WAC 479-14-111 Who is eligible to receive urban program funding. Eligible agencies are:

- (1) Counties that have an urban area;
- (2) Incorporated cities with a population of five thousand or more. For the purposes of determining population, cities may include the population of any state correctional facility located within the city. Agencies exceeding population of five thousand are eligible pending designation as a federal urban area following the next federal census; and

- (1) Improvements on federally classified arterials;
- (2) Within a city qualifying for urban designation upon the next federal census as long as the project carries a federal arterial functional classification; or
- (3) Within the urban growth area in counties which are in full compliance with Washington state's Growth Management Act.

Any urban street that is not functionally classified at the time of award must obtain federal functional classification prior to approval to expend board funds.

Sidewalks with five feet minimum clear width are required on both sides of the arterial unless a deviation is granted under WAC 479-14-200.

- (1) Mobility improvements Includes system connectivity, improves flow of vehicles and freight, and extends or completes corridor for network connections.
- (2) Physical condition Includes pavement, structural, and geometric design features of the arterial.

The average of the ratios of region urban area population (RUP) divided by the statewide urban population (SUP) plus region functionally classified lane miles within the urban area (RFC) divided by statewide functionally classified lane miles within urban areas (SFC).

(RUP/SUP) + (RFC/SFC)

The board may adjust the regional allocation by plus or minus five percent of the total annual allocation to fully fund the approved list of regional projects. When requested by the board, TIB staff will update the regional allocation to ensure equitable distribution of funds.

WAC 479-14-161 Matching requirement for the urban program. The urban program provides funding which will be matched by other funds as follows:

- (1) For cities:
- (a) If the city valuation is under \$1.0 billion, the matching rate is ten percent of total project costs.
- (b) If the city valuation is \$1.0 billion to \$2.5 billion, the rate is fifteen percent of total project costs.
- (c) If the city valuation is over \$2.5 billion, the rate is twenty percent of total project costs.
 - (2) For counties:
- (a) If the road levy valuation is under \$3.0 billion, the rate is ten percent of total project costs.
- (b) If the road levy valuation is between \$3.0 billion to \$10.0 billion, the rate is fifteen percent of total project costs.
- (c) If the road levy valuation is over \$10.0 billion, the rate is twenty percent of total project costs.

The board uses the current published valuation from the department of revenue.

(3) For transportation benefit districts, the match is based on the valuation of the city or county in which it is located. If the project lies within more than one city or county, the match is determined by the city or county that has the greatest valuation.

WAC 479-14-200 Sidewalk deviation authorities for the urban and small city arterial programs. The board recognizes the need for pedestrian facilities on arterial roadways and has required that sidewalks be provided under the urban program. A sidewalk deviation may be requested by the lead agency and may be granted under the following authorities:

- (1) The executive director has administrative authority to grant sidewalk deviations as follows:
- (a) On both sides if the roadway is a ramp providing access to a limited access route;
- (b) On both sides of a designated limited access facility if:
 - (i) Route is signed to prohibit pedestrians; or
- (ii) Pedestrian facilities are provided on an adjacent parallel route;
- (c) On one side if the roadway is a frontage road immediately adjacent to a limited access route; or
- (d) On one side if the roadway is immediately adjacent to a railroad or other facility considered dangerous to pedestrians.
- (2) All other sidewalk deviation requests require board action.

WAC 479-14-221 What projects are eligible for small city arterial program funding. To be eligible for funding from the transportation improvement account a small city street must be classified as an arterial by the board.

Arterials are paved streets connecting to other paved streets on both ends that are publicly owned by the city or a state route. Arterials must provide circulation within the network or provide access to at least twenty residential units, or equivalent trip generation, per point of access.

Alleys are not considered arterials.

Dead end paved streets may be determined by the board to be arterials if they serve significant generators of traffic or at least twenty residential units or equivalent trip generation.

New streets may be determined by the board to be arterials if they would meet the description of an arterial in this section after they are completed.

Gravel streets may be determined by the board to be arterials if they should be paved based on serving significant traffic generators only if the funded project results in a paved street.
