WAC 479-13-070 Procedures for project approval. Predesign, design proposals and related construction projects authorized by the board for financial assistance from the urban arterial trust account shall be selected for authorization based upon the following factors:

The proposed project scope shall include improvement that will address or mitigate the items for which the project was selected.

The board shall evaluate the project scope and may reduce the project scope if, in the board's opinion, the scope exceeds that which is necessary to address or mitigate the item in the selection process.

The following factors relative to each project, in addition to other factors required by law, shall be evaluated:

(1) Each project shall be evaluated on the availability and source of matching funds.

(2) Construction prospectuses for projects previously approved for design and right of way funding by the board from the urban arterial trust account shall be required to be accompanied by the following information demonstrating the readiness of the project to be placed under contract for construction.

(a) A certification from the legislative body or other designated responsible official, of the administering agency, that an environmental impact analysis has been conducted and an environmental impact statement including the conformity with the state and Federal Clean Air Acts or negative declaration of environmental impact, as appropriate, has been circulated pursuant to chapter 43.21C RCW, and that the results have been utilized in arriving at the decisions reflected in the prospectus for the construction project.

(b) A certification that all right of way required for the project is available or if right of way remains to be acquired that the agency has obtained a possession and use agreement on the parcels in question.

(c) A certification from the legislative body that the project is completely designed and ready to be advertised for bids.

(d) The date the project will be advertised for bids.

(e) Each construction project prospectus shall identify changes between the scope of work of the proposed construction project and the construction work contemplated in the current six-year transportation program or the project design prospectus. An explanation and justification for such changes shall also be included.

(f) The board shall consider adjustments to the amount previously requested in accordance with the board's rule on increases in urban arterial trust account funds.

(3) Requests for authorization of funds for construction projects shall be considered in the sequence in which the projects are, as defined by board rules, ready to be placed under contract for construction. In the event that two or more projects are proposed for funding at the same board meeting, the request for funds shall be considered in the same priority sequence in which the related design phase proposals were approved.

If insufficient funds are available in the account to allow the board to fund the construction phase when requested, the board shall notify the agency that notice will be provided when funds are available to again proceed with the request. At that time the agency will resubmit their request and will be given priority within the appropriate region over all other requests for funding submitted after their original request for construction funds.

- (1) The local agency administering the project directly incurs such costs; or
- (2) The local agency administering the project is obligated by law or by previously established and documented policies and practices for such costs.

Board funds may be used in the costs to underground service connections for street illumination and traffic signal services within the prescribed limits of the approved project.

The board funds used in the actual, necessary costs of relocating utility or other service facilities, other than service connections for street illumination and traffic signal services within the prescribed limits of the approved project, shall be further limited as follows:

(a) Where a local agency requires that existing overhead facilities be placed underground, board funds shall be limited to the agency's actual cost thereof. The board considers this type of improvements to be aesthetic in nature as is landscaping, therefore, the cost involved in undergrounding the utility facilities, in excess of the estimated cost to relocate them overhead, will be included within the three percent allowance for landscaping costs.

(b) If utility lines or other service facilities are already underground, board funds may be used in the costs of replacing such facilities on an underground basis.

Erosion control treatment shall not be considered a part of street tree planting costs.

The three percent limitation for street tree planting and related costs shall not affect the local government's authority to include street tree plantings and the use of other plantings or supporting materials in the arterial project in amounts that exceed the three percent limit provided they are paid for solely with funds other than board supplied funds.

Beginning 1995, every four years, the board shall determine the distribution formula to apportion unobligated arterial trust account funds to each urban region. The distribution formula shall be defined in the following manner:

(1) One-third in the ratio which the population of the urban areas of each region bears to the total population of all of the urban areas of the state as last determined by the office of financial management;

(2) One-third in the ratio the vehicle to mile ratio traveled on the classified arterial system prescribed in RCW 47.26.180, within the urban areas of each region bears to the total vehicle to mile ratio traveled on all classified urban arterial systems;

(3) One-third in the ratio which the city and county urban arterial needs within the urban areas of each region bears to the total urban arterial needs on city and county urban arterials within all urban areas of the state as last revised by the board.

