### HOUSE COMMITTEE ON HEALTH CARE

**Majority Report:** Do pass. Signed by 12 members: Representatives Cody, Democratic Co-Chair; Parlette, Republican Co-Chair; Pflug, Republican Vice Chair; Schual-Berke, Democratic Vice Chair; Alexander; Boldt; Campbell; Conway; Edmonds; Edwards; Mulliken and Ruderman.

**Staff:** Bill Hagens (786-7131).

### Background:

In Washington state, birth defects occur in about 2.6 percent of live births. These conditions account for 20 to 30 percent of all infant deaths, and numerous cases of disability. While advances in science have contributed to the prevention of birth defects and its related disabilities, the Department of Health (DOH) continues to need accurate data to plan and provide services for these children.

Birth defects currently are reported to the DOH under the Registry for Handicapped Children statutes which were first enacted in 1959. However, the state's "notifiable conditions" requirement, as expressed in rule, has changed substantially over the years, rendering current law redundant.

Presently, the following "notifiable conditions" are reported:

Anencephaly	Spina bifida	Cleft lip with/without cleft palate
Cleft palate	Limb reduction defects	hypospadias (2nd and 3rd degree)
Gastroschisis	Omphalocele	
Cerebral palsy	Fetal alcohol syndrome	Down syndrome
