For SI: 1 ton = 3517 W, 1 British thermal unit per hour = 0.2931 W,  $^{\circ}C = [(^{\circ}F) - 32]/1.8$ .

NA = Not applicable, not to be used for compliance;

NR = No requirement.

b Compliance with this standard can be obtained by meeting the minimum requirements of Path A or B. However, both the full load and IPLV shall be met to fulfill the requirements of Path A or B.
c Chapter 6 of the referenced standard contains a complete specification of the referenced test procedure, including the referenced year version of the

c Chapter 6 of the referenced standard contains a complete specification of the referenced test procedure, including the referenced year version of the test procedure.

<sup>&</sup>lt;sup>a</sup> The centrifugal chiller equipment requirements, after adjustment in accordance with Section C403.2.3.1 or Section C403.2.3.2, do not apply to chillers used in low-temperature applications where the design leaving fluid temperature is less than 36°F. The requirements do not apply to positive displacement chillers with leaving fluid temperatures less than or equal to 32°F. The requirements do not apply to absorption chillers with design leaving fluid temperatures less than 40°F.
