**EMERGENCY RULES**  
**DEPARTMENT OF**  
**FISH AND WILDLIFE**

[Order 24-50—Filed April 4, 2024, 3:39 p.m., effective April 4, 2024, 3:39 p.m.]

Effective Date of Rule: Immediately upon filing.

Purpose: This emergency rule will allow nontreaty commercial fishing opportunities in the Columbia River while protecting fish listed as threatened or endangered under the Endangered Species Act (ESA). This rule implements federal court orders governing Washington's relationship with treaty Indian tribes, federal law governing Washington's relationship with Oregon, and Washington fish and wildlife commission policy guidance for Columbia River fisheries.

Citation of Rules Affected by this Order: Repealing WAC 220-358-03000A; and amending WAC 220-358-030.

Statutory Authority for Adoption: RCW 77.04.012, 77.04.020, 77.12.045, and 77.12.047.

Other Authority: *United States v. Oregon*, Civil No. 68-513-KI (D. Or.), Order Adopting 2018-2027 *United States v. Oregon* Management Agreement (February 26, 2018) (Doc. No. 2607-1). *Northwest Gillnetters Ass'n v. Sandison*, 95 Wn.2d 638, 628 P.2d 800 (1981); Washington fish and wildlife commission policies concerning Columbia River fisheries; 40 Stat. 515 (Columbia River Compact).

Under RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Modifies previously adopted 2024 winter and spring period select area commercial seasons for South Channel. Current estimates of upriver encounters are tracking less than pre-season expectations, which allows for additional fishing time per previously adopted periods. Impacts to nonlocal stocks are expected to be minimal and local Chinook stocks reared for the select area sites are available for harvest. Preseason modeling results in a select area commercial fisheries allocation of  $\leq 387$  upriver spring Chinook. The fishery is consistent with the *U.S. v. Oregon* Management Agreement and the associated biological opinion. Conforms Washington state rules with Oregon state rules. Regulation is consistent with compact action of February 13 and April 4, 2024. The general public welfare is protected with the immediate opening of nontreaty select area fisheries. This harvest opportunity allows for public access to the resource as well as the maintenance of sustainable fish populations. There is insufficient time to promulgate permanent rules.

Washington and Oregon jointly regulate Columbia River fisheries under the congressionally ratified Columbia River Compact. Four Indian tribes have treaty fishing rights in the Columbia River. The treaties preempt state regulations that fail to allow the tribes an opportunity to take a fair share of the available fish, and the states must manage other fisheries accordingly. *Sohappy v. Smith*, 302 F. Supp. 899 (D. Or. 1969). A court order sets the current parameters. *United States v. Oregon*, Civil No. 68-513-KI (D. Or.), Order Adopting 2018-2027 *United States v. Oregon* Management Agreement (February 26, 2018) (Doc. No. 2607-1). Some salmon and steelhead stocks in the Columbia River are listed as threatened or endangered under ESA. On February 23, 2018,

the National Marine Fisheries Service issued a biological opinion under 16 U.S.C. § 1536 that allows for some incidental take of these species in the fisheries as described in the 2018-2027 *U.S. v. Oregon* Management Agreement.

Some Columbia River Basin salmon and steelhead stocks are listed as threatened or endangered under ESA. The Washington and Oregon fish and wildlife commissions have developed policies to guide the implementation of such biological opinions in the states' regulation of nontreaty fisheries.

Columbia River nontreaty fisheries are monitored very closely to ensure compliance with federal court orders, ESA, and commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington (WDFW) and Oregon (ODFW) departments of fish and wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached.
