleterious substances in, or on, surface sediments shall be below levels which cause minor adverse effects in marine biological resources, or which correspond to a significant health risk to humans, as determined by the department. The department shall determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

(6) Puget Sound marine sediment impact zone maximum nonanthropogenically affected sediment criteria. Whenever the nonanthropogenically affected surface sediment quality is of a lower quality (i.e., higher chemical concentrations or adverse biological response) than the applicable sediment impact zone maximum criteria established under this section, the existing surface sediment chemical and biological quality shall be identified on an area-wide basis as determined by the department, and used in place of the standards of WAC 173-204-420.

PART V—SEDIMENT CLEANUP STANDARDS

NEW SECTION

WAC 173-204-500 SEDIMENT CLEANUP DECISION PROCESS. (1) The standards of WAC 173-204-500 through 173-204-590 are procedures which define a cleanup decision process for managing contaminated sediments. These procedures include:

- Screening sediment station clusters of potential concern;
- Conducting hazard assessments to identify cleanup sites;
- Ranking sites identified in (b) of this subsection;
- Determining the appropriate site cleanup authority;
- Conducting a site cleanup study;
- Determining the site-specific cleanup standard;
- Selecting a site cleanup action; and
- Where necessary, authorizing a cleanup site sediment recovery zone.

(2) Under this chapter, the department may require or take those actions necessary to implement the standards of WAC 173-204-500 through 173-204-580 for all contaminated sediment stations on the inventory identified in WAC 173-204-350.

(3) The cleanup process and procedures under this chapter and under other laws may be combined. The department may initiate a remedial action under this chapter and may upon further analysis determine that another law is more appropriate, or vice versa.

NEW SECTION

WAC 173-204-510 SCREENING SEDIMENT STATION CLUSTERS OF POTENTIAL CONCERN. (1) Using the sediment quality standards inventory of WAC 173-204-350, the department shall analyze the sediment sampling data to identify station clusters of potential concern and station clusters of low concern per the standards of this section. Station clusters of potential concern shall be further evaluated using the hazard assessment standards of WAC 173-204-530. Station clusters of low concern shall remain on the inventory and no further cleanup action determinations shall be taken by the department until the stations are reexamined per subsection (5) of this section.

(2) A station cluster is defined as any number of stations from the inventory of WAC 173-204-350 that are determined to be contiguous. For the purpose of identifying a station cluster of potential concern per the procedures of this subsection, three stations with the highest contaminant concentration for any particular contaminant identified in WAC 173-204-520 are selected from a station cluster. This procedure may be repeated for multiple chemicals identified in WAC 173-204-520, recognizing that the three stations with the highest concentration for each particular contaminant may be different and the respective areas for all chemicals may overlap. The department shall review the

inventory of WAC 173-204-350 to identify station clusters of potential concern via the following process:

(a) Identify three stations within a station cluster with the highest concentration of any one chemical contaminant identified in WAC 173-204-520, Cleanup screening levels criteria; and

(b) Determine the area-weighted average concentration for the contaminant identified in (a) of this subsection at the three identified stations; and

(c) Identify if possible, three stations within the station cluster identified in (a) of this subsection, with the highest level of biological effects for the biological tests identified in WAC 173-204-315(1); and

(d) If the area-weighted average contaminant concentration for the three stations identified in (b) of this subsection, exceeds the applicable cleanup screening level in WAC 173-204-520, then the station cluster is defined as a station cluster of potential concern; and

(e) If the biological effects at each of the three stations from (c) of this subsection exceeds the cleanup screening level in WAC 173-204-520, then the station cluster is defined as a station cluster of potential concern; and

(f) If both the area-weighted average contaminant concentration and level of biological effects for all stations within any station cluster are at or below all the respective cleanup screening levels in WAC 173-204-520 as applicable, then the station cluster is defined as a station cluster of low concern; and

(g) If the department determines that any three stations within a station cluster exceed the sediment cleanup screening levels human health criteria or the other toxic, radioactive, biological, or deleterious substances criteria or the nonanthropogenically affected criteria of WAC 173-204-520, then the station cluster is defined as a station cluster of potential concern.

(3) Notification. When a station cluster of potential concern has been identified, the department shall issue notification to the landowners, lessees, onsite dischargers, adjacent dischargers, and other persons determined appropriate by the department prior to the department's conducting a hazard assessment as defined in WAC 173-204-530.

(4) No further cleanup action determinations shall be taken with station clusters of low concern until the inventory of WAC 173-204-350 is updated and the stations reexamined per subsection (5) of this section. Station clusters of low concern shall receive no further consideration for active cleanup, unless new information indicates an increase of chemical contamination at the stations in question. Station clusters of low concern shall be evaluated by the department for improved source control and/or monitoring requirements of this chapter.

(5) The department may at any time reexamine a station or group of stations, or may initiate or require monitoring to reevaluate and identify station clusters of potential concern following the procedures of subsection (2) of this section under the following circumstances:

(a) When the inventory of WAC 173-204-350 is updated;

(b) When new information demonstrates to the department's satisfaction that reexamination actions are necessary to fulfill the purposes of WAC 173-204-500 through 173-204-590; or

(c) If source control measures are not adequately implemented, as determined by the department.

NEW SECTION

WAC 173-204-520 CLEANUP SCREENING LEVELS CRITERIA. (1) Applicability.

(a) The marine sediment cleanup screening levels chemical criteria, and the marine sediment biological effects criteria, and the marine sediment other toxic, radioactive, biological, or deleterious substance criteria, and the marine sediment nonanthropogenically affected criteria of this section shall apply to marine sediments within Puget Sound. Table III Footnotes

- 1 Where laboratory analysis indicates a chemical is not detected in a sediment sample, the detection limit shall be reported and must be at or below the criteria value shown in this table. Where chemical criteria in this table represent the sum of individual compounds or isomers, and a chemical analysis identifies an undetected value for one or more individual compounds or isomers, the detection limit shall be used for calculating the sum of the respective compounds or isomers.
- 2 The listed chemical parameter criteria represent concentrations in parts per million, "normalized," or expressed, on a total organic carbon basis. To normalize to total organic carbon, the dry weight concentration for each parameter is divided by the decimal fraction representing the percent total organic carbon content of the sediment.
- 3 The LPAH criterion represents the sum of the following "low molecular weight polynuclear aromatic hydrocarbon" compounds: Naphthalene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, and Anthracene. The LPAH criterion is not the sum of the criteria values for the individual LPAH compounds as listed.
- 4 The HPAH criterion represents the sum of the following "high molecular weight polynuclear aromatic hydrocarbon" compounds: Fluoranthene, Pyrene, Benz(a)anthracene, Chrysene, Total Benzofluoranthenes, Benzo(a)pyrene, Indeno(1,2,3-c,d)pyrene, Dibenzo(a,h)anthracene, and Benzo(g,h,i)perylene. The HPAH criterion is not the sum of the criteria values for the individual HPAH compounds as listed.
- 5 The TOTAL BENZOFUORANTHENES criterion is applicable to the sum of the concentrations of the "B," "J," and "K" isomers.

(3) Puget Sound marine sediment cleanup screening levels and minimum cleanup level biological criteria. The biological effects criteria of this subsection establish the Puget Sound marine sediment cleanup screening level, and the Puget Sound marine sediment minimum cleanup level criteria.

(a) The acute and chronic effects biological tests of WAC 173-204-315(1) shall be used to:

(i) Identify the Puget Sound marine sediment cleanup screening level for the purpose of screening sediment station clusters of potential concern using the procedures of WAC 173-204-510(2); and

(ii) Identify the Puget Sound marine sediment cleanup screening level for the purpose of identifying station clusters of low concern and/or cleanup sites using the hazard assessment procedures of WAC 173-204-530(5); and/or

(iii) Identify the Puget Sound marine sediment minimum cleanup level to confirm minimum cleanup level determinations using the procedures of WAC 173-204-570(3).

(b) When using biological testing to determine if station clusters exceed the cleanup screening level or to identify the minimum cleanup level for a contaminated site, test results from at least two acute effects tests and one chronic effects test shall be evaluated.

(c) The biological tests shall not be considered valid unless test results for the appropriate control and reference sediment samples meet the performance standards described in WAC 173-204-315(2).

(d) The cleanup screening level and minimum cleanup level is exceeded when any two of the biological tests exceed the criteria of WAC 173-204-320(3); or one of the following test determinations is made:

(i) Amphipod: The test sample has a higher, statistically significant (t test, $p \leq 0.05$) mean mortality than the reference sample and the test mean mortality is more than thirty percent higher than the reference mean mortality, on an absolute basis.

(ii) Larval: The test sample has a mean survivorship of normal larvae that is less (statistically significant, t test, $p \leq 0.05$) than the mean normal survivorship in the reference sediment sample and the test mean normal survivorship is less than seventy percent of the mean normal survivorship in the reference sample (i.e., the test sample has a mean combined abnormality and mortality that is greater than thirty percent relative to time-final in the reference sample).

(iii) Benthic abundance: The test sediment has less than fifty percent of the reference sediment mean abundance of any two of the following major taxa: Crustacea, Mollusca or Polychaeta and the test sample abundances are statistically different (t test, $p \leq 0.05$) from the reference abundances.

(iv) Worm: The test sediment has a mean biomass of less than fifty percent of the reference mean biomass and the test biomass is statistically different (t test, $p \leq 0.05$) from the reference biomass.

(4) Puget Sound marine sediment cleanup screening levels and minimum cleanup levels human health criteria. The department may determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

(5) Puget Sound marine sediment cleanup screening levels and minimum cleanup levels other toxic, radioactive, biological, or deleterious substances criteria. Other toxic, radioactive, biological, or deleterious substances in, or on, surface sediments shall be at or below levels which cause minor adverse effects in marine biological resources, or which correspond to a significant health risk to humans, as determined by the department. The department shall determine on a case-by-case basis the criteria, methods, and procedures necessary to meet the intent of this subsection and this chapter.

(6) Puget Sound marine sediment cleanup screening levels and minimum cleanup levels nonanthropogenically affected sediment criteria. Whenever the nonanthropogenically affected surface sediment quality is of a lower quality (i.e., higher chemical concentrations or adverse biological response) than the applicable cleanup screening levels or minimum cleanup levels criteria established under this section, the existing surface sediment chemical and biological quality shall be identified on an area-wide basis as determined by the department, and used in place of the standards of WAC 173-204-520.

NEW SECTION

(2) Hazard assessment requirements. Onsite dischargers, lessees, landowners, and adjacent dischargers shall submit, upon the department's request, all existing and available information that would enable the department to:

(a) Determine the concentration and/or areal extent and depth of surface sediment contamination at the station cluster of potential concern by:

(i) Identifying the contaminants exceeding the applicable sediment quality standards of WAC 173-204-320 through 173-204-340;

(ii) Identifying individual stations within the station cluster of potential concern which exceed the sediment cleanup screening levels criteria of WAC 173-204-520;

(iii) Identifying the level of toxicity to the applicable biological test organisms of WAC 173-204-320 through 173-204-340;

(iv) Determining where the applicable sediment quality standards of WAC 173-204-320 through 173-204-340, for any given contaminant, is met;

(v) Determining if concentrations of chemicals exist that potentially present a significant threat to human health;

(vi) Defining the location where the minimum cleanup level as defined in WAC 173-204-570 is met.

(c) Identifying the location of sediment impact zones authorized under WAC 173-204-415.

(d) Identifying sensitive resources in the vicinity of the station cluster of potential concern.

(e) Providing other information as determined necessary by the department for ranking sites under WAC 173-204-540.

(3) The department shall also compile existing and available information from other federal, state, and local governments that pertain to the topics in subsection (2) of this section.

(4) In evaluating station clusters of potential concern which include any area within a sediment impact zone authorized under WAC 173-204-415 that meets the standards of WAC 173-204-420, or a sediment recovery zone authorized under WAC 173-204-590, the department shall not consider the contaminant concentration and biological effects contribution attributable to the authorized or previously authorized sediment impact or sediment recovery zone in making the cleanup site determinations of subsection (5) of this section.

(5) The department shall use information gathered from the hazard assessment standards of this section to evaluate station clusters of potential concern to identify cleanup sites as follows:

(a) Station clusters of potential concern for which the area-weighted average chemical concentrations do not exceed the cleanup screening level chemical criteria of Table III shall be defined as station clusters of low concern except as provided in (d) of this subsection.

(b) Station clusters of potential concern for which any area-weighted average chemical concentration exceeds the cleanup screening level chemical criteria of Table III shall be defined as cleanup sites, except as provided in (c) of this subsection.

(c) Station clusters of potential concern where the level of biological effects for the same three stations used to identify the area-weighted

average chemical concentration identified in (b) of this subsection do not exceed the cleanup screening levels of WAC 173-204-520(3) shall be defined as station clusters of low concern.

(d) Station clusters of potential concern where the level of biological effects for any three stations within the station cluster of potential concern exceeds the cleanup screening levels of WAC 173-204-520(3) shall be defined as cleanup sites.

(e) Station clusters of potential concern where the department determines that any three stations within the station cluster of potential concern exceed the sediment cleanup screening levels human health criteria or the other toxic, radioactive, biological, or deleterious substances criteria or the nonanthropogenically affected criteria of WAC 173-204-520, shall be defined as cleanup sites.