The distribution of funds within each region shall be administered so as to permit complete urban arterial trust account projects in each arterial classification to be authorized and funded.

(1) Integrated with existing "user designated," as well as officially designated bikeways.

(2) Integrated with bikeways of adjacent units and levels of government.

WAC 479-20-013 Direct costs. Direct costs eligible for board participation are those costs which are directly attributable to a specific project and shall include:

(1) Direct labor (engineering and/or construction) including related employee benefits:

(a) Salaries and wages (at actual or average rates) covering productive labor hours of city and county employees (excluding the administrative organization of the operating unit involved) for periods of time, actively or incidentally engaged in (i) predesign engineering, (ii) design engineering, (iii) construction engineering, (iv) acquisition of rights of way, and (v) actual construction activities are considered a direct cost of construction projects. The cost of services rendered by employees generally classified as administrative are considered a direct cost only when such employees are assigned for short periods of time to perform on a full time basis the types of services described above and when similar procedures are followed for nonboard projects.

(b) Employee benefits relating to direct labor are considered a direct cost of construction projects. The following items may be included as employee benefits:

- (i) F.I.C.A. (Social Security) - employer's share
- (ii) Retirement benefits
- (iii) Hospital, health, dental and other welfare insurance
- (iv) Life insurance
- (v) Industrial and medical insurance

- (vi) Vacation
- (vii) Holiday
- (viii) Sick leave
- (ix) Military leave and jury duty

Employee benefits shall be calculated as a percentage of direct labor dollars. The computation of predetermined percentage rates to be applied to current labor costs shall be based upon the average of total employee benefits and total labor costs for the prior fiscal year and adjusted by known current year variations.

- (2) Contract engineering services
- (3) Right of way acquisition costs including:
 - (a) Purchase of land and easements acquired for and devoted to the project;
 - (b) Purchase of improvements;
 - (c) Adjustment or reestablishment of improvements;
 - (d) Salaries, expenses or fees of appraisers, negotiators or attorneys;
 - (e) Removal or demolition of improvement;
 - (f) Other direct costs in connection with the acquisition.

Amounts received from the sale of excess real property or improvements and from any rentals shall be a reduction of the direct cost.

- (4) Contract construction work
- (5) Direct vehicle and equipment charges at the actual rental cost paid for the equipment or, in the case of city or county owned equipment, at the rental rates established by the city's or county's "equipment rental and revolving fund" following the methods prescribed by the division of audit: *Provided*, That such costs shall be charged on a uniform basis to equipment used for all projects regardless of the source of funding. Cities with a population of 8,000 or less which may not use this type of fund shall be allowed the same rates as used by the department of transportation.

(6) Direct materials and supplies. The cost of materials used in projects shall be based upon methods prescribed for the "equipment rental and revolving fund" by the division of audit.

(a) An overhead rate or "loading factor" shall not be considered an appropriate additive to the actual cost of materials and supplies used on construction projects unless the factor is readily and properly supportable by the governmental unit's accounting records.

(b) The cost, or reasonable estimate thereof, of materials paid for as contract estimate items, but not used, shall be considered a reduction of direct costs. Any material which may be salvaged in connection with a project shall be assigned a reasonable value and considered a reduction of direct costs.

(7) Interdepartmental charges for work performed by county or city departments, other than the road or street department, for the benefit of specific construction projects shall be limited to direct costs plus an allocation of indirect costs based upon 10% of direct labor dollars, excluding employee benefits. Such indirect costs shall be determined by a rate which is readily and properly supportable by the governmental unit's accounting records and shall be the same rate as applied to nonboard projects; however, this rate shall not exceed the indirect cost allocation rate established by the board. If individual units of government do not have such an internal indirect cost allocation rate, the rate predetermined by the board shall be used in determining the

amount of indirect costs includable in the total interdepartmental charges.

