

FINAL BILL REPORT

HB 2851

C 20 L 00

Synopsis as Enacted

Brief Description: Changing the state's funding limit for flood control maintenance projects.

Sponsors: Representatives Reardon, G. Chandler, Linville, Grant, Stensen, Cooper and Haigh.

House Committee on Appropriations
Senate Committee on Natural Resources, Parks & Recreation

Background:

The Flood Control Assistance Account Program (FCAAP) was established by the Washington Legislature in 1984 to develop a state and local flood control maintenance policy. The Department of Ecology administers and enforces laws relating to flood control.

The Flood Control Assistance Account, also established in 1984, receives \$4 million each biennium from the state general fund for state participation in flood control maintenance. Matching grants are available to counties, cities, towns and other special districts for comprehensive flood hazard management plans, specific projects or studies, and emergency flood-related activities. The state's share of funding for flood control projects may not exceed 50 percent, and the state's share of funding for flood control management plans may not exceed 75 percent. During the 1999-01 biennium, the Department of Ecology expects to spend FCAAP funds on administration of the flood control program, flood control planning and implementation, early warning systems, acquisition, and flood damage reduction projects.

Summary of Bill:

The state's share of costs for flood control maintenance projects is increased from 50 percent to 75 percent of the total cost of the project.

Votes on Final Passage:

House 97 0

Senate 43 0

Effective: June 8, 2000