NEW SECTION

WAC 173-204-540 RANKING AND LIST OF SITES. (1) Purpose. The department shall prepare and maintain a list of contaminated sediment sites in the order of their relative hazard ranking. From this list, the department shall select sites where action shall be taken.

(2) Site ranking. The department shall evaluate each site identified by the procedures in WAC 173-204-530 on a consistent basis using the procedure described in Sediment Ranking System ("SEDRAK"), January 1990, and all additions and revisions thereto or other procedures approved by the department. The purpose of ranking is to estimate, based on technical information compiled during the hazard assessment procedures in WAC 173-204-530, the relative potential risk posed by the site to human health and the environment. Information obtained during hazard assessment, plus any additional data specified in "SEDRAK," shall be included in the site hazard ranking evaluation.

(3) Considerations in ranking. In conducting surface sediment site ranking, the department shall assess both human health hazard and ecological hazard, and consider chemical toxicity, affected resources, and site characteristics for both types of hazards. The department shall also use best professional judgment and other information as necessary on a case-by-case basis to conduct site ranking.

(4) Site reranking. The department may, at its discretion, rerank a site. To rerank a site, the department shall use any additional information within the scope of the hazard ranking evaluation criteria and best professional judgment to establish that a significant change in rank should result.

(5) List of ranked sites.

(a) Contaminated sediment sites that are ranked via "SEDRAK" shall be placed on a list in the order of their relative hazard ranking. The list shall describe the current status of cleanup action at each site and be updated on an annual basis. The department may change a site's status to reflect current conditions on a more frequent basis. The status for each site shall be identified as one of the following:

- (i) Sites awaiting cleanup action;
- (ii) Sites with cleanup action in progress;
- (iii) Sites where a cleanup action has been completed and confirmational monitoring is underway;
- (iv) Sites where department initiated, voluntary, incidental or partial cleanup actions, as defined in WAC 173-204-550, are in progress, or have been completed and confirmational monitoring is underway;
- (v) Sites with sediment recovery zones authorized under WAC 173-204-590; and/or
- (vi) Other categories established by the department.

(b) The department shall routinely publish and make the list available to be used in conjunction with a review of ongoing and proposed regulatory actions to determine where and when a cleanup action should be taken. The department shall also make the list available to landowners and dischargers at or near listed sites, and to the public.

(6) Site delisting.

(a) The department may remove a site from the list only after it has determined that:

(i) All cleanup actions have been completed and compliance with the site cleanup study and report and cleanup standard(s) has been achieved; or

(ii) The listing of the site was erroneous.

(b) A site owner or operator may request that a site be removed from the list by submitting a petition to the department. The petition shall state the reason for the site delisting request, and as determined appropriate by the department, shall include thorough documentation of all investigations performed, all cleanup actions taken, and all compliance monitoring data and results to demonstrate to the department's satisfaction that the site cleanup standards have been achieved. The

department may require payment of costs incurred, including an advance deposit, for review and verification of the work performed. The department shall review such petitions, however the timing of the review shall be at its discretion and as resources may allow.

(c) The department shall maintain a record of sites that have been removed from the list under (a) of this subsection. This record shall be made available to the public on request.

(7) Relisting of sites. The department may relist a site which has previously been removed if it determines that the site requires further cleanup action.

(8) Delisting notice. The department shall provide public notice and an opportunity to comment when the department proposes to remove a site from the list.

NEW SECTION

WAC 173-204-550 TYPES OF CLEANUP AND AUTHORITY. (1) Purpose. The department acknowledges that cleanups of contaminated sediment sites can occur under the authority of chapter 90.48 or 70.105D RCW. This section describes the department's role in department initiated and other cleanup actions.

(2) The department shall use best professional judgment and other information as necessary on a case-by-case basis to decide the appropriate administrative authority to cite to require contaminated sediment cleanup actions based on but not limited to the following considerations:

(a) Source of contaminants requiring cleanup including spills, dredging actions, and wastewater and/or stormwater discharges;

(b) Significance of contamination threat to human health and the environment including the degree of contamination and types and number of contaminants;

(c) Public perception concerning the contaminant threat to human health and the environment;

(d) Personal or corporate financial status of the landowner(s) and/or discharger(s);

(e) Enforcement compliance history of the landowner(s) and/or discharger(s);

(f) Status of existing or pending federal, state, or local legal orders or administrative actions; and

(g) Size of cleanup action proposed or determined necessary.

(3) The types of cleanup actions below establish scenarios recognized by the department which may occur to effect cleanup of contaminated sediment sites. All of these types of cleanup actions shall be subject to administrative review and approval of the department under chapters 90.48 and/or 70.105D RCW.

(a) Department initiated cleanup. Department initiated cleanup actions occur when the department uses its authority under chapter 90.48 and/or 70.105D RCW to conduct or require and/or otherwise effect cleanup to meet the intent of this chapter.

(b) Voluntary cleanup. Voluntary cleanup actions are initiated by parties other than the department. The department shall encourage voluntary cleanup actions whenever possible, and as early as possible, to meet the intent of this chapter.

(c) Incidental cleanup. Incidental cleanup actions are conducted when other state or federally permitted activities are ongoing in and/or around the contaminated sediment site. Early coordination of incidental cleanup actions with the department is encouraged to meet the intent of this chapter, chapter 70.105D RCW, and chapter 90.48 RCW, as appropriate.

(d) Partial cleanup. Partial cleanup actions may be conducted when completion of cleanup study requirements under WAC 173-204-560 has identified and proposed discrete site units and cleanup standards, the department has approved the selection of the partial cleanup alternative per the standards of WAC 173-204-580, and the department has determined that awaiting action or decision on conducting a complete site cleanup would have a net detrimental effect on the environment or human health.

NEW SECTION

WAC 173-204-560 CLEANUP STUDY. (1) Purpose. This section describes cleanup study plan and report standards which meet the intent of cleanup actions required under authority of chapter 90.48 and/or 70.105D RCW, and/or this chapter. Cleanup actions required under authority of chapter 70.105D RCW shall also meet all cleanup study plan and reporting standards of chapter 173-340 WAC, the Model Toxics Control Act cleanup regulation. Cleanup study plan and

report standards include activities to collect, develop, and evaluate sufficient information to enable consideration of cleanup alternatives and selection of a site-specific sediment cleanup standard prior to making a cleanup decision. Each person performing a cleanup action to meet the intent of this chapter shall submit a cleanup study plan and cleanup study report to the department for review and written approval prior to implementation of the cleanup action.

(2) Scope of cleanup study plan. The scope of a cleanup study plan shall depend on the specific site informational needs, the site hazard ranking, the type of cleanup action proposed, and the authority cited by the department to require cleanup. In all cases sufficient information must be collected, developed, and evaluated to enable the appropriate selection of a cleanup standard under WAC 173-204-570 and a cleanup action decision under WAC 173-204-580. The scope of sediment cleanup study plan is described by the following subjects:

- (a) Public information/education;
- (b) Site investigation and cleanup alternatives evaluation;
- (c) Sampling plan and recordkeeping; and
- (d) Site safety.

(3) Cleanup study plan public information/education requirements. The cleanup study plan should encourage coordinated and effective public involvement commensurate with the nature of the proposed cleanup action, the level of public concern, and the existence of, or potential for adverse effects on biological resources and/or a threat to human health. The cleanup study plan should address proposed activities for the following subjects:

(a) When public notice will occur, the length of the comment periods accompanying each notice, the potentially affected vicinity, and any other areas to be provided notice;

(b) Where public information repositories will be located to provide site information to the public;

(c) Methods for identifying the public's concerns, e.g., interviews, questionnaires, community group meetings, etc.;

(d) Methods for providing information to the public, e.g., press releases, public meetings, fact sheets, etc.;

(e) Coordination of public participation requirements mandated by other federal, state, or local laws;

(f) Amendments to the planned public involvement activities; and

(g) Any other elements that the department determines to be appropriate for inclusion in the cleanup study plan.

(4) Cleanup study plan site investigation and cleanup alternatives evaluation requirements. The content of the cleanup study plan for the site investigation and cleanup alternatives evaluation is determined by the type of cleanup action selected as defined under WAC 173-204-550. As determined by the department, the cleanup study plan should address the following subjects:

(a) General site information. General information, including: Project title; name, address, and phone number of project coordinator; legal description of the cleanup site; area and volume dimensions of the site; present owners and operators of contaminant source discharges to site; chronological listing of past owners and operators of contaminant source discharges to the site and their respective operational history; and other pertinent information determined by the department.

(b) Site conditions map. An existing site conditions map which illustrates site features as follows:

(i) Property boundaries.

(ii) The site boundary defined by the individual contaminants exceeding the applicable sediment quality standards of WAC 173-204-320 through 173-204-340 at the point where the concentration of the contaminant would meet the:

(A) Cleanup objective; and

(B) Minimum cleanup level; and

(C) Recommended cleanup standards.

(iii) Surface and subsurface topography.

(iv) Surface and subsurface structures.

(v) Utility lines.

(vi) Navigation lanes.

(vii) Other pertinent information determined by the department.

(c) Site investigation. Sufficient investigation to characterize the distribution of surface sediment contamination present at the site, and the threat or potential threat to human health and the environment. Where applicable to the site, these investigations shall address the following:

(i) Surface water and sediments. Investigations of surface water hydrodynamics and sediment transport mechanisms to characterize significant hydrologic features such as: Site surface water drainage patterns, quantities and flow rates, areas of sediment erosion and deposition, and actual or potential contaminant migration routes to and from the site and within the site. Sufficient surface water and surface sediment sampling shall be performed to adequately characterize the areal and vertical distribution and concentrations of contaminants. In evaluating sediment contamination which includes any area within a sediment impact zone authorized under WAC 173-204-415 that meets the standards of WAC 173-204-400 through 173-204-420, or a sediment recovery zone authorized under WAC 173-204-590, the department shall not consider the contaminant concentration and biological effects contribution attributable to the authorized or previously authorized sediment impact or sediment recovery zone in making site investigation and cleanup alternatives evaluation determinations per the standards of this section. Properties of surface sediments which are likely to influence the type and rate of contaminant migration, or are likely to affect the ability to implement alternative cleanup actions shall be characterized;

(ii) Geology and ground water system characteristics. Investigations of site geology and hydrogeology to adequately characterize the physical properties and distribution of surface sediment types, and the characteristics of ground water flow rate, ground water gradient, ground water discharge areas, and ground water quality data which may affect site cleanup alternatives evaluations;

(iii) Climate. Information regarding local and regional climatological characteristics which are likely to affect surface water hydrodynamics, ground water flow characteristics, and migration of surface sediment contaminants such as: Seasonal patterns of rainfall; the magnitude and frequency of significant storm events; prevailing wind direction and velocity;

(iv) Land use. Information characterizing human populations exposed or potentially exposed to surface sediment contaminants released from the site and present and proposed uses and zoning for shoreline areas contiguous with the site; and

(v) Natural resources and ecology. Information to determine the impact or potential impact of surface sediment contaminants from the site on natural resources and ecology of the area such as: Sensitive environment, local and regional habitat, plant and animal species, and other environmental receptors.

(d) Sediment contaminant sources. A description of the location, quantity, areal and vertical extent, concentration and sources of active and inactive waste disposal and other surface sediment contaminant discharge sources which affect or potentially affect the site. Where determined relevant by the department, the following information shall be provided:

(i) The physical and chemical characteristics, and the biological effects of site surface sediment contaminants sources;

(ii) The status of source control actions for permitted and unpermitted site surface sediment contaminant sources; and

(iii) A recommended compliance time frame for known permitted and unpermitted site surface sediment contaminant sources which affect or potentially affect implementation of the timing and scope of the site cleanup action alternatives.

(e) Human health risk assessment. The current and potential threats to human health that may be posed by surface sediment site contamination shall be evaluated using a risk assessment procedure approved by the department.

(f) Cleanup action alternatives. Each cleanup study plan shall include an evaluation of alternative cleanup actions that protect human health and the environment by eliminating, reducing, or otherwise controlling risks posed through each exposure pathway and migration route. The number and types of alternatives to be evaluated shall take into account the characteristics and complexity of the site.

(i) The proposed site cleanup alternatives may include establishment of site units, as defined in WAC 173-204-200(21), with individual cleanup standards within the range required by WAC 173-204-570, based on site physical characteristics and complexity, and cleanup standard alternatives established on consideration of cost, technical feasibility, or net environmental impact.

(ii) The proposed site cleanup alternatives may include establishment of a sediment recovery zone as authorized under WAC 173-204-590, Sediment recovery zones. Establishment or expansion of a sediment recovery zone shall not be used as a substitute for active cleanup actions, when such actions are practicable and meet the standards of

WAC 173-204-580. The cleanup study plan shall include the following information for evaluation of sediment recovery zone alternatives:

(A) The time period during which a sediment recovery zone is projected to be necessary based on source loading and net environmental recovery processes;

(B) The legal location and landowner(s) of property proposed as a sediment recovery zone;

(C) Proposed monitoring actions for discharge effluent and/or receiving water column and/or surface sediment chemical monitoring studies and/or bioassays to evaluate ongoing water quality, surface sediment quality, and biological conditions within and adjacent to the proposed or authorized sediment recovery zone to confirm source loading and recovery rates in the proposed sediment recovery zone.