(8) Other direct costs incurred for materials or services acquired for a specific project shall be eligible for participation by board funds and may include, but shall not be limited to, such items as:

- (a) Telephone charges
- (b) Reproduction and photogrammetry costs
- (c) Computer usage
- (d) Printing and advertising.

WAC 479-20-016 Indirect costs. Indirect costs incurred by a local government for common or joint objectives which include an authorized board funded project, and which are not included in those direct costs set forth and defined in WAC 479-20-013, shall be eligible for board fund participation on a particular project at a rate not to exceed ten percent of direct labor costs, excluding employee benefits, expended by the local government on that project.

WAC 479-20-020 Partial or progress payments for project costs. Participation and payment of board funds to counties and cities shall be governed by the following:

(1) Board participation. Board funds shall not participate in any cost which is not incurred in conformity with all applicable federal and state law and the rules, regulations and procedures as may be prescribed by the board promulgated in conformity with the statutes.

(2) Project agreements. Projects for which board funds are requested by the eligible agencies and for which the board has allocated funds will be the subject of a project agreement to be entered into by the eligible agency with the board evidencing acceptance of the conditions to payment of funds, as prescribed by laws and regulations, and the amount of funds to be obligated.

(3) Changes in project work and cost. No material change in the termini, character, or scope of the work on an approved project shall be made without prior concurrence in such changes by the board.

(4) Payments. Eligible agencies are to submit requests for payment of funds claimed to be due on approved projects. Such requests are to be on forms prescribed by the board, and shall be certified and accompanied by supporting data as may be required by the board. Requests for payment may be submitted from time to time as the work progresses and final requests shall be submitted within six months of contract completion. Payment of TIB funds shall at no time exceed the board's share of the project costs incurred to the date of the payment request.

(5) Compliance with laws and regulations. If an eligible agency has failed to comply with laws and regulations with respect to a project, payment of funds may be withheld on such projects, or approval of additional projects may be withheld until compliance or remedial action has been

accomplished by the eligible agency to the satisfaction of the board.

(6) Progress payments. Progress payments for project costs shall be limited to the board's percentage share of the costs for project development incurred to the date of the payment request: *Provided*, That in all projects where the total project cost exceeds the amount of authorized board funds, there shall be imposed a limitation on progress payments in order that the percentage of board fund progress payments in relation to total progress costs as of each payment request date shall not exceed the percentage determined by dividing the total authorized amount of board funds by the most recently determined total project cost.

WAC 479-20-025 Record requirements. All eligible agencies requesting payment of board funds on authorized projects shall have procedures in effect that will provide adequate assurance that payments requested are proper and accurate:

(1) Quantities of complete construction contract work shall be supported by all related source documents upon which payment to the contractor is based. These source documents shall include, but shall not be limited to, tickets for items measured on a weight or volume basis, cross section notes, inspector's diaries, engineering calculations for items measured in place, material tests, shipping invoices for steel, and all other field records normally developed by field engineers to support final quantities paid to contractors. The quantity field record should be summarized so that final pay estimates would lend themselves to comparison with supporting records.

(2) All appraisal reports, record of negotiations with grantors including a negotiator's diary indicating dates of contracts, offers made, and final acceptance by grantor, title insurance documents, transfer documents such as warranty deeds, quit claim deeds, easements, contract and sale documents, shall be maintained.

(3) Daily labor time records, equipment use records, requisitions for materials used, invoices for goods and services, and other invoices shall be maintained. Records shall also be maintained which support employee benefit percentages which are used in calculating amounts charged to construction projects.

(4) All records shall be retained in compliance with the requirements of the division of audit and until notification from the board that a project audit is complete or is not required.

