

Superseded by Order 873

STATE OF
WASHINGTON

ALBERT D. ROSELLINI
GOVERNOR

DEPARTMENT OF
AGRICULTURE

JOE DWYER
DIRECTOR

OLYMPIA

May 20, 1960

Mr. Richard O. White, Code Reviser
Legislative Building
Olympia, Washington.

Dear Sir:

Please note that the date of hearing on Order No. 816 was prior to the effective date of the uniform Administrative Procedures Act.

It was our intention at that time to gather more data on the subject and to allow some time to pass so that we would have a little more experience on which to base the Order.

I hope that this will be in conformance with the usual practice and procedures.

Sincerely,

JOE DWYER
Director

ALLEN BAKER, Supervisor
Grain and Chemical Division

STATE OF WASHINGTON
DEPARTMENT OF AGRICULTURE
OLYMPIA

ORDER NO. 816

EFFECTIVE July 1, 1960

I, Joe Dwyer, Director of Agriculture, State of Washington, after public notice and hearing held at Walla Walla, Washington on November 17, 1959, by virtue of authority vested in me under Chapter 61, Session Laws of 1951, as amended by Chapter 261, Session Laws of 1953, Revised Code of Washington Chapter 17.20 do hereby promulgate the following order:

Regulation 1. Area Under Order

All the lands in the vicinity of the city of Walla Walla in Walla Walla County that are utilized for the production of vegetable crops or cultivated row crops, other than grain and/or hay crops.

For the purposes of this order, this area so restricted shall not extend to distances more than one mile beyond occupied dwellings that are not part of or occupied by persons owning or cultivating the land involved.

Regulation 2.

The use or application of chemicals or chemically treated materials within this area is prohibited at all times if the wind exceeds a velocity over 5 miles per hour, or if weather conditions are such that any or all applications of chemicals would constitute a hazard to adjacent lands, crops and livestock.

Regulation 3.

Aircraft application of any or all chemicals or chemically treated materials in this area is prohibited if such application would involve drift of materials applied beyond the limits of the field being treated or that such application would involve the turning or low flying over property other than that being treated except that such application may be made by permission of the owners or occupants of the property that may be affected by this application.

Regulation 4.

Ground equipment used within this area at any time, for the use or application of chemicals or chemically treated materials, will be so equipped and managed that drift or dispersal of material will not be a hazard to other property or crops, nor shall such application be made in any manner or method that may constitute a hazard to other properties, crops, livestock or to human health.

Regulation 5.

At any time that hazardous chemicals or chemically treated materials shall be applied in close proximity to occupied buildings on property other than that being treated, it shall be the responsibility of the applicator and/or the owner of the property to take such precautions that livestock and/or other living animals shall not be endangered.

Regulation 6.

It shall be the responsibility of the applicator and/or the owner or tenant of the property being treated that the regulations of this order be fulfilled insofar as possible or as the situation, place or occasion may require.

This order will remain in effect until superseded, or amended.

Joe Dwyer
JOE DWYER
Director of Agriculture
State of Washington