(D) Potential risks posed by the proposed sediment recovery zone to human health and the environment;

(E) The technical practicability of elimination or reduction of the site and/or degree of chemical contamination and/or level of biological effects within the proposed sediment recovery zone; and

(F) Current and potential use of the sediment recovery zone, surrounding areas, and associated resources that are, or may be, affected by releases from the zone.

(iii) A phased approach for evaluation of alternatives may be required for certain sites, including an initial screening of alternatives to reduce the number of potential remedies for the final detailed evaluation. The final evaluation of cleanup action alternatives that pass the initial screening shall consider the following factors:

(A) Overall protection of human health and the environment, time required to attain the cleanup standard(s), and on-site and off-site environmental impacts and risks to human health resulting from implementing the cleanup alternatives;

(B) Attainment of the cleanup standard(s) and compliance with applicable federal, state, and local laws;

(C) Short-term effectiveness, including protection of human health and the environment during construction and implementation of the alternative;

(D) Long-term effectiveness, including degree of certainty that the alternative will be successful, long-term reliability, magnitude of residual human health risk, and effectiveness of controls for ongoing discharges and/or controls required to manage treatment residues or remaining wastes;

(g) Ability to be implemented. The ability to be implemented including the potential for landowner approval, consideration of technical feasibility, availability of needed off-site facilities, services and materials, administrative and regulatory requirements, scheduling, monitoring requirements, access for construction, operations and monitoring, and integration with existing facility operations and other current or potential cleanup actions;

(h) Cost, including consideration of present and future direct and indirect capital, operation, and maintenance costs and other foreseeable costs;

(i) The degree to which community concerns are addressed;

(j) The degree to which recycling, reuse, and waste minimization are employed; and

(k) Environmental impact. Sufficient information shall be provided to fulfill the requirements of chapter 43.21C RCW, the State Environmental Policy Act. Discussions of significant short-term and long-term environmental impacts, significant irrevocable commitments of natural resources, significant alternatives including mitigation measures, and significant environmental impacts which cannot be mitigated should be included.

(5) Cleanup study plan — sampling plan and recordkeeping requirements. The cleanup study plan shall address proposed sampling and recordkeeping activities to meet the standards of WAC 173-204-600, Sampling and testing standards, and WAC 173-204-610, Records management, and the standards of this section.

(6) Cleanup study plan site safety requirements. The cleanup study plan should address proposed activities to meet the requirements of the Occupational Safety and Health Act of 1970 (29 U.S.C. Sec. 651 et seq.) and the Washington Industrial Safety and Health Act (chapter 49.17 RCW), and regulations promulgated pursuant thereto. These requirements are subject to enforcement by the designated federal and state agencies. Actions taken by the department under this chapter do not constitute an exercise of statutory authority within the meaning of section (4)(b)(1) of the Occupational Safety and Health Act.

(7) Cleanup study report. Each person performing a cleanup action to meet the intent of this chapter shall submit a cleanup study report to the department for review and written administrative authorization

of a cleanup decision prior to implementation of the cleanup action. The sediment cleanup study report should include the results of cleanup study site investigations conducted pursuant to subsection (4) of this section, and preferred and alternate cleanup action proposals based on the results of the approved cleanup study plan.

NEW SECTION

WAC 173-204-570 SEDIMENT CLEANUP STANDARDS.

(1) Applicability and purpose. This section establishes the sediment cleanup standards requirements for cleanup actions required under authority of chapter 90.48 and/or 70.105D RCW, and/or this chapter, and describes the process to determine site-specific cleanup standards.

(2) Cleanup objective. The sediment cleanup objective shall be to eliminate adverse effects on biological resources and significant health threats to humans from surface sediment contamination. The sediment cleanup objective for all cleanup actions shall be the sediment quality standards as defined in WAC 173-204-320 through 173-204-340, as applicable. The sediment cleanup objective identifies surface sediments that have no acute or chronic adverse effects on biological resources, and which correspond to no significant health risk to humans, as defined in this chapter.

(3) Minimum cleanup level. The minimum cleanup level is the maximum allowed chemical concentration and level of biological effects permissible at the cleanup site to be achieved by year ten after completion of the active cleanup action.

(a) The minimum cleanup levels criteria of WAC 173-204-520 shall be used in evaluation of cleanup alternatives per the procedures of WAC 173-204-560, and selection of a site cleanup standard(s) per the procedures of this section.

(b) The Puget Sound marine sediment minimum cleanup level is established by the following:

(i) Surface sediments with chemical concentrations at or below the chemical criteria of Table III shall be determined to meet the minimum cleanup level, except as provided in (b)(iv) of this subsection; and

(ii) Surface sediments with chemical concentrations that are higher than the chemical criteria of Table III shall be determined to exceed the minimum cleanup level, except as provided in (b)(iii) of this subsection; and

(iii) Surface sediments with biological effects that do not exceed the levels of WAC 173-204-520(3) shall be determined to meet the minimum cleanup level; and

(iv) Surface sediments with biological effects that exceed the levels of WAC 173-204-520(3) shall be determined to exceed the minimum cleanup level; and

(v) Surface sediments which exceed the sediment minimum cleanup level human health criteria or the other toxic, radioactive, biological, or deleterious substances criteria or the nonanthropogenically affected criteria of WAC 173-204-520 as determined by the department, shall be determined to exceed the minimum cleanup level.

(4) Sediment cleanup standard. The sediment cleanup standards are established on a site-specific basis within an allowable range of contamination. The lower end of the range is the sediment cleanup objective as defined in subsection (2) of this section. The upper end of the range is the minimum cleanup level as defined in subsection (3) of this section. The site specific cleanup standards shall be as close as practicable to the cleanup objective but in no case shall exceed the minimum cleanup level. For any given cleanup action, either a site-specific sediment cleanup standard shall be defined, or multiple site unit sediment cleanup standards shall be defined. In all cases, the cleanup standards shall be defined in consideration of the net environmental effects (including the potential for natural recovery of the sediments over time) cost, and engineering feasibility of different cleanup alternatives, as determined through the cleanup study plan and report standards of WAC 173-204-560.

(5) All cleanup standards must ensure protection of human health and the environment, and must meet all legally applicable federal, state, and local requirements.

NEW SECTION

WAC 173-204-580 CLEANUP ACTION DECISION. (1) Each person performing a cleanup action to meet the intent of this chapter shall comply with the standards of WAC 173-204-560(7), Cleanup study report. The department shall review each cleanup study report and issue a written approval of one or more of the cleanup action alternatives described in the cleanup study report, or issue a written disapproval of all alternatives described in the cleanup study report. The

department's approval of one or more cleanup study report cleanup action alternatives shall constitute the cleanup decision and shall be issued under one or more permit or administrative authorities established under chapter 90.48 or 70.105D RCW, Section 401 of the federal Clean Water Act, chapter 173-225 WAC, establishment of implementation procedures of application for certification, or other administrative authorities available to the department. The department's disapproval of all cleanup study report cleanup action alternatives shall be issued by certified mail, return receipt requested, to the cleanup action proponent(s). All cleanup actions conducted under this chapter shall meet the following requirements:

(a) Receive department review and written approval of the preferred and/or alternate cleanup actions and necessary sediment recovery zones proposed in the cleanup study report prior to implementing a cleanup action(s);

(b) Achieve a degree of cleanup that is protective of human health and the environment;

(c) Address the requirements of applicable state, federal, and local laws;

(d) Provide for landowner review of the cleanup study plan and report, and obtain written landowners approval of the proposed active cleanup action, except for any authorized sediment recovery zone, prior to implementation of the cleanup action;

(e) Provide adequate monitoring to ensure the effectiveness of the cleanup action;

(f) Be appropriate for conditions and circumstances at the site;

(g) Achieve compliance with the site cleanup standards.

(2) In all cases, the cleanup action decision shall consider the net environmental effects (including the potential for natural recovery of the sediments over time) cost, and engineering feasibility of different cleanup alternatives. The site cleanup action decision shall give preference to selection of a cleanup alternative as close as practicable to the cleanup objective at the end of the cleanup action. But, in no case shall the selected cleanup alternative exceed the minimum cleanup level, i.e., the maximum allowed chemical concentration and level of biological effects permissible at the cleanup site at year ten after completion of the active cleanup action.

(3) Public participation. The department shall provide opportunity for public review and comment on all cleanup action study plans, reports, and decisions reviewed and approved by the department, for cleanup actions conducted under this chapter.

NEW SECTION

WAC 173-204-590 SEDIMENT RECOVERY ZONES. (1) The purpose of this section is to set forth the requirements for establishment and monitoring of sediment recovery zones to meet the intent of sediment quality dilution zones authorized pursuant to RCW 90.48-.520. The standards of this section are applicable to cleanup action decisions made pursuant to WAC 173-204-580 where selected actions leave in place marine, low salinity, or freshwater sediments that exceed the applicable sediment quality standards of WAC 173-204-320 through 173-204-340.

(2) General requirements. Authorization of a sediment recovery zone by the department shall require compliance with the following general requirements:

(a) The department shall provide specific authorization for a sediment recovery zone within the written approval of the cleanup study report and cleanup decision required under WAC 173-204-580.

(b) The time period during which a sediment recovery zone is authorized by the department shall be so stated in the department's written approval of the cleanup study report and cleanup decision.

(c) The department's written sediment recovery zone authorization shall identify the legal location and landowners of property proposed as a sediment recovery zone.

(d) Operational terms and conditions for the authorized sediment recovery zone shall be maintained at all times.

(3) A sediment recovery zone authorization issued by the department under the authority of chapter 90.48 or 70.105D RCW, or other administrative means available to the department, does not constitute authorization to trespass on lands not owned by the applicant. These requirements do not address, and in no way alter, the legal rights, responsibilities, or liabilities of the permittee or landowner of the sediment recovery zone for any applicable requirements of proprietary, real estate, tort, and/or other laws not directly expressed as a requirement of this chapter.

(4) Prior to authorization, the department shall make a reasonable effort to identify and notify all landowners affected by the proposed

sediment recovery zone. The department shall issue a sediment recovery zone notification letter to any person it believes to be a potentially affected landowner and other parties determined appropriate by the department. The notification letter shall be sent by certified mail, return receipt requested, or by personal service. The notification letter shall provide:

(a) The name of the person the department believes to be the affected landowner; and

(b) The names of other affected landowners to whom the department has sent a proposed sediment recovery zone notification letter; and

(c) The name of the sediment recovery zone applicant; and

(d) A general description of the proposed sediment recovery zone including the chemical(s) of concern by name and concentration, and the area of affected sediment; and

(e) The determination of the department concerning whether the proposed sediment recovery zone application meets the standards of this section; and

(f) The intention of the department whether to authorize the proposed sediment recovery zone; and

(g) Notification that the affected landowner may comment on the proposed sediment recovery zone. Any landowner comments shall be submitted in writing to the department within thirty days from the date of receipt of the notification letter, unless the department provides an extension.

(5) As determined by the department, operational terms and conditions for the sediment recovery zone may include completion and submittal to the department of discharge effluent and/or receiving water column and/or surface sediment chemical monitoring studies and/or bioassays to evaluate ongoing water quality, surface sediment quality, and biological conditions within and adjacent to the proposed or authorized sediment recovery zone.

(6) The department shall review monitoring conducted in accordance with a sediment recovery zone authorization to ensure compliance with the terms and conditions of the authorization and the standards of this section. Whenever, in the opinion of the department, the operational terms and conditions of a sediment recovery zone or the standards of this section are violated or there is a potential to violate the sediment recovery zone authorization or the standards of this section, or new information or a reexamination of existing information indicates the sediment recovery zone is no longer appropriate, the department may at its discretion:

(a) Require additional chemical or biological monitoring as necessary;

(b) Revise the sediment recovery zone authorization as necessary to meet the standards of this section;

(c) Require active contaminated sediment maintenance actions including additional cleanup in accordance with the standards of WAC 173-204-500 through 173-204-580; and/or

(d) Withdraw the department's authorization of the sediment recovery zone.

PART VI—SAMPLING PLANS/RECORDKEEPING

(c) Any person who samples surface sediments consistent with cleanup action plans approved and cleanup actions conducted under this chapter.

(2) All applicable persons shall at a minimum, develop, keep, and abide by a sediment sampling plan. The sampling plan shall be available for inspection at the request of the department. Sediment sampling plans shall identify sampling dates, sample types, sample depths, sample composites, sample locations, sample positioning methods, sampling personnel, sampling equipment and methods, and quality assurance/quality control sampling procedures.

(3) Sediment sampling locations and procedures and testing protocols and interpretations shall be those included in the Puget Sound protocols as amended and required in this chapter, and/or other methods approved by the department.

(4) The department reserves the right to revise these sampling and testing protocols when:

- (a) The Puget Sound protocols are modified or updated per the approval of the department; or
 (b) The department determines the Puget Sound protocols are not applicable to, or appropriate for analysis of surface sediment chemical contamination.

NEW SECTION

(a) Any person who samples surface sediments to determine compliance with this chapter;

(b) Any person who makes application to the department for authorization of a sediment impact zone under the standards of WAC 173-204-400 through 173-204-420.

(2) All applicable persons shall keep sediment sampling records as follows:

(a) Sediment sampling plans which identify sampling dates, sample types, sample composites, sample locations, sample depths, sample positioning method, sampling personnel, sampling equipment and methods, quality assurance/quality control plans, and sampling procedures.

