Brief Title: Employing retired public employees to fix computer problems.

HB 2996 - DIGEST

Declares that notwithstanding the provisions of RCW 41.40.037(2), a retiree may work more than five months per calendar year in an eligible position without suspension of his or her benefit if any month that the retiree works beyond five months is programming work to correct computer system problems arising from identifying each year using two digits, which is commonly known as a "year 2000 project."
