Background: The State of Washington periodically issues general obligation bonds to finance projects authorized in the capital and transportation budgets. General obligation bonds pledge the full faith and credit and taxing power of the state towards payment of debt service. Legislation authorizing the issuance of bonds requires a 60 percent majority vote in both the House of Representatives and Senate. Bond authorization legislation generally specifies the account or accounts into which bond sale proceeds are deposited, as well as the source of debt service payments. The state finance committee, composed of the Governor, the lieutenant governor, and the state treasurer, is responsible for supervising and controlling the issuance of all state bonds.

Summary of Bill: The state finance committee is authorized to issue \$715 million dollars of state general obligation bonds to finance projects appropriated in the 1995-97 capital budget. The proceeds of the sale of the bonds are deposited into four accounts: \$660 million is deposited into the state building construction account; \$17.5 million is deposited into the outdoor recreation account; \$17.5 million is deposited into the habitat conservation account; and \$2.9 million is deposited into the public safety reimbursable bond account.

The state treasurer is authorized to withdraw from state general revenues the amounts necessary to make principal and interest payments on the bonds. For bond proceeds deposited into the public safety reimbursable bond account, the state treasurer is authorized to reimburse the general fund for principal and interest payments from the public safety and education account.
