AN ACT Relating to increasing access to oral health care; amending RCW 18.32.030, 18.32.0351, 18.130.040, 18.260.010, 18.260.040, 18.260.070, 18.260.080, and 69.41.030; reenacting and amending RCW 18.120.020 and 69.41.010; adding a new section to chapter 43.70 RCW; adding a new chapter to Title 18 RCW; creating a new section; providing an effective date; providing an expiration date; and declaring an emergency.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

NEW SECTION. Sec. 1. The legislature finds that good oral health is an integral piece of overall health and well-being. Without treatment, dental disease compromises overall health and requires increasingly costly interventions. However, most dental disease can be prevented at little cost through routine dental care and disease prevention.

Dental-related issues are a leading reason that Washingtonians seek care in hospital emergency departments, which has become the source of care for many, especially uninsured and low-income populations.

It is the intent of the legislature to expand access to oral health care for all Washingtonians through an evidence-based mid-level dental provider called a dental therapist. Dental therapy is a...
strategy to address racial and ethnic disparities in health and rural
health care access gaps. Dental therapists are also a strategy to
increase workforce diversity in health care and expand career
opportunities for existing members of the dental care workforce such
as dental hygienists.

It is the legislature's intent that dental therapists will meet
the needs of local communities as they work under the direction of a
licensed Washington dentist. The legislature intends for dental
therapists to be incorporated into the dental care workforce and used
to effectively treat more patients.

It is the intent of the legislature to follow the national
commission on dental accreditation's standards for dental therapy
education. This will ensure that dental therapists are trained to the
highest quality standards and provide state-to-state consistency. It
is the intent of the legislature that incorporating the commission on
dental accreditation's standards for dental therapy education will
pave the way for Washington education institutions to become
accredited programs and for students to qualify for financial aid.

It is also the intent of the legislature to provide an efficient
and reasonable pathway for dental health aide therapists certified by
a federal community health aide program or licensed by an Indian
tribe that has adopted equivalent or higher standards than those
imposed by a federally authorized community health aide program
certification board, to become a Washington state licensed dental
therapist.
