WAC 463-78-010 Purpose. The energy facility site evaluation council, under the authority vested in it by chapter 80.50 RCW and 40 C.F.R. Part 52 is charged with responsibilities for the conduct of a statewide program of air pollution prevention and control for energy facilities. This regulation provides the basic framework for carrying out the council's responsibilities for such a program through the establishment of standards for maximum permissible emissions, the implementation of registration and notice requirements, provision for monitoring and reporting, and the identification of regulatory actions which may be taken to enforce standards. WAC 463-78-100 Registration. (1) Purpose. The registration program is used by the council to develop and maintain a current and accurate record of air contaminant sources subject to chapter 80.50 RCW. Information collected through the registration program is used to evaluate the effectiveness of air pollution strategies in collaboration with the department of ecology, and to verify source compliance with applicable air pollution requirements.

(2) Requirement to register. Except as provided in subsection (3) of this section, the owner or operator of each source subject to chapter 80.50 RCW shall register the source with the council. Sources subject to the Operating permit regulation in chapter 173-401 WAC are not required to comply with these registration requirements.

(3) The following sources are exempt from registration:

(a) A source that emits pollutants below the following emission rates:

Pollutant	Tons/Year
Carbon monoxide	5.0
Nitrogen oxides	2.0
Sulfur dioxide	2.0
Particulate Matter (PM)	1.25
Fine Particulate (PM10)	0.75
Volatile Organic Compounds (VOC)	2.0
Lead	0.005

; and

(b) A source or emission unit that does not emit measurable amounts of Class A or Class B toxic air pollutants specified in WAC 173-460-150 and 173-460-160.

(4) Initial registration. The owner or operator of a source that exists on the effective date of this rule must register the source with the council by no later than one year after the effective date of this rule. The owner or operator of a new source must register with the council within ninety days after beginning operation.

(5) Annual reregistration. After initial registration, the owner or operator of a source must reregister with the council by February 15 of each year. The reregistration must include all of the information required in the initial registration and must be updated to reflect any changes to such information since the previous registration. For information that has not changed since the previous registration, the owner or operator may reaffirm in writing the correctness and current status of the information previously furnished to the council.

(6) Registration format. Registration shall be in a format approved by the council. Each registration submittal shall include the following information:

- (a) Name of the source and the nature of the business;
- (b) Street address, telephone number, facsimile number, and e-mail address of the source;
- (c) Name, mailing address, telephone number, facsimile number and e-mail address of the owner or operator;

(d) Name, mailing address, telephone number, facsimile number and e-mail address of the local individual responsible for compliance with this rule;

(e) Name, mailing address, telephone number, facsimile number and e-mail address of the individual authorized to receive requests for data and information;

(f) A description of the production processes and a related flow chart;

(g) Identification of emission units and air pollutant generating activities;

(h) A plot plan showing the location and height of all emission units and air pollutant generating activities. The plot plan must also show the property lines of the air pollution source and indicate the distance to and direction of the nearest residential or commercial property;

(i) Type and quantity of fuels, including the sulfur content of fuels, used on a daily and annual basis;

(j) Type and quantity of raw materials used on a daily and annual basis;

(k) Estimates of the total actual emissions for the air pollution source of the following air pollutants: Particulate matter emissions, PM₁₀ emissions, sulfur dioxide (SO₂), nitrogen oxides (NO_x), carbon monoxide (CO), volatile organic compounds (VOC), lead (Pb), fluorides, sulfuric acid mist, hydrogen sulfide (H₂S), total reduced sulfur (TRS), and reduced sulfur compounds;

(l) Calculations used to determine the estimated emissions in (k) of this subsection;

(m) Estimated efficiency of air pollution control equipment under present or anticipated operating conditions; and

(n) Any other information specifically requested by the council.

(7) Procedure for estimating emissions. The registration submittal must include an estimate of actual emissions taking into account equipment, operating conditions, and air pollution control measures. The emission estimates must be based upon actual test data, or in the absence of such data, upon procedures acceptable to the council. Any emission estimates submitted to the council must be verifiable using currently accepted engineering criteria. The following procedures are generally acceptable for estimating emissions from air pollution sources:

- (a) Source-specific emission tests;
 - (b) Mass balance calculations;
 - (c) Published, verifiable emission factors that are applicable to the source;
 - (d) Other engineering calculations; or
 - (e) Other procedures to estimate emissions specifically approved by the council.
- (8) Other reports required.

(a) A report of closure shall be filed with the council within ninety days after operations producing emissions permanently ceased at any source within the council's jurisdiction.

(b) A report of relocation of the source shall be filed with the council no later than ninety days prior to the relocation of the source. Submitting a report of relocation does not relieve the owner or operator of other site certification agreement amendment requirements pursuant to chapter 463-66 WAC, nor does it relieve the owner or operator from the requirement

to obtain a permit or approval to construct if the relocation of the air pollution source would be a new source or modification subject to any federal or state permit to construct rule.

(c) A report of change of owner or operator shall be reported to the council within ninety days after the change in ownership is effective. Submitting the report of change of ownership does not relieve the owner or operator of other site certification agreement amendment requirements pursuant to chapter 463-66 WAC.

(9) Certification of truth and accuracy. All registrations and reports must include a certification by the owner or operator as to the truth, accuracy, and completeness of the information. This certification must state that, based on information and belief formed after reasonable inquiry, the statements and information are true, accurate, and complete.

(10) The council shall ensure that the following, as it pertains to sources covered under this rule, is passed on to ecology in a timely manner for inclusion in its permit register:

(a) Public meetings or hearings on draft operating permits;

(b) Receipt of complete applications;

(c) Permit appeals;

(d) Issuance or denial of final permit, permit modifications, or renewals;

(e) Authorization for a source to operate without an operating permit by limiting its potential to emit to levels below those that would require the source to obtain an operating permit;

(f) Periodic summaries of enforcement order and changes made without revising the permit pursuant to WAC 173-401-722.

The notice shall specify the provision of this chapter or rule or regulation alleged to be violated and the facts alleged to constitute a violation thereof, and may include an order that necessary corrective action be taken within a reasonable time. In lieu of an order, the council may require that the alleged violator or violators appear before it for the purpose of providing information to the council pertaining to the violation or the charges complained of. Every notice of violation shall offer the alleged violator an opportunity to meet with the council prior to the commencement of enforcement action.

(2) Civil penalty.

(a) All penalties assessed as the result of air emission violations shall be consistent with RCW 70.94.332, 70.94.-430, 70.94.431 (1) through (7), and 70.94.435. penalty as set forth by RCW 70.94.431 for each day of continued noncompliance.

(3) Assurance of discontinuance. The chair, or his/her authorized representative, may accept an assurance of discontinuance of any act or practice deemed in violation of this chapter. Any such assurance shall specify a time limit during which discontinuance is to be accomplished. Failure to perform the terms of any such assurance shall constitute prima facie proof of a violation of this chapter which make the alleged act or practice unlawful for the purpose of securing an injunction or other relief from the superior court.

Whenever any person has engaged in, or is about to engage in, any acts or practices which constitute or will constitute a violation of any provision of this chapter, the council, after notice to such person and an opportunity to comply, may petition the superior court of the county wherein the violation is alleged to be occurring or to have occurred for a restraining order or a temporary or permanent injunction or another appropriate order.
