

1 **ESSB 6622** - H AMDS TO EN AMD (H-5272.3/98) **1152 WITHDRAWN 3-6-98**
2 By Representative Crouse

3 On page 1, strike lines 19 through 29, and insert:

4 "(a) Estimate the cost of supporting one primary
5 telecommunications line for each residential or business customer
6 located in high-cost locations;

7 (b) Determine the assessments that must be made on all
8 telecommunications carriers, and the manner of collection, to provide
9 support for only one primary telecommunications line for each
10 residential or business customer located in high-cost locations;"

11 On page 2, line 5, after "implementation" strike everything
12 through "program" on line 9

EFFECT: Deletes language requiring the commission to determine assessments necessary to support: (1) all lines; and (2) only primary lines located in high-cost areas. The commission is instead directed to only determine assessments needed to support primary lines located in high-cost areas.