(3) All sediment records as required under subsection (2) of this section must be furnished upon request, and made available at all reasonable times for inspection, by any officer, employee, or representative of the department who is designated by the director.

(4) All sediment records as required in this section shall be maintained for a period not less than ten years after the issuance, modification, or renewal of the applicable permit, or administrative order, or certification, or cleanup site delisting under WAC 173-204-540(6), whichever is greater.

NEW SECTION

WAC 173-204-620 SEVERABILITY. If any provision of this chapter or its application to any person or circumstance is held invalid, the remainder of this chapter or the application of the provision to other persons or circumstances shall not be affected.

The majority of the entire board shall pass on the licensing of a pilot and licenses shall be signed by the chairperson. All applicants shall have and display a United States Government Masters License and a first class United States endorsement without restrictions on that license to pilot in whichever pilotage district the applicant desires a license. In addition all applicants shall have and display an endorsement to their masters license issued by the United States Coast Guard certifying competence as a radar observer.

(2) Prior to commencing familiarization trips, and the pilot training program, if applicable, an applicant must pass a written and oral examination given and graded by the board. The board will conduct such examinations for both pilotage districts during the month of April in each odd-numbered year. Notice of the examination shall be published four months in advance by one paid advertisement in a major newspaper and written notice to one radio station, one television station, United Press International, and the Associated Press, as well as all pilots licensed by the board and all operators registered with the board. Applications will be accepted by the board immediately following the publication of the notice of the examination. The board may, in an emergency, call for an immediate examination on less than four months notice.

(a) The examination may be taken by all qualified applicants who:

(i) Have had a license application on file with the board for at least one month prior to the examination. (This requirement may be waived upon the showing of good cause;)

In this program applicants shall be required to pilot vessels under the supervision of Puget Sound pilots with more than five years experience. Upon written request by an applicant to the board, the five years' experience requirement for the supervisory pilot may be waived in certain instances. After every such assignment the supervisory pilots shall fill out, on a form provided by the board, an evaluation of the applicant's performance. After completion of the training period, the board shall evaluate the applicant's performance in shiphandling skills on the basis of these forms and other relevant information and decide whether the applicant should be licensed. Dependent on the applicant's

experience level and grade of license, applicants in this training program shall pilot under such supervision for a minimum period of four months and seventy-five assignments and a maximum period of six months and one hundred assignments.

PERMANENT RULES
DEPARTMENT OF WILDLIFE
(Wildlife Commission)

[Order 458—Filed September 18, 1990, 4:20 p.m.]

Date of Adoption: August 4, 1990.

Purpose: The purpose of this regulation is to establish rules for issuing licenses. Any person under the age of 18 must provide proof they have successfully completed an approved hunter education course to obtain a license to hunt. The regulation specifies the form of information required to be provided by juvenile applicants for a hunting license. Currently juvenile hunters must show their hunter education certificate each year when purchasing a hunting license. The agency hunter education staff issues approximately 1,500 duplicate certificates each year, the majority of which are issued during the months of July through September. The proposed change would allow juvenile hunters to purchase a hunting license by showing either a valid hunter education certificate or a Washington hunting license for the previous year containing the hunter education certificate number issued to that person. This change would eliminate an unnecessary burden and inconvenience to agency staff, vendors and license applicants.

Citation of Existing Rules Affected by this Order: Amending WAC 232-12-227.

Statutory Authority for Adoption: RCW 77.32.050 and 77.32.070.

Pursuant to notice filed as WSR 90-12-099 on June 5, 1990.

Effective Date of Rule: Thirty-one days after filing.

AMENDATORY SECTION (Amending Order 260, filed 7/25/85)

WAC 232-12-227 HUNTER EDUCATION TRAINING PROGRAM REQUIREMENTS. (1) The director may designate a state coordinator for the purpose of administering the hunter education program. The state coordinator shall be responsible for the certification of volunteer instructors and the development of instructional materials, training aids, operating policies and procedures necessary to comply with the provisions of this section and RCW 77.32.155.

(2) It is unlawful for any person under the age of eighteen to obtain a hunting license in the state of Washington without having completed a department-approved course involving at least ten hours of instruction in conservation, safety and sportsmanship.

(3) Upon satisfactory completion of these requirements, each student shall be issued a certificate of accreditation signed by an authorized instructor or the ~~((designated))~~ state coordinator.

(4) It is unlawful for a license dealer to issue a hunting license for a person under eighteen years of age unless a hunter education certificate or a Washington hunting license for the preceding year containing the hunter education certificate number issued to said person is presented at the time of purchase.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

DEPARTMENT OF FISHERIES

[Order 90-99—Filed September 18, 1990, 4:32 p.m.]

Date of Adoption: September 18, 1990.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order: Repealing WAC 220-33-01000P.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Harvestable numbers of Columbia River upriver bright fall chinook are available and Bonneville Pool chinook have cleared the area. This regulation is adopted at the recommendation of the September 17, 1990, Columbia River Compact.

Effective Date of Rule: Immediately.

Summary: See Purpose above.

Reasons Supporting Proposal: To establish rules for Instant Game Nos. 59 and 60.

Name of Agency Personnel Responsible for Drafting: Jeff Burkhardt, Contracts Specialist, Olympia, 586-

6583; Implementation and Enforcement: Evelyn Y. Sun, Director, Olympia, 753-3330.

Name of Proponent: Washington State Lottery Commission, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: WAC 315-11-590, 315-11-591, 315-11-592, 315-11-600, 315-11-601 and 315-11-602, for each game certain terms must be defined in order to provide consistency in the game play rules. The play criteria will explain how the game functions to licensed retailers and players. Rigid validation requirements are set forth which will prevent the lottery from paying out prize money on invalid tickets.

Proposal does not change existing rules.

No small business economic impact statement is required for this proposal by chapter 19.85 RCW.

The lottery has considered whether this rule is subject to the Regulatory Fairness Act, chapter 19.85 RCW, and has determined that it is not for the following reasons: The rules have no economic impact on business' cost of equipment, supplies, labor, or administrative costs. The rules are designed to establish rules and procedures for the playing of instant lottery games; and the rules will have a negligible impact, if any, on business because they are interpretive. They have been promulgated for the purpose of stating policy, procedure and practice and do not include requirements for forms, fees, appearances, or other actions by business.

Hearing Location: Washington State Lottery, Regional Office, 5963 Corson Avenue South, #106, Seattle, WA 98108, on November 2, 1990, at 10:00 a.m.

GOVERNOR'S TIMBER TEAM

[Filed September 19, 1990, 9:52 a.m.]

Reviser's note: The following material has not been adopted under the Administrative Procedure Act, chapter 34.05 RCW, but has been

(g) Timber Definitions: Unprocessed timber includes trees or portions of trees or other roundwood not processed to standards and specifications suitable for end product use.

2. Lumber, construction timbers, or cants for remanufacture, except Western Red Cedar, meeting current American Lumber Standards grades or Pacific Lumber Inspection Bureau Export R or N list clear grades, sawn on 4 sides, not to exceed 12 inches in thickness.

3. Lumber, construction timbers, or cants for remanufacture, except Western Red Cedar, that do not meet the grades referred to in clause 1 and are sawn on 4 sides, with wan less than 1/4 of any face, not exceeding 8 3/4 inches in thickness.

8. Aspen or other pulpwood bolts, not exceeding 100 inches in length, exported for processing into pulp.

9. Pulp logs or cull logs processed at domestic pulp mills, domestic chip plants, or other domestic operations for the purpose conversion of the logs into chips.

SECTION 2. . Purchaser Restrictions

Unprocessed Timber from sales on public land designated as "export restricted" may not be: (1) exported from the United States (2) used in substitution for unprocessed timber from private lands which is exported by the purchaser (3) sold, traded, exchanged, or otherwise given to any other person for the purpose exporting such unprocessed timber from the United States. Timber which has been determined to be surplus to the needs of timber manufacturing facilities in the United States by the Secretary of Commerce of the United States by rule is not subject to this regulation

Except as specifically provided in these regulations, no person may purchase from any other person unprocessed timber from an "export restricted" timber sale if such person would have been prohibited because of the substitution prohibition, from purchasing such timber directly.

The substitution prohibitions in these regulations do not prohibit the resale by processors qualified to purchase timber from "export restricted" timber sales of incidental quantities of unprocessed timber from an "export restricted" timber sale to any processor who operates a domestic processing facility and will process the timber obtained through such indirect transaction at the facility. The Washington Department of Revenue shall be notified in writing of such transaction prior to any transportation of the timber. The amount of timber involved in such transactions may not total more than 25% of the volume of unprocessed timber from any timber sale

Agencies contracting for the sale of "export restricted" timber from public land shall include in such contracts clauses incorporating the substitution and debarment provisions of these regulations.

SECTION 3. . Coverage

These regulations shall apply to timber sold from public lands in the State of Washington

Each agency managing public lands subject to these regulations shall, prior to January 1 of each calendar year commencing with 1991, designate which timber sales to be sold in the forth-coming calendar year will be "export restricted" and which sales will not be so designated. Each agency shall designate as "export restricted" sales that include at least 75% of the volume of the annual sales program. Sales designated as "export restricted" will be distributed proportionately through out the geographical area of land owned or managed by the agency. In addition, prospective sales designated as "export restricted" will be so designated to insure that the species and grade distribution of these sales is representative of the sale program as a whole of the agency. The designation of sales as "export restricted" by any agency managing public land in the State of Washington shall be subject to review and approval by the Washington Department of Revenue prior January 1 of each calendar year.

In the event that prospective sales designated as "export restricted" are not offered for sale or not sold in the calendar year planned, substitute sales will be designated as "export restricted" to insure that 75% of the sale volume for the year is included in "export restricted" sales.

Designation of sales as "export restricted" or not will be on a sale by sale basis and will normally apply to the entire sale being considered. Subdivision of the sale into portions that are "export restricted" and not restricted may be allowed if there are insufficient sales in the annual program to insure that designation on a sale by sale basis meets per cent, distribution, species and grade requirements of the Forest Resources Conservation and Shortage Relief Act of 1990 (P.L. 101-382)

SECTION 4. . Reporting Requirements

Each purchaser shall designate in Writing to the agency managing the sale program the names and addresses of the processing plants at which timber from "export restricted" sales will be processed. In the event that the purchaser sells or otherwise disposes of timber from an "export restricted" sale to a party who does not intend to process the timber directly, the purchaser shall obtain the name and address of the intended processor from the third party and furnish this information to the agency managing the sale program.

Prior to delivering unprocessed timber from an "export restricted" sale to another party, the purchaser shall secure from each buyer, exchangee, or recipient a written agreement which shall: (1) specify domestic processing for the unprocessed timber, (2) require the execution of the same agreement between the parties involved in any subsequent transactions of the unprocessed timber, (3) require that hammer brands and yellow paint remain on logs until they are domestically processed.

A copy of this agreement shall be furnished by the purchaser within five days of receipt to the Washington Department of Natural Resources or other agency managing the public land on which the timber was sold who will in turn submit a copy to the Washington Department of Revenue.

SECTION 5. . Debarment

A purchaser who exports timber or sells timber for the purpose of export to another party from an "export restricted" sale shall be barred from bidding on or purchasing export restricted timber from any governmental agency covered by these regulations for a period of two years following the date of export of the export restricted timber. A second violation of the export prohibition by the same person shall result in a permanent debarment of the purchaser from purchasing timber from any government agency covered by these regulations.

SECTION 6. . Log Branding and Marking Requirements

All unprocessed timber from timber sales on lands of State and other public agencies covered by these regulations shall be branded with an assigned and registered sale brand before removal from the sale area. Both ends of all logs on those sales designated as "export restricted" shall be hammer branded and both ends shall be painted with durable yellow paint.

If properly marked unprocessed timber is subdivided into smaller pieces for any purpose other than immediate processing, each piece must be marked in the same manner as the original timber.

SECTION 7. . Administration

Administration of these regulation shall be the responsibility of the Washington Department of Revenue.

When violations of the export prohibition provisions of these regulations are confirmed by the Department of Revenue, the Department of Natural Resources or other managing agency shall be informed immediately so that the debarment provisions provided in these regulations may be implemented. Surveillance of unprocessed timber in transit and at port facilities may be contracted by the Department of Revenue to other appropriate state or federal agencies.

Reviser's note: The typographical errors in the above material occurred in the copy filed by the Governor's Timber Team and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 88-07, filed 6/1/88)

WAC 296-15-030 (~~POSTING OF SECURITY~~) SURETY REQUIREMENT. Subsections (1)(~~(-2), (-3)~~) through (6) and (~~(7)~~) (9) through (11) of this section shall apply only to individual self-insurers except counties, cities, school districts, municipal corporations, and individual accounts participating in (~~(a)~~) group self-insurance programs. Subsection (~~(6)~~) (8) of this section shall apply only to counties, cities, municipal corporations, and school districts not participating in (~~(a)~~) group self-insurance programs. Group self-insurance programs are subject to subsection (7) of this section and reserve requirements set forth in WAC 296-15-02601(3) and 296-15-02605(~~(-in lieu of application of this section)~~). Subsection (12) of this section applies to all self-insurers.

