Brief Description: Creating a growth management infrastructure account to assist counties and cities in financing capital facilities and transportation.

SB 6002 - DIGEST

Establishes the growth management infrastructure account to assist counties and cities in financing and constructing those improvements identified in the capital facilities and transportation elements of growth management plans. In addition, where successful implementation of locally adopted growth management plans requires improvements or additions to state facilities identified in a growth management plan, the legislature finds that the responsible state agency should request those funds at the next regular session of the legislature.
