
SENATE JOINT MEMORIAL 8026

State of Washington 57th Legislature

2002 Regular Session

By Senators Fraser, Honeyford and Regala

Read first time 01/15/2002. Referred to Committee on Environment,
Energy & Water.

1 TO THE HONORABLE GEORGE W. BUSH, PRESIDENT OF THE UNITED STATES,
2 AND TO THE PRESIDENT OF THE SENATE AND THE SPEAKER OF THE HOUSE OF
3 REPRESENTATIVES, AND TO THE SENATE AND HOUSE OF REPRESENTATIVES OF THE
4 UNITED STATES, IN CONGRESS ASSEMBLED, AND TO THE HONORABLE SPENCER
5 ABRAHAM, SECRETARY OF THE UNITED STATES DEPARTMENT OF ENERGY:

6 We, your Memorialists, the Senate and House of Representatives of
7 the State of Washington, in legislative session assembled, respectfully
8 represent and petition as follows:

9 WHEREAS, The Bonneville Power Administration owns and operates over
10 fifteen thousand circuit miles of transmission lines in the Pacific
11 Northwest, constituting more than three-fourths of the high-voltage
12 transmission grid in the region; and

13 WHEREAS, The Bonneville Power Administration operates its
14 transmission system to meet its public responsibility of ensuring
15 transmission access to independent power producers and other wholesale
16 electricity providers in order to provide the region with a reliable
17 and competitive wholesale electricity market; and

18 WHEREAS, The Bonneville Power Administration and other northwest
19 transmission owners currently have limitations on their ability to move
20 power from where it is produced to where it is needed, leaving the

1 region potentially vulnerable to the same sort of transmission problems
2 that have afflicted California; and

3 WHEREAS, The Bonneville Power Administration has significant
4 limitations on its ability to move power from eastern Montana to the
5 Seattle area, from the John Day Dam area on the Columbia River to
6 Seattle, and from the McNary Dam area on the Columbia River to
7 Portland; and

8 WHEREAS, In response to last year's energy crisis, a tremendous
9 amount of new electricity generation is in various stages of planning,
10 permitting, and construction for the northwest, which will place
11 additional demands on the region's transmission system; and

12 WHEREAS, In many cases, integration of new generation will require
13 the Bonneville Power Administration to undertake major work to install
14 new equipment, such as circuit breakers, and to reinforce existing
15 transmission lines to carry the new power; and

16 WHEREAS, On a more fundamental level, the existing transmission
17 system is at or near its limit in what it can carry, which threatens
18 the Bonneville Power Administration's ability to keep the lights on;
19 and

20 WHEREAS, Wholesale power deregulation, beginning in 1992, has
21 resulted in rapid increases in the use of the region's transmission
22 system and also reduced investments in it; and

23 WHEREAS, In response to wholesale power deregulation, the
24 Bonneville Power Administration was under pressure to cut costs,
25 resulting in reducing its staff by over one thousand people and using
26 new control systems and capacitors to squeeze more performance out of
27 the existing transmission system rather than stringing new lines; and

28 WHEREAS, Today, nearly all of the margin has been squeezed out of
29 the system, making it increasingly difficult to schedule maintenance
30 activities and ensure system reliability; and

31 WHEREAS, Through its planning process, the Bonneville Power
32 Administration's Transmission Business Line had included \$1.3 billion
33 in its estimated capital budget for fiscal years 2002 through 2006,
34 which would cover the basics of replacing some aging transmission
35 facilities, reinforcing connections to existing customers, and
36 interconnecting with some new generation; and

37 WHEREAS, This estimate was made before the explosion of proposals
38 for new generation came on the scene last winter, and it now estimates
39 it will need even more money to remove constrained paths, cope with new

1 demands for power, and integrate the new generation that will be built
2 over the next few years; and

3 WHEREAS, The cost of the additional money the Bonneville Power
4 Administration needs to construct the new transmission projects will be
5 self-sustaining, paid for in part by developers of the new power
6 projects and in part by revenues expected from the increased use of
7 transmission resulting from the new generation being built; and

8 WHEREAS, The region simply cannot wait several more years until the
9 new Regional Transmission Organization, RTO West, is fully functioning
10 in its new role as the planner and builder of new transmission; and

11 WHEREAS, The Governors of twelve western states affected by the
12 Bonneville Power Administration have universally supported its request
13 for new borrowing authority to enable that federal agency to build
14 transmission to reinforce its system; and

15 WHEREAS, The Governors in the Western Interconnection are currently
16 developing a plan to streamline and coordinate interstate transmission
17 siting and have signed a Memorandum of Understanding with five federal
18 agencies to create a framework for these agencies to cooperate with
19 states in the review of any proposed transmission lines; and

20 WHEREAS, The major challenges in siting long distance transmission
21 lines in the west have typically involved crossing federal lands;

22 NOW, THEREFORE, Your Memorialists respectfully pray that Congress
23 and the President approve an additional \$2 billion in Federal Treasury
24 borrowing authority needed by the Bonneville Power Administration for
25 capital improvements to the Federal Columbia River Power System,
26 principally for the purpose of making critical transmission
27 infrastructure investments.

28 BE IT RESOLVED, That Congress should require the Federal Energy
29 Regulatory Commission to defer to state and regional interstate
30 transmission siting processes and to not preempt state authority in
31 this area; and

32 BE IT RESOLVED, That copies of this Memorial be immediately
33 transmitted to the Honorable George W. Bush, President of the United
34 States, the Honorable Spencer Abraham, Secretary of the United States
35 Department of Energy, the President of the United States Senate, the
36 Speaker of the House of Representatives, and each member of Congress
37 from the State of Washington.

--- END ---