(1) Upon ~~((receiving a completed))~~ approval of an application for certification to self-insure, the director shall review the matter and notify the employer of the amount of ~~((security which must be deposited))~~ surety which must be provided to secure the payment of compensation and assessments, pursuant to RCW 51.14.020 as now or hereafter amended. This amount as so established may be satisfied by the employer's supplying of ~~((money))~~ cash, corporate or governmental securities approved by the director, or a ~~((surety))~~ bond, written by a company admitted to transact surety business in this state, in favor of the department. ~~((All such))~~ A self-insurer with a net worth of not less than five hundred million dollars may also provide surety in the form of an irrevocable standby letter of credit issued by a federally or state chartered commercial bank authorized to conduct business in this state. Cash and securities of a self-insurer shall be deposited with an escrow agent ~~((appointed))~~ approved by the director and administered pursuant to a written agreement between the department, the self-insurer and the escrow agent. Cash and securities shall be registered in the name of the escrow agent on behalf of the self-insurer. The originals of all surety ~~((bonds))~~ documents submitted by self-insurers ~~((following approval))~~ after acceptance by the director ~~((and the attorney general))~~ will be kept on file in the department.

(2) ~~((On or after July 1, 1985,))~~ The minimum amount of ~~((security))~~ surety required for initial certification as a self-insurer shall be the projected average current cost of a permanent total disability claim ~~((for an injury occurring during the first year after the employer's self-insuring,))~~ including medical, time-loss, pension reserve, and any other miscellaneous claim costs paid prior to award of the pension. This average cost shall be calculated by the department on an annual basis.

The ~~((security))~~ surety required for initial certification as a self-insurer ~~((on or after July 1, 1985,))~~ may be greater than the minimum amount described above. In establishing such ~~((security))~~ surety requirements, the department shall estimate the following amounts:

(a) The estimated amount of accident and medical aid fund premium that the self-insurer would have paid to the state fund during the first year of self-insurance, if it had remained in the state fund.

(b) The estimated amount of incurred benefits for the first year of self-insurance, based on past experience with the state fund, adjusted for intervening changes in benefit schedules and exposure.

If either or both of the above amounts exceed the minimum ~~((security deposit))~~ surety requirement described in this section, the department ~~((may))~~ will require the larger of (a) or (b) of this subsection as ~~((a security deposit))~~ the surety requirement for initial certification as a self-insurer ~~((on or after July 1, 1985,))~~.

(c) Provided that, the initial surety requirement for a self-insurer may be based on an estimate of the expected average annual incurred losses, made by an independent qualified actuary.

(d) ~~((The initial surety requirement for a self-insurer may be based upon an estimate of the expected average annual incurred losses, net of expected payments during the first year, made by an independent actuary, provided:~~

(i) ~~That the applicant self-insurer agrees in writing to provide the department with an estimate of the outstanding liability made by an independent actuary within sixty days of the end of each calendar year of certification, through the first full three years of self-insurance; and~~

(ii) ~~That the applicant self-insurer agrees in writing that if an estimate from an independent actuary is not provided as indicated in (d) of this subsection, the department, each year, will automatically increase the self-insurers' surety requirement by the amount of its average annual incurred losses estimated at the time of certification.)~~ The ~~((security))~~ surety required in accordance with the above procedures may be adjusted by the department if there are other known conditions which may alter the self-insurer's potential claim costs and/or its ability to pay them.

(3) ~~((The amount of security required of each self-insurer shall be reviewed periodically by the director to determine if there is need for any increase or decrease thereof.))~~ The surety requirement for each self-insurer will be subject to review and increased or decreased at such times as the director deems necessary to maintain the adequacy of these requirements. To facilitate this review a self-insurer's annual report (SIF #7) shall be required in the form prescribed by the director and supplied to all self-insurers.

~~((Security))~~ Surety requirements ~~((in effect on, or initially established after, July 1, 1985,))~~ shall not be increased unless and until one or more of the following conditions are met:

(a) An estimate of the self-insurer's outstanding claim liabilities, made by either the self-insured employer or the department, exceeds the amount of ~~((security))~~ surety in force; or

(b) The projected average current cost of a permanent total pension claim ~~((for an injury in the current year,))~~ including medical, time-loss, pension reserve, and any other miscellaneous claim costs paid prior to award of the pension, exceeds the ~~((security))~~ surety in force for the employer by ~~((one hundred))~~ twenty-five thousand dollars or more.

(4) ~~((The following procedure shall apply for purposes of updating security requirements:~~

(a) On July 1, 1985, the security requirement for each self-insurer shall be the larger of the following two amounts:

(i) The existing security in force for the self-insurer, or

(ii) The self-insurer's stated estimate of outstanding claim liabilities as shown on the 1984 self-insurer's annual report (SIF #7).

(b) On July 1, 1986, the security requirement for each self-insurer shall be the larger of the following amounts:

(i) The existing security in force for the self-insurer, or

(ii) The average of the self-insurer's stated estimate of outstanding claim liabilities as shown on the 1985 self-insurer's annual report (SIF #7) and the department's estimate of the self-insurer's outstanding claim liabilities as of December 31, 1985, made in accordance with provisions of (c) of this subsection; or

(iii) The minimum security requirement.

(c) On July 1, 1987, the security requirement for each self-insurer shall be the larger of the following amounts:

(i) The existing security in force for the self-insurer, or

(ii) The department's estimate of the self-insurer's outstanding claim liabilities as of December 31, 1986, made in accordance with provisions of (c) of this subsection; or

(iii) The minimum security requirement.

(d) After July 1, 1987, the security requirement for each self-insurer will be subject to review and increased or decreased at such times as the director deems necessary to maintain the adequacy of those requirements. Such review and adjustment, when made, shall be performed in accordance with provisions of (c) of this subsection.

(e) In establishing or adjusting security requirements for a self-insurer, the department may perform a runoff test of the adequacy of the employer's estimates of liabilities, by tracking the subsequent cost of claims (subsequent payments plus the employer's updated estimates of remaining liabilities). If the subsequent costs do not exceed original liability estimates, the employer's most recent estimates of claim liabilities shall be considered adequate for purposes of setting current security requirements for the employer.

If the runoff test shows that subsequent costs of claims exceed the employer's original estimates of outstanding liabilities, the department may apply a loss development factor to the employer's most recent estimates of claim liabilities to compensate for anticipated repetition of inadequate estimates. The loss development factor shall be based on the self-insured employer's experience.) In determining the surety requirement after the initial three years of certification, the department will make an analysis of the self-insurer's history of loss development. The analysis will provide average factors for each period of loss development by measuring historical changes in incurred losses. These factors will be applied to reported incurred liabilities for each accident year to arrive at the expected total incurred liability. The estimated remaining incurred liability, at a given calendar year end, will be the result of subtraction of claims payments made to date.

(a) The following special considerations shall apply in ~~((establishing or))~~ adjusting ~~((security))~~ surety requirements for a self-insurer:

(i) Pension claims - Reserve amounts attributable to death or permanent total disability claims independently secured by means of a ~~((surety))~~ bond or assignment of account, and which are included in estimates of outstanding claim liabilities as shown on the self-insurer's annual report (SIF #7), shall be deducted from estimates of outstanding claim liabilities made in accordance with other provisions of this section.

(ii) Reinsurance - Anticipated recoveries under reinsurance policies held by a self-insurer must be documented by the self-insurer and reported to the department to qualify for consideration in establishing ~~((security))~~ surety requirements. Such anticipated recoveries shall be applied to either the self-insurer's estimate of outstanding claim liabilities as shown on the most current self-insurer's annual report (SIF #7) or the department's estimate of the self-insurer's outstanding liabilities made in accordance with ~~((e) of)~~ this ~~((subsection))~~ rule, whichever is greater. If the resulting estimate of claim liabilities net of reinsurance recoveries is less than the ~~((security))~~ surety requirement~~((s))~~ imposed by this ~~((section))~~ rule without adjustment for reinsurance, the ~~((security))~~ surety requirement shall be reduced

accordingly; provided, that ((security)) surety requirement(s) imposed upon initial certification of a self-insurer or ((based upon the projected average cost of a permanent total pension claim)) the minimum surety requirement may be retained by the department regardless of other estimates of claim liabilities for the self-insurer.

(iii) Strict application of loss development factors based upon the ((runoff test)) loss development analysis presumes a consistency of reserving methodology and results for the self-insurer. If the department determines that an employer has changed its reserving methodology in such a way as to invalidate loss development factors based upon past experience, then the department shall make such adjustments to the procedure as it may deem appropriate under the circumstances.

(iv) The department will give ((full)) due consideration to any ((evaluation)) estimate of the self-insured employer's outstanding claim liabilities made by an independent qualified actuary. Such independent actuarial ((evaluations)) estimates are optional and not required by this rule.

((ff)) (b) Any changes to the existing ((bonds and/or adjustments to bond amounts made by or)) surety required ((of a self-insurer on or after)) by the department based on the loss development analysis shall be due by July 1((; 1985;)) of each year and shall provide adequate ((security)) surety for all self-insured workers' compensation liabilities of the employer, regardless of when ((the claims giving rise to)) those liabilities were incurred. ((Changes contemplated by this subsection include, but are not limited to, designation of a new surety carrier, issuance of a replacement bond by a current surety carrier, and/or revision of the face amount of any bond whether by endorsement or issuance of a replacement bond. If a new surety carrier does not assume full responsibility for all past self-insured liabilities regardless of when incurred, the department may require that such liabilities be secured by other means:))

(5) Surety must be submitted on a department-approved form. This form requires coverage of all past, present, and future liabilities. The only exceptions which would allow coverage from the effective date forward are the self-insurer's initial surety or surety which continues coverage provided by other cancelled surety. If a bond is provided in an amount equal to the self-insurer's current surety requirement, on a department-approved form covering all liabilities, all other surety will be released. The department will have sole authority to determine in which order surety is used in the event of a default.

(6) When an employer surrenders its certificate to self-insure, it must continue to provide surety at the level determined by the department. The Annual Report of Self-Insured Business (SIF #7) must continue to be filed as long as quarterly reporting is required. A bond existing at the time of surrender of certificate may be cancelled, but it continues to provide surety for claims occurring prior to its cancellation. Any increase in surety required must be in the form of cash or securities deposited into an escrow account if a bond or letter of credit cannot be provided. All surety will be held until there is no further possibility of benefit payments.

(7) A self-insurer's annual report (SIF #7) shall be required of group self-insurance ((plans, m)) programs on the form ((prescribed by the director and)) supplied ((to all group self-insurance plans)) by the department.

((6) On January 1, 1987, the security)) (8) The surety requirement for counties, cities, school districts, and municipal corporations shall provide for sufficient revenues to satisfy one hundred percent of the estimated claims for the succeeding fiscal ((year. The county, city, school district, or municipal corporation shall provide a cumulative reserve fund comprised of governmental securities, surety bonds, or any legal source of funding, equal to no less than twenty-five percent of the estimated claims payments for the succeeding fiscal year, to satisfy unforeseen claims obligations. PROVIDED, That)) period. The minimum security requirement shall be one hundred thousand dollars. ((If a jurisdiction's cumulative reserve fund as of the effective date of this section is not at the required level, it shall annually increase the amount of such fund by no less than one-fourth of the difference between the amount of such fund as of January 1, 1987, and the required level of such cumulative reserve fund:)) In addition, a cumulative reserve of not less than twenty-five percent of the surety requirement must also be established. This cumulative reserve may be in the form of a bond, cash or securities in an escrow account, or any acceptable legal source of funding.

By ((February)) July 1 of each year, each county, city, school district, or municipal corporation shall certify ((in writing to the department, the security requirements, specifying the source, or sources, of revenues including securities, bonds, anticipated insurance recoveries,

or other moneys. A copy of the officially adopted budget that sets forth the fund or funds, and the accounts as required by the state auditor's budget accounting reporting system to meet the minimum security requirement, expenses, and liabilities of industrial insurance shall be available to the department. Security)), on a form supplied by the department, its estimated claims liability and the revenues to meet those obligations. Documentation must be provided showing the estimated claims liabilities, the source(s) of revenues, and detailing accounts identified for the self-insurance obligations. Documentation of the cumulative reserve must specify the type of funding and reflect the account balance. Surety requirements for governmental units shall be subject to ((an annual)) a periodic review by the department.

(9) An employer meeting the financial requirements specified in RCW 51.14.020(2) may provide the department with an irrevocable standby letter of credit to satisfy the surety requirement specified for its self-insurance obligations. An employer using a letter of credit must provide the department with a memorandum of understanding, on a form supplied by the department, agreeing to the following conditions:

(a) The letter of credit providing surety for the self-insurer's workers' compensation claims liability will cover all past, present, and future liability of the self-insurer regardless of any date of injury.

(b) Unless the department is notified otherwise, by registered mail at least sixty days prior to its expiration date, the letter of credit will be automatically extended without amendment for an additional one-year period.

(c) The self-insurer may substitute a bond and/or cash or securities deposited into an escrow account, in an amount designated by the department, as replacement for the letter of credit.

(d) If the department is notified that the letter of credit will not be renewed and no acceptable replacement surety is provided within thirty days of receipt of such notice, the department will draw the full value of the letter of credit. All proceeds of the letter of credit will be deposited with the accident fund under a subsidiary ledger account. Accrued interest in excess of the self-insurer's surety requirement will be returned semiannually. If the self-insurer provides acceptable replacement surety at a later date, the proceeds will be returned.