WAC 479-20-027 Audits of urban arterial project records. Projects shall be audited in accordance with the policy adopted by the board. Project records for each project developed through the use of board funds may be audited to determine that funds paid can be attributed to the project and supported by project records. The audit will

determine if there has been compliance with the rules of the board. Projects may be audited by the board at the time of the project completion or at such additional times as may be directed by the director.

The director may, where the cumulative amount of audit exceptions is less than five hundred dollars in board funds, advise the agency that no recovery of funds is requested.

Audit exceptions which the director considers to be significant in relation to board rules or significant in amount to warrant potential recovery of funds, shall be furnished to the administering agency to allow an opportunity to respond in writing to the audit report.

After reviewing the written response, the director, shall advise the agency whether any recovery of funds is indicated.

If recovery of board funds is indicated, as determined by the director, or by the board, the agency shall be provided ninety days from the date of the notice from the board to make repayment.

If repayment of funds by the agency is not made within ninety days from the date of the notice from the board, the subject shall be placed before the board for review and action.

WAC 479-20-031 Expenditure schedule of urban arterial trust account funds. Each eligible agency having an approved project shall, when requested by the director, submit an updated schedule of its estimated demand for board funds to the board. This schedule shall be on forms provided by the board and shall include the estimated demand for board funds biannually until project completion.

Such estimates shall be differentiated between the design engineering, right of way and construction stages of project development.

Additional information pertaining to estimated demands for board funds by eligible agencies may be requested by the director as required to permit adequate funding of the programs.

WAC 479-20-037 Procedure to request increase in board funds. The amount of funds approved will be based upon the amount requested in the design prospectus. This amount may be adjusted from the amount shown in the project application with adequate justification. The authorized funds and scope of work approved by the board at the design phase will be the base for comparison in the following phases.

Local agencies may request an increase in the participation of funds over the amount set forth in the design phase, at the construction phase, bid opening or contract completion of a project in accordance with the following procedures:

(1) At the construction phase all requests shall be reviewed by the director. The director shall report the findings to the board for its review, consideration and final action. The board shall not grant a request for increase at this phase if:

(a) The requested increase is to pay for an expansion of the scope of the work that is beyond the work required to accomplish the intent of the project as approved at the design phase.

(b) The granting of the request will obligate funding beyond the level acceptable to the board or will in any way adversely affect authorized funds previously approved by the board including the reserve for the following:

(i) Increases at bid opening that will not exceed ten percent of the engineers estimate multiplied by the account matching ratio.

(ii) Increases for construction overruns at the amount equal to the account matching ratio multiplied by the sum of ten percent of the original contract amount up to one million dollars and five percent of the amount in excess of one million dollars for those projects which have been approved for the construction phase.

(2) Request for increases at bid opening shall not exceed ten percent of the engineers estimate submitted to the board at the time the construction phase was approved multiplied by the account matching ratio. Requests for increases at this phase will take priority over design and construction phase approvals. Such requests shall be reviewed by the director and will not be approved if:

(a) The requested increase is to pay for an expansion of the authorized scope of the work; or

(b) If the request is not substantiated and the director determines that the increased funds should have been anticipated by the local agency at the construction phase of the project.

(3) Requests for increases in funds submitted to the board at contract completion shall not exceed the account matching ratio multiplied by the sum of ten percent of the original contract amount up to one million dollars and five percent of the amount in excess of one million dollars. Requests for increases at this phase will take priority over design and construction phase approvals. Such requests shall be reviewed by the director and will not be approved if:

(a) The requested increase is to pay for an expansion of the authorized scope of the work; or

(b) If the request is not substantiated and the director determines that the increased funds should have been anticipated by the local agency at the construction approval phase of the project.

(4) If the director or the board, as the case may be, does not approve the request of a local agency for an increase, the administering agency may:

(a) Proceed with the project, paying for any additional costs with local or other funds; or

(b) Withdraw the request for participation; or, if applicable

(c) Within the authorized amount, and subject to approval by the director, reduce the scope of the project while retaining a usable and functional improvement.

