Staff: Jeff Olsen (786-7157).

Background:

The Washington State Conservation Commission (commission) is a state agency that supports 48 locally governed conservation districts to promote cooperation of landowners and resource users in developing, adopting, and implementing conservation practices. The commission manages technical and financial assistance programs relating to issues such as salmon recovery, streamside buffers, and water quality.

Local governments and certain public and private entities are authorized to acquire the title to or other interests in land for the purposes of protecting, improving, restoring, maintaining or conserving certain open space, farm or agricultural, and timber land for public use or enjoyment. The entities authorized to make these acquisitions include counties, cities, towns, metropolitan park districts, metropolitan municipal corporations, nonprofit historic preservation corporations, and nonprofit nature conservancy corporations or associations. These entities are specifically authorized to acquire development rights in certain open space, farm or agricultural, and timber land (conservation futures) for conservation purposes. The statutes authorizing these acquisitions include some general provisions on future uses of property acquired for these purposes.

Summary of Substitute Bill:

The agricultural conservation easements program (program) is established in the state Conservation Commission (commission). The commission must report to the Legislature on the potential funding sources for purchase of agricultural conservation easements and recommend changes to existing funding authorized by the Legislature.

All program funding must be deposited into the agricultural conservation easements account (account), which is created in the state treasury. Account deposits include legislative appropriations, other sources directed by the Legislature, and gifts, grants, or endowments from public or private sources. Expenditures from the account may be authorized by the commission or its executive director and may be used only for the purchase of easements under the program. Local governments and private nonprofits may be funded from the account on a "match" or "no match" basis. Any easements purchased with account funds run with the land.

The commission is required to manage the program and adopt rules as needed to implement legislative intent. Legislative findings cite concerns regarding land costs and

conversion of agricultural lands. Legislative intent is specified for creation of a program facilitating the use of federal funds, easing local governments' establishment of similar programs, and assisting local governments to fight conversion of agricultural lands.

Appropriation: None.

Fiscal Note: Not Requested.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Testimony For: (Agriculture & Ecology) (Original bill) Conservation easements are great tools to keep farmers on the land. Easements are attractive because they are voluntary, unique (i.e., can be tailored to a particular parcel) and are permanent.

1.2 million acres of farm land falls to development each year in the United States. The loss of farm land has a significant impact on farmers and the environment. Farm land adds to the quality of life for everyone. This bill provides a chance to pour some money back into agriculture and addresses an important public benefit.

(Concerns) The Department of Agriculture (department) is concerned that the bill seems to direct the Department to go out and find money. The department also has fiscal concerns about creating a new program in the current fiscal climate.

Testimony For: (Appropriations) None.

Testimony Against: (Agriculture & Ecology) None.

Testimony Against: (Appropriations) None.

Testified: (Agriculture & Ecology) (In support) Mike Ryherd, Washington Wildlife and Recreation Coalition; Don Stuart, American Farmland Trust; Len Barson, The Nature Conservancy; and Steve Stuart, 1000 Friends of Washington.

(Concerns) Lee Faulconer, Washington Department of Agriculture.

Testified: (Appropriations) None.