(e) If, in addition to not providing replacement surety for a non-renewed letter of credit, the self-insurer then defaults on payment of its workers' compensation liabilities, the proceeds of the letter of credit previously deposited with the accident fund and the accrued interest will be used to provide for payment of the self-insurer's workers' compensation liabilities.

(f) If the self-insurer's letter of credit remains in force and the self-insurer defaults on the payment of its workers' compensation liabilities, the department will draw the full value of the letter of credit. The proceeds will be deposited and accounted for as indicated in (d) of this subsection and, with the accrued interest, used to provide for payment of the self-insurer's workers' compensation liabilities.

(g) Legal proceedings initiated by any party with respect to the letter of credit shall be subject to the courts and laws of the state of Washington.

(10) Letters of credit provided by self-insurers as surety are subject to acceptance by the department. Acceptance will include, but not be limited to, approval of the financial condition of the banking institution issuing the letter of credit.

(a) A bank must provide to the department an audited financial statement or call report made to the banking regulatory agencies for the most recent fiscal year. The financial information from such banks must be provided with the letter of credit and annually during the period that the letter of credit is in effect.

(b) A letter of credit will not be accepted if the amount of the credit exceeds the legal limit allowed to the bank.

(c) A letter of credit will not be accepted unless the issuing bank is able to accept presentation of drawings on the credit at an office in this state.

(11) Letters of credit and any amendments to letters of credit must be on forms supplied by the department. The department's interest in a letter of credit will be released if the self-insurer provides a bond or acceptable cash or securities deposited into an escrow account in the amount required by the department.

(12) Failure to provide active surety in the amount required by the department will result in the withdrawal of certification.

PROPOSED RULES
OFFICE OF
INSURANCE COMMISSIONER
[Filed September 19, 1990, 3:25 p.m.]

Original Notice.

Title of Rule: Licensing requirements for licensees who maintain more than one place of business in the state.

Purpose: To require that where an insurance agent or broker operates out of more than one place of business in Washington, there must be an adequate number of properly licensed individuals at each location.

Other Identifying Information: Insurance Commissioner Matter No. R 90-12.

Statutory Authority for Adoption: RCW 48.02.060 (3)(a).

Statute Being Implemented: RCW 48.05.140, 48.17.060, 48.17.180, 48.17.490, 48.17.530 and 48.30.010.

Summary: Insurance licensing requirements currently allow a single licensed insurance agent to have an unlimited number of branches, with the requirement that still only one individual insurance agent be affiliated with the organization. This proposed regulation requires that agents with multiple locations affiliate at least one individual agent per branch which conducts insurance business, and that such individual agent be physically present at the branches during the time such location is open for insurance business to the same extent as is expected of an agent operating at a single location. Brokers conducting business through multiple locations are similarly treated. A failure to comply with this regulation shall be an unfair practice pursuant to RCW 48.30.010 (affecting all persons engaged in the business of insurance) and a violation of a regulation pursuant to RCW 48.17.530 (affecting agents and brokers) and RCW 48.05.140 (affecting insurers).

Reasons Supporting Proposal: The primary reason for this proposal is to ensure that only properly licensed individual insurance agents and brokers conduct insurance business at each location.

Name of Agency Personnel Responsible for Drafting: Patricia D. Petersen, Insurance Building, Olympia, Washington (206) 586-5591; Implementation and Enforcement: Roger Polzin, Insurance Building, Olympia, Washington, (206) 753-2403.

Name of Proponent: Dick Marquardt, Insurance Commissioner, governmental.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: Insurance licensing requirements currently allow a single licensed insurance agent to have an unlimited number of branches, with the requirement that still only one individual insurance agent be affiliated with the organization. This proposed regulation requires that agents with multiple locations affiliate at least one individual agent per branch which conducts insurance business, and that such individual agents be physically present at the branches during the time such location is open for insurance business to the same extent as is expected of an agent operating at a single location. Brokers conducting business through multiple locations are similarly treated.

Proposal does not change existing rules.

Small Business Economic Impact Statement: This proposed regulation would have no economic effect on either small or large businesses, as it only clarifies existing law. Businesses should already be in compliance with this proposed rule.

WSR 90-19-118
PROPOSED RULES
UTILITIES AND TRANSPORTATION
COMMISSION

[Filed September 19, 1990, 4:40 p.m.]

Original Notice.

Title of Rule: WAC 480-120-021, 480-120-106, 480-120-138 and 480-120-141, relating to telecommunication companies, the glossary, alternate operator services, pay telephones and form of bills. The proposed amendatory sections are shown below as Appendix A, Docket No. UT-900726. Written and/or oral submissions may also contain data, views and arguments concerning the effect of the proposed amendatory sections on economic values, pursuant to chapter 43.21H RCW.

Other Identifying Information: See Explanation of Rule below.

Statutory Authority for Adoption: RCW 80.01.040.

Statute Being Implemented: Chapter 80.36 RCW.

Summary: See Explanation of Rule below.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Paul Curl, Secretary and Commission Staff, 1300 South Evergreen Park Drive S.W., Olympia, WA, (206) 753-6451.

Name of Proponent: Washington Utilities and Transportation Commission, governmental.

Agency Comments or Recommendations, if any, as to Statutory Language, Implementation, Enforcement, and Fiscal Matters: There are no comments or recommendations being submitted inasmuch as the proposal is pursuant to legislative authorization as reflected in RCW 80.01.040.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: These rule changes expand the AOS definition to include operator service to any pay phone and clarify other terminology; set forth duties of the local exchange company in regard to AOS portions of its bill and provide for updating of listing of telecommunication companies for which the billing agent bills; limit charges from pay phones for directory assistance; require that users of pay phones be allowed free access to all inter-exchange access and to all 1-800 numbers; exempt services to prisoners from compliance with rules inconsistent with pertinent law; set forth contract requirements between AOS providers and customers; require certain notifications on the phone line and on the phone instrument of pay phones; and restrict certain AOS charges.

Proposal Changes the Following Existing Rules: See Explanation of Rule above.

Small Business Economic Impact Statement: The following constitutes the commission's best estimate of costs that could be developed in the short time available. Parties are requested to provide comment and additional analysis on these costs. In addition, the commission intends to continue to evaluate the cost of compliance and reserves the right to amend this statement as more definitive data becomes available

This analysis attempts to estimate the cost per hundred dollars of sales of compliance with proposed rules for telecommunications companies in Docket No. UT-900726 regarding alternate operator services, and pay telephones. This type of analysis is required under chapter 19.85 RCW if a proposed rule will have an economic impact on more than ten percent of all of the businesses in this state in any one three digit standard industrial classification. It is assumed that the proposed rules in Docket No. UT-900726 do have an economic impact on more than ten percent of the businesses in the standard industry classification for telephone companies (481). It is estimated that there are at least 50 pay telephone companies and about 17 alternate operator service companies in the state, for a total of at least 67 businesses impacted by the proposed rule. Therefore, there would have to be more than 670 businesses in Washington that fall within the 481 standard industry classification. That classification includes LECs, IXCs, paging, radiotelephone, and cellular companies.

RCW 19.85.040 states the purpose and content requirements of a small business economic impact statement (SBEIS). The purpose is to analyze the impact of the cost of compliance on the ten smallest businesses and compare that with the impact on the ten largest businesses of the cost of compliance. The analysis uses the cost per hundred dollars of sales measure.

The proposed amendments to rules have impacts on approximately five cost variables for alternate operator service companies. First, such companies must maintain and file written contracts or master contracts. Second, they may have to retrofit equipment to comply with new identification, reorigination, and blocking requirements. Third, they must provide additional information on notices posted at each instrument served. Fourth, they must put both their name and their billing agent's name on consumer's bill. Fifth, new companies are constrained from surcharges greater than \$0.25 per call, and from charging more than prevailing rates per-call for director assistance.

1. Written contracts for AOS service are typically already used, so it shouldn't cost anything extra to comply with the proposed rule which requires written contracts. Filing a written contract or a master contract will require approximately 1 hour of clerical work at say \$12/hour. Mailing, and materials will cost another dollar it is estimated. Estimated total cost of compliance is \$13 per written contract or master contract. It is assumed that these costs do not vary between large companies and small companies. A small company will have either one master contract or approximately 50 individual contracts. The large company will likewise have either one master contract, or an estimated 2,000 individual contracts. It seems fair to assume that the option to file a master contract will be chosen.

2. The proposed rule adds the requirement that both the provider of service and the billing agent's name be provided at the beginning of every call (branding). For small companies using automated technology it can be expected to cost approximately \$300 per instrument to update the equipment. There is not any additional per

call cost to the small company to comply. It is estimated that the small company will have approximately fifty instruments. For large companies compliance can be achieved by training operators in the new procedure, and having them take the extra 10 seconds or so to make the requisite announcement at the beginning of each call. It is estimated that operators are paid \$20 per hour, and it will take less than one hour to train them. It is estimated that the large company handles one million calls per year, and has 200 operators. The proposed rule requires that an operator be able to reoriginate a call for a consumer using the carrier of the consumer's choice. For a small company using automated technology it is not possible to comply with this part of the rule without handing the call over to the live operator. Of course, since it is already assumed that the consumer wants to use a different carrier, there is only the expense of routing the call to a live operator, which costs nothing extra, they should already be able to do that. For a large company the costs of compliance must be similar to the cost of training operators to announce the provider of service and billing agent's names. The proposed rule prohibits blocking of access to other carriers and 1-800 numbers. Small companies will have to spend an estimated \$300 per instrument to comply, large companies can comply without additional expense.

3. The proposed rule requires additional information to be posted on each instrument served. It is estimated that 10,000 notices can be printed and posted for approximately \$5,000. That works out to fifty cents per notice, installed. This is not assumed to vary between large and small companies. It is assumed that a small company will require 100 notices, large companies 10,000.

4. The proposed rule requires both the service provider's name and the billing agent's name on the consumer's bill. It is estimated that it will cost \$10,000,000 for local exchange companies to implement this requirement in their billing systems. That expense then will be passed on to the service provider. It is estimated that it currently costs \$1.00 per message for billing and collection. It is estimated that the pass through of the additional expense incurred by the local exchange company will translate into approximately \$0.10 per message extra expense, regardless of the size of the business. It is assumed that a small company will handle 140,000 calls. This assumption is based upon an actual small company's annual income of \$558,629 where it is assumed that the average revenue per call is \$4.00.

5. The proposed rules restrict surcharges to \$0.25 per call. Small and large companies surcharge an estimated average of \$0.75 per call now, so they will lose an estimated \$0.50 per call. The rule restricts directory assistance charges to prevailing rates which are \$0.25 per intraLATA request, and \$0.75 per interLATA request. The average cost for a small business of a directory assistance call is assumed to be \$0.60 per directory assistance call of any kind, and for the large business it is assumed to be the prevailing rate. Therefore, there is no

impact on the large business. It is assumed that the small business will handle approximately 14,000 directory assistance requests, one fourth of which are assumed to be interLATA.

SUMMARY

Reorigination, small business – no extra cost.
 Reorigination, large business – train 200 operators, for one hour each, \$20.00 per hour. Total \$4,000.

Nonblocking requirement – small company with fifty phones and \$300 expense per phone. \$15,000 total.

WAC 480-120-106 FORM OF BILLS. Bills to subscribers shall be rendered regularly and shall clearly list all charges. Each bill shall indicate the date it becomes delinquent and notice of means by which a subscriber can contact the nearest business office of the utility.

The portion of a bill rendered by the local exchange company on behalf of itself and other companies shall clearly specify the provider of the service ((or)) and its authorized billing agent, and a toll free telephone number the consumer can call to question that portion of the bill and, if appropriate, receive credit. The local exchange company's number may be used on this portion of the bill only if it has full authority to investigate and, if appropriate, adjust disputed calls including a means to verify that the rates charged are correct. Consumers requesting an address where they can write to question that portion of the bill shall be provided that information.

A local exchange company shall not provide billing and collection services for telecommunications service to any company not properly registered to provide service within the state of Washington, except to a billing agent that certifies to the local exchange carrier that it will submit charges only on behalf of properly registered companies. As a part of this certification the local exchange company shall require that the billing agent provide to it a current list of each telecommunications company for which it bills showing the name (as registered with the commission) and address. This list shall be updated and provided to the local exchange company as changes occur. The local exchange company shall in turn, upon receiving it, provide a copy of this list to the commission for its review.

All bills for telephone service shall identify and set out separately any access or other charges imposed by order of or at the direction of the Federal Communications Commission. In addition, all bills for telephone service within jurisdictions where taxes are applicable will clearly delineate the amount, or the percentage rate at which said tax is computed, which represents municipal occupation, business and excise taxes that have been levied by a municipality against said utility, the effect of which is passed on as a part of the charge for telephone service.

An itemized statement is meant to include separately, the total for exchange service, mileage charges, taxes, credits, miscellaneous or special services and toll charges, the latter showing at least date, place called and charge for each call. In itemizing the charges of information providers, the utility shall furnish the name, address, telephone number and toll free number, if any, of such providers. Any additional itemization shall be at a filed tariff charge.

