Brief Description: Addressing public facility siting.

**HB 3061 - DIGEST**

Finds that current processes for the siting and operation of major regional public facilities often fail to adequately address regional and localized impacts and benefits of such facilities.

Declares that it is the policy of the state that state agencies must mitigate impacts to communities arising from the siting or expansion of state capital facilities of state-wide significance, including transportation facilities of state-wide significance that are provided under chapter 47.46 RCW.