WAC 479-20-086 Review of delayed projects. The director may contact, in writing, each local agency administering a transportation improvement board-funded project that appears to be delayed when evaluated in relation to the proposed schedule for project development. If the agency does not respond to the inquiry of the director within twenty days explaining whether the project is delayed and, if so, the reasons therefore, may be placed before the board as a candidate for cancellation as a delayed project.

The written response from the administering agency shall be reviewed to determine if the reason or reasons for the project delay is acceptable. The administrative agency will be advised by certified mail by the director if the delay is for an unacceptable reason. The letter from the director shall advise the local agency that:

- (1) The project is delayed for an unacceptable reason;
- (2) The local agency has a period of three months from the date of the director's letter to resolve the reason or reasons for delay and to provide evidence to the board that the problems have been resolved. Such evidence shall, if requested by the director, include a time schedule for project development which sets forth project development dates in sufficient detail to permit monthly monitoring of project progress.

- (3) If the reason or reasons for delay are not resolved within the specified time period, the project may be placed before the board as a candidate for cancellation.

The administering agency for any project placed before the board as a candidate for cancellation shall be requested to appear before the board to explain the status of the project.

[Statutory Authority: Chapter 47.26 RCW. 95-04-072, § 479-20-086, filed 1/30/95, effective 3/2/95; 90-11-035, § 479-20-086, filed 5/10/90, effective 6/10/90; Order 217, § 479-20-086, filed 1/19/72; Order 151, § 479-20-086, filed 7/20/70.]

WAC 479-20-095 Identification and consideration of surplus funds on authorized urban arterial trust account projects. When requested by the director, by certified mail, each project authorized for financial assistance from the local agency shall review their project to identify probable reductions in project cost in relation to the previously authorized amount of urban arterial trust funds. The agency shall review the project to:

- (1) Close the project by submitting a final request for payment and summary cost documents if all work has been completed; or

- (2) Advise the board of total costs to date, remaining costs necessary to complete the project, and the amount of estimated surplus funds, if any, on the project.

Each response shall be reviewed by the director to determine whether the explanations appear reasonable and whether the agency appears to be pursuing the completion of the project at a reasonable rate. Any project where the administering agency does not appear to be pursuing the project to completion at a reasonable rate, or fails to submit a final request for payment within six months from the date that all work appears to be complete, shall be referred by the director to the board for appropriate action.

Each agency administering a project that is not considered to be developing to completion at a reasonable rate, or fails to submit a final request for payment within six months when all physical work appears to be completed, shall be notified by the director by certified mail that the project is being scheduled for a hearing before the board at a specified time and place. The agency shall be requested to provide suitable representation to such board meeting to explain the status of the authorized project, the reasons why the project has not been completed and finalized out, the amount of urban arterial trust funds estimated to be required to complete the project, and the resulting surplus in relation to previously authorized urban arterial trust funds.

Timing of the environmental review process.

WAC 479-24-030 Timing of the environmental review process. (1) As provided by WAC 197-11-055, the environmental review process shall be completed before the board is irrevocably committed to a particular course of action. At the same time, the environmental review process should not be undertaken until a proposal is sufficiently definite to allow meaningful environmental analysis.

(2) The threshold determination or any required environmental documentation for the board's action of a nonproject nature shall be completed prior to official adoption of the action in question.

(3) The threshold determination or any required environmental documentation for board action of a project nature shall in all cases be completed prior to the determination to construct the project in question. While the board may tentatively affirm the choice of a particular location or design based upon completion of the draft environmental documentation, final determination to construct shall not occur until a final threshold determination has been made or a final environmental documentation has been prepared.

(4) As provided by chapter 173-420 WAC, in areas subject to a state implementation plan, no state agency or local government shall approve or fund a transportation project within or that affects a nonattainment area unless a determination has been made that the project conforms with the state implementation plan for air quality as required by the Federal Clean Air Act.