Upon a showing of good cause, a subscriber may request to be allowed to pay by a certain date which is not the normally designated payment date. Good cause shall include, but not be limited to, adjustment of the payment schedule to parallel receipt of income. A utility may be exempted from this adjustment requirement by the commission.

AMENDATORY SECTION (Amending Order R-316, filed 3/23/90)

WAC 480-120-138 PAY TELEPHONES—LOCAL AND INTRASTATE. Every telecommunications company operating an exchange within the state of Washington may allow pay telephones to be connected to the company's network for purposes of interconnection and use of registered devices for local and intrastate communications. Every such telecommunications company offering such service shall file tariffs with the commission setting rates and conditions applicable to the connection of pay telephones to the local and intrastate network under the following terms and conditions. Local exchange companies that do not have a public access line tariff on file with the commission shall not be subject to these rules.

For purposes of these rules "pay telephone" is defined as equipment connected to the telephone network in one of the following modes:

- (a) Coin operated: A telephone capable of receiving nickels, dimes, and quarters to complete telephone calls. Credit card or other operator-assisted billing may be used from a coin-operated instrument.

(b) Coinless: A pay telephone where completion of calls, except emergency calls, must be billed by an alternative billing method such as credit card, calling cards, third-party billing, or billed in connection with the billing of meals, goods, and/or services. These pay phones include, but are not limited to, charge-a-call, cordless, tabletop, and credit card stations.

For purposes of these rules, the term "subscriber" is defined as a party requesting or using a public access line for the purpose of connecting a pay telephone to the telephone network.

(1) Pay telephones connected to the company network must comply with Part 68 of the Federal Communications Commission rules and regulations and the current National Electric Code and National Electric Safety Code, and must be registered with the Federal Communications Commission, or installed behind a coupling device which has been registered with the Federal Communications Commission.

(2) All pay telephones shall provide dial tone first to assure emergency access to operators without the use of a coin.

(3) The caller must be able to access the operator and 911 where available without the use of a coin.

(4) ~~((The subscriber shall pay the local directory assistance charge currently in effect for each pay telephone and may charge the user for directory assistance calls.))~~ The charge for each directory assistance call paid by the user shall not exceed the current prevailing per call charge ~~((paid by the subscriber)).~~ In the absence of persuasive contrary evidence, the charge of U S WEST Communications for intraLATA directory assistance or AT&T for interLATA directory assistance shall be accepted as the prevailing charge.

(5) Emergency numbers (e.g., operator assistance and 911) must be clearly posted on each pay telephone.

(6) Information consisting of the name, address, telephone number of the owner, or the name of the owner and a toll-free telephone number where a caller can obtain assistance in the event the pay telephone malfunctions in any way, and procedures for obtaining a refund from the subscriber must be displayed on the front of the pay telephone.

The following information shall also be posted on or adjacent to the telephone instrument:

(a) "An accurate quotation of all rates and surcharges is available to the user by dialing '0' and requesting costs"; and

(b) The notice required by WAC 480-120-141(1).

In no case will the charges to the user exceed the quoted costs.

(7) The telephone number of the pay telephone must be displayed on each instrument.

(8) The subscriber shall ensure that the pay telephone is compatible for use with hearing aids and its installation complies with all applicable federal, state, and local laws and regulations concerning the use of telephones by disabled persons.

(9) The pay telephone, if coin operated, must return the coins to the caller in the case of an incomplete call and must be capable of receiving nickels, dimes, and quarters. Local exchange company pay telephones shall not be subject to the requirements of this subsection.

(10) All pay telephones must be capable of providing access to all interexchange carriers where such access is available. If requested by the subscriber, the local exchange company providing the public access line shall supply restriction, where available, which prevents fraud to the 10XXX 1+ codes, at appropriate tariffed rates.

(11) Except for service provided to hospitals, libraries, or similar public facilities in which a telephone ring might cause undue disturbance, or upon written request of a law enforcement agency, coin-operated pay telephones must provide two-way service, and there shall be no charge imposed by the subscriber for incoming calls. This subsection will not apply to pay telephones arranged for one-way service and in service on May 1, 1990. Should an existing one-way service be disconnected, change telephone number, or change financial responsibility, the requirements of this subsection shall apply. All pay telephones confined to one-way service shall be clearly marked on the front of the instrument.

(12) Pay telephones shall be connected only to public access lines in accordance with the approved tariffs offered by the local exchange company. Local exchange company pay telephones are not subject to this requirement.

The local exchange company shall not maintain a connection to a public access line for any pay phone:

(a) That does not allow users without-charge access to all available interexchange carriers; or

(b) That does not allow users without-charge access to 1-800 numbers.

(13) A subscriber must order a separate pay telephone access line for each pay telephone installed. Extension telephones may be connected to a pay telephone access line when the instrument:

(a) Prevents origination of calls from the extension station; and

(b) Prevents third party access to transmission from either the extension ~~((of))~~ or the coin-operated telephone instrument.

Local exchange companies are exempted from (b) of this subsection.

(14) Credit card operated pay telephones shall clearly identify all credit cards that will be accepted.

(15) Involuntary changes in telephone numbers upon conversion of pay telephones from local exchange company-owned to privately-owned pay telephones are prohibited.

(16) No fee shall be charged for nonpublished numbers on a public access line.

(17) Cordless and tabletop pay telephones shall not be connected to the telephone network except under the following conditions:

(a) The bill for usage is tendered to the user before leaving the premises where the bill was incurred or alternatively billed at the customer's request; and

(b) The user is notified verbally or on the instrument that privacy on cordless and tabletop telephones is not guaranteed; and

(c) When other electrical devices are equipped with filters, as necessary, to prevent interference with the pay telephone.

(18) Violations of the tariff, commission rules pertaining to pay telephone service, or other requirements contained in these rules will subject pay telephone to disconnection of service if the deficiency is not corrected within five days from date of written notification to the subscriber. WAC 480-120-081 (4)(g) shall not apply to such disconnections.

It shall be the responsibility of every local exchange company to assure that any subscriber taking service pursuant to these rules and to tariffs filed pursuant to these rules meets all of the terms and conditions contained within these rules and the tariffs so filed. It shall be the duty of the local exchange company to enforce the terms and conditions contained herein.

It shall be the responsibility of the local exchange company to provide free of charge one current telephone directory each year for each public access line. It shall be the responsibility of the subscriber to make a reasonable effort to assure a current directory is available at every pay telephone location.

Public access lines will be charged at rates according to the relevant tariff as approved by the commission.

AMENDATORY SECTION (Amending Order R-293, filed 1/31/89)

WAC 480-120-141 ALTERNATE OPERATOR SERVICES. All telecommunications companies providing alternate operator services (AOS), as defined in WAC 480-120-021, shall ~~((conform to))~~ comply with this and all other rules relating to telecommunications companies not specifically waived by order of the commission. ~~((Alternate operator services companies (AOS) are those with which a hotel, motel, hospital, prison, campus, customer-owned pay telephone, etc., contracts to provide operator services to its clientele.))~~ Alternate operator service provided to the inmates of state or local penal or correctional facilities or jails are exempt from compliance with the provisions of any rule inconsistent with RCW 9.73.095 or an equivalent ordinance, so long as the charges for service are no higher than the prevailing charges for operator services.

(1) Alternate operator services shall be provided pursuant to a written contract between the AOS company and its customer. Lack of a written contract is a violation of this rule, and does not relieve the AOS company of compliance with any rule of the commission. Each AOS company shall file with the commission its contract with each customer. If the AOS company uses a master contract, it shall file the master contract, a current list of customers which it serves, the effective date of the contract as to that customer, and the locations at which service is provided to that customer. In addition, the AOS company shall file, within thirty days after execution, a copy of any contract which varies from the master contract, except as to service locations and the dates of execution and effect.

(2) The AOS company is responsible for assuring that each of its customers complies fully with contract provisions which are specified in these rules. Failure to secure compliance constitutes a violation by the AOS company.

(3) For purposes of this section ((the)), "consumer" means the party ((billed for the completion of)) initiating an ((interstate/intrastate)) interexchange or local call. "Customer" means the call aggregator, i.e.,

the hotel, motel, hospital, prison, campus, ~~((customer-owned))~~ pay telephone, etc., contracting with an AOS for service.

~~((+))~~ (4) An alternate operator services company shall require, as a part of the contract with its customer and as a term and condition of service stated in its tariff, that the customer:

(a) Post on the telephone instrument in plain view of anyone using the telephone, in eight point or larger Stymie Bold type, the following notice:

SERVICES ON THIS INSTRUMENT MAY BE PROVIDED AT RATES THAT ARE HIGHER THAN NORMAL. YOU HAVE THE RIGHT TO CONTACT THE OPERATOR FOR INFORMATION REGARDING CHARGES BEFORE PLACING YOUR CALL. ~~((INSTRUCTIONS FOR DIALING THROUGH THE LOCAL TELEPHONE COMPANY ARE ALSO AVAILABLE FROM THE OPERATOR))~~ YOU HAVE THE RIGHT TO REQUEST THAT THE OPERATOR CONNECT YOU WITH THE CARRIER OF YOUR CHOICE AT NO CHARGE.

(b) Post and maintain in legible condition on or near the telephone:

(i) The name, address, and toll-free number of the alternate operator services company, as registered with the commission and, if the AOS company uses a billing agent, the name of the billing agent;

(ii) Dialing directions so that a consumer may reach the AOS operator ~~((so as))~~ without charge to receive specific rate information; and

(iii) Dialing directions to allow the consumer to dial through the local telephone company and to make it clear that the consumer has access to the other providers.

(c) Provide, without charge, access to any registered interexchange carrier;

(d) Provide, without charge, access to 800 services; and

(e) Shall not impose, implement or allow a surcharge for any operator, toll, or local service above the tariffed rates for service.

~~((+))~~ (5) The alternate operator services company shall:

(a) Identify the AOS company providing the service or its authorized billing agent at the beginning of every call and again before the call is completed, including ~~((those handled automatically; and))~~ an announcement to the called party on calls placed collect.

(i) For purposes of this rule the beginning of the call is prior to the prompt to enter billing information on automated calls and, on live and automated operator calls, when the call is initially routed to the operator.

(ii) Specifically, the following message shall be used at the beginning of the call: "You are using (name of AOS company as registered with the commission"; and, when the charges for the call will appear on the consumer's bill from a different company, such as a billing agent, this company's name must also be disclosed to the caller at the beginning of a call using the following message, "Charges for this call will be billed by (name of billing agent)"; the message prior to completion of the call shall say, "Thank you for using (name of AOS company)".

(b) Provide to the local exchange company such information as may be necessary for billing purposes, as well as an address and toll free telephone number for consumer inquiries.

(c) Re-originate calls to another carrier upon request by the caller and without charge.

(d) Assure that a minimum of ninety percent of all calls shall be answered by the operator within ten seconds from the time the caller dials "O".

(e) Maintain adequate facilities in all locations so the overall blockage rate for lack of facilities does not exceed one percent in any given hour. Should excessive blockage occur, it shall be the responsibility of the AOS company to determine what caused the blockage and take immediate steps to correct the problem. This subsection does not apply to blockage during unusually heaving traffic, such as national emergency, local disaster, holidays, etc.

~~((+))~~ (6) The alternate operator services company shall assure that ~~((consumers))~~ persons are not billed for calls which are not completed. For billing purposes, calls shall be itemized, identified, and rated from the point of origination to the point of termination. No call shall be transferred to another carrier by an AOS which cannot or will not complete the call, unless the call can be billed in accordance with this subsection.

~~((+))~~ (7) For purposes of emergency calls, every alternate operator services company shall have the following capabilities;

(a) Automatic identification at the operator's console of the location from which the call is being made;

(b) Automatic identification at the operator's console of the correct telephone numbers of emergency service providers that serve the telephone location, including but not limited to, police, fire, ambulance, and poison control;

(c) Automatic ability at the operator's console of dialing the appropriate emergency service with a single keystroke;

(d) Ability of the operator to stay on the line with the emergency call until the emergency service is dispatched.

No charge shall be imposed ~~((on the caller from))~~ by the telephone company or the alternate operator services company for the emergency call.

If the alternate operator services company does not possess these capabilities, all calls in which the ~~((caller))~~ consumer dials zero (0) and no other digits within five seconds shall be routed directly to the local exchange company operator, or to an entity fully capable of complying with these requirements. AOS companies lacking sufficient facilities to provide such routing shall cease operations until such time as the requirements of this section are met.

~~((+))~~ (7) Complaints and disputes shall be treated in accordance with WAC 480-120-101, Complaints and Disputes.

~~((+))~~ (8) Charges billed to a credit card company (e.g., American Express or Visa) need not conform to the call detail requirements of this section. However, the AOS shall provide ~~((consumers with))~~ specific call detail in accordance with WAC 480-120-106 upon request.

(9) "Public convenience and advantage"; commissions or fees.

(a) For services, public convenience and advantage means at a minimum that the provider of alternate operator services offers services which equal or exceed the industry standards in availability, technical quality and response time and which equal or exceed industry standards in variety or which are particularly adapted to meet unique needs of a market segment. In the absence of other persuasive evidence, a demonstration that operator service equals or exceeds that provided by U S WEST Communications for intraLATA services or AT&T for interLATA services will be accepted as demonstrating public convenience and advantage.

(b) Charges no greater than the prevailing operator service charges in the relevant market - intraLATA or interLATA - will be accepted as demonstrating that charges are for the public convenience and advantage. In the absence of persuasive contrary evidence, the charges for US West for IntraLATA service and AT&T for interLATA service will be accepted as the prevailing charges.

(c) Commissions, charges or fees. The charge to the consumer attributable to any commission, location fee, surcharge, or customer charge or fee of any kind for the benefit of a call aggregator may not exceed twenty-five cents for any sent-paid or non sent-paid call, except that no such charge may be added to without-charge calls nor to a charge for directory assistance. The existence of this charge at a location and the basis for its calculation must be clearly posted at the location of the instrument. Except as specified herein, no tariff may provide for rate levels which vary at the option of a customer-aggregator.

(10) Tariffed rates for the provision of alternate operator services shall not exceed the prevailing rates for such services unless need for the excess is demonstrated to the satisfaction of the commission. In the absence of persuasive contrary evidence, rate levels of U S WEST for intraLATA service and AT&T for interLATA service will be considered the prevailing rate.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

Title of Rule: WAC 480-120-400, 480-120-405, 480-120-410, 480-120-415, 480-120-420, 480-120-425, 480-120-430 and 480-120-435, relating to extended area service routes. The proposed new sections are shown below as Appendix A, Docket No. U-89-2709-R. Written and/or oral submissions may also contain data, views, and arguments concerning the effect of the proposed new sections on economic values, pursuant to chapter 43.21H RCW.

Purpose: The purpose of these rules is to set forth the standards and procedures under which the commission will consider the creation of new extended area service routes.

Statutory Authority for Adoption: RCW 80.01.040.

Statute Being Implemented: Chapter 80.36 RCW.

Name of Agency Personnel Responsible for Drafting, Implementation and Enforcement: Paul Curl, Secretary and Commission Staff, 1300 South Evergreen Park Drive S.W., Olympia, WA (206) 753-6451.

Name of Proponent: Washington Utilities and Transportation Commission, governmental.

Agency Comments or Recommendations, if any, as to Statutory Language, Implementation, Enforcement, and Fiscal Matters: There are no comments or recommendations being submitted inasmuch as the proposal is pursuant to legislative authorization as reflected in RCW 80.01.040.

Rule is not necessitated by federal law, federal or state court decision.

Explanation of Rule, its Purpose, and Anticipated Effects: These rules set forth the standards for the creation of extended area service routes when such routes are in the public interest.

Proposal Changes the Following Existing Rules: See Purpose and Explanation of Rule above.

Small Business Economic Impact Statement: The commission has received information that some telephone companies which meet the definition of "small businesses" could have been impacted by the extended area service requirements of this rule up to an estimated \$32 per \$100 of sales. The rule therefore provides a mitigation mechanism in WAC 480-120-425 to reduce the impact on small businesses to an estimated maximum of \$12 per \$100 of sales. Interested persons are encouraged to comment on this impact calculation.

APPENDIX "A"

NEW SECTION

WAC 480-120-400 PURPOSE. The purpose of WAC 480-120-400 through WAC 480-120-435 is to set forth the standards and procedures under which the commission will consider the creation of new

extended area service routes. The commission finds that the creation of extended area service routes is in the public interest, where the establishment of those routes meets the standards set forth in WAC 480-120-400 through WAC 480-120-435. The commission further finds that where extended area service is required to be offered by operation of WAC 480-120-400 through WAC 480-120-435, it is a local exchange calling service.

NEW SECTION

WAC 480-120-405 DEFINITION OF EXTENDED AREA SERVICE. (1) As used in this chapter, "exchange" shall be as defined in WAC 480-120-021.

(2) As used in this chapter, "extended area service" means mandatory, two-way, seven digit local calling service between exchanges that provides the ability to call from one exchange to another exchange without incurring a toll charge.

(3) As used in this chapter, "embedded extended area service routes" means those extended area service routes which exist prior to the effective date of WAC 480-120-400 through WAC 480-120-435.

(4) As used in this chapter, "local calling capability" means the percent of the total intrastate intraLATA minutes originating in an exchange that terminate within the local calling area, except where an interLATA extended area service route is proposed, in which case "local calling capability" means the percent of total intrastate minutes originating in an exchange that terminate within the local calling area.

NEW SECTION

WAC 480-120-410 LOCAL CALLING CAPABILITY. (1) For each exchange whose local calling capability is below eighty percent and where at least fifty percent of customers make two or more intraLATA toll calls per month to the exchange for which an extended area service route is proposed, the local exchange company shall attempt to add extended area service routes so that the local calling capability of that exchange is approximately eighty percent.

(2) In determining which exchanges to incorporate into the new local calling area, the local exchange company shall consider at least the following:

- (a) The most frequently called exchange;
- (b) The exchange to which there is the greatest frequency of residential calling;
- (c) Exchanges that are contiguous to the local calling area of the exchange.

NEW SECTION

WAC 480-120-415 DETERMINATION OF EXTENDED AREA SERVICE ROUTES. (1) On or before March 31, 1991, and each five years thereafter, each local exchange telecommunications company shall file a study of each of its exchange(s)' local calling capability.

(2) The local exchange company shall notify the commission and the other affected local exchange companies (if the other exchange(s) is served by another local exchange company) and the designated intraLATA toll carrier, of the existence of potential extended area service routes to expand local calling capability. The commission and the involved company(ies) shall review and set priorities for the potential extended area service routes.

(3) On or before June 30, 1991, and each five years thereafter, a company shall file a schedule with priorities for engineering studies to establish an extended area service route(s), if any, which meets the criteria of WAC 480-120-410.

(4) The affected companies shall thereafter develop a proposed schedule to establish individual extended area service route(s). The schedule shall include a timetable for engineering studies and a proposed date to file an extended area service tariff, or a petition for waiver from the requirement to establish the extended area service route for the study exchange. The companies shall make a good faith effort to arrive at an agreed upon schedule for implementation and shall share with each other all necessary data to arrive at a mutually agreeable schedule. The schedule to establish an extended area service route shall be deemed to be a petition under WAC 480-09-420. Each petition for an extended area service route shall be docketed separately.

(5) If a proposed schedule cannot be agreed to by all affected companies, the commission will establish a schedule after giving an opportunity for all affected companies to be heard. If the companies present

an agreed upon schedule, the commission will approve it, unless the commission finds it requires change for good reason, based on a record.

(6) Within thirty business days after completion of the engineering study, the local exchange company or companies shall file with the commission a schedule indicating the dates at which the following will be completed: a proposed tariff; an implementation date for the tariff; a cost estimate; and a revenue requirement.

(7) Where an extended area service route affects more than one local exchange company, each company shall prepare and file its own tariff and supporting documentation. At the time it files its proposed tariff, the local exchange company or companies shall notify their affected customers of the proposed changes.

NEW SECTION

WAC 480-120-420 REVENUE REQUIREMENTS AND RATE DESIGN. (1) The change in revenue requirement associated with a new extended area service route shall be calculated as the net of all cost and revenue changes for access, toll, if applicable, and engineering and plant costs. Non-traffic sensitive (carrier common line charges) access revenue reductions shall not be included in the calculation to the extent that the effect is to reduce the non-traffic sensitive cost allocation below the percentage prescribed by the commission in Cause No. U-85-23 et al. or any subsequent access cost proceeding.

(2) The revenue requirement calculated according to subsection (1) of this section shall be recovered as follows:

(a) Rates for the benefiting exchange customers (the exchange to which a new extended area service route will be added to increase local calling capability) may be increased up to \$3.50 per residential single party access line per month;

(b) Any remaining revenue requirement for the benefiting exchange(s), and any revenue requirement for the other affected exchange(s) shall be recovered from current earnings, if appropriate, and then from all of its local exchange rates;

(c) For companies eligible for assistance from the transitional community calling fund established by WAC 480-120-425, any revenue requirement remaining after local rates have been increased up to a limit of \$12.50 per single party residential access line per month shall be recovered from the fund.

(d) All residential and business local rates are subject to the changes described in this section. The references to residential single party rates in subdivisions (a) and (c) of this subsection are for bench mark purposes. The increases for other local rates may be more or less than those amounts, depending on the rate design approved by the commission in each case.

NEW SECTION

WAC 480-120-425 TRANSITIONAL COMMUNITY CALLING FUND. (1) A community calling fund is hereby temporarily created in order to transition and cushion the local rate effect of new extended area service on the customers of small local exchange companies. The community calling fund shall be administered by the Washington Exchange Carriers Association (WECA). WECA shall annually report and supply to the commission and all local exchange companies the status of the fund including the amount drawn by each recipient from the community calling fund.

(2) The community calling fund is to be funded by a charge based on all exchange access lines in the state of Washington.

(3) WECA shall annually calculate the amount required for the fund and local exchange companies may file a tariff to cover the charge calculated by WECA. If in an annual period the fund is in excess to requirements, the surplus shall be adjusted for the next annual period to reflect the revenue requirement to be funded by the charge. If at any time the revenue from the community calling fund charge is insufficient to cover eligible draws from the fund, WECA may seek an upward revision to the charge. Until such a new rate is approved by the commission and in effect, recipients from the fund shall be supported on a pro rata basis.

(4) If a local exchange company that serves less than one hundred fifty thousand access lines has proposed the local rate increases required by WAC 480-120-420, and has a separated, intrastate rate of return of less than or equal to eleven percent, the local exchange company is eligible for support from the community calling fund. A local exchange company applying for support, shall supply data to the commission with its application sufficient to allow the commission to audit rate of return eligibility.

(5) The community calling fund shall be reviewed in 1996 to determine if the fund should be terminated on January 1, 1997, and if terminated, any remaining funds shall be returned on a pro rata basis to all local exchange customers in the state via bill credits.

NEW SECTION

WAC 480-120-430 IMPACT ON CURRENT COMPENSATION ARRANGEMENTS. WAC 480-120-400 through WAC 480-120-435 do not impact current compensation arrangements for embedded extended area service routes and those compensation arrangements may continue according to their terms. However, any local exchange company may petition the commission for support from the community calling fund for an embedded extended area service route and if that petition is granted, any compensation arrangement for that route shall be terminated at the time community calling fund support is provided. In considering any such petition, the commission will be guided by the eligibility standards of WAC 480-120-400 through WAC 480-120-435, but will not be bound by them if the record supports the desirability of funding from the community calling fund in lieu of the current compensation arrangement.

NEW SECTION

WAC 480-120-435 PETITION FOR WAIVER. If a petition for waiver of WAC 480-120-400 through WAC 480-120-435 or any part is filed, the commission will dispose of such petition promptly.

APPENDIX "A"

NEW SECTION

WAC 480-120-142 ALTERNATE OPERATOR SERVICES—ENFORCEMENT. The requirements of this chapter and chapter 80.36 RCW constitute the minimum service levels required in the provision of alternate operator services.

(a) Suspension. The commission may suspend the registration of any company providing alternate operator services if it fails to meet minimum service levels or fails to provide disclosure to consumers of protection available under chapter 80.36 RCW.

(i) Suspension may be ordered following notice and opportunity for hearing as provided in RCW 80.04.110 and the procedural rules of the commission.

(ii) It shall be a further violation of rule for any AOS company to operate while its registration is suspended.

(iii) No local exchange company may provide service, including billing and collection service and new or continuing connection to access lines, to any AOS company whose registration is suspended.

(b) Penalty. The commission may assess a penalty as provided in RCW 80.36.522 and RCW 80.36.524, upon any company providing alternate operator services if the company fails to meet minimum service levels or fails to provide disclosure to consumers of protection available under chapter 80.36 RCW.

(c) Alternatives. The commission may take any other action regarding a provider of alternate operator services as authorized by law.

AMENDATORY SECTION (Amending Order R-237, filed 9/19/85)

(1) Applicant possesses adequate financial resources to provide the proposed service;

(2) Applicant possesses adequate technical competence to provide the proposed service; and

(3) Applicant has procured and will maintain;

(2) A performance bond satisfactory to the commission sufficient to cover any customer advances or deposits; or

(b) Provision has been made for deposit of customer advances or deposits in a federally insured interest bearing trust account maintained by applicant solely for customer advances or deposits, in a bank, savings and loan association, mutual savings bank, or licensed escrow agent located in Washington, with access to such funds only for the purpose of applying an amount to a delinquent bill in accordance with commission deposit rules, or for the purpose of refunding advances or deposits to customers. THE WASHINGTON STATE REGISTER, published pursuant to RCW 34.08.020, is distributed on the first and third Wednesdays of each month. The Register contains the full text of proposed, emergency, and permanently adopted rules of state agencies, executive orders of the governor, notices of public meetings of state agencies, rules of the state supreme court, summaries of attorney general opinions, and juvenile disposition standards which have been filed in the code reviser's office prior to the pertinent closing date for that issue of the Register. A cumulative table of existing sections of the Washington Administrative Code (WAC) affected by a particular agency action guides the user to the proper volume of the Register.

The code reviser's office has established an annual subscription price of \$150 for the Register, and single copies will cost \$7. Sales tax of 7.8% now applies to all sales other than to state agencies. State law requires payment in advance. To subscribe to the Register, please complete the order form above and forward it to the address indicated, accompanied by your check or money order in the amount of \$161.70 (\$150 for state agencies) payable to the code reviser's office.
