WAC 220-354-050 Limited participation salmon net fisheries. (1)

When the director determines that a harvestable amount of salmon appears to be available, but that full-fleet fishing effort has an unacceptable risk of exceeding the available harvest or compromises other specific management objectives, the director may authorize a limited participation fishery in extreme terminal fishing areas in order to provide additional opportunities for net fisheries where they might not otherwise exist. Such a fishery may be authorized for experimental or developmental fisheries, fisheries necessary to refine run size data, fisheries necessary to provide biological information, or in cases where:

- (a) Other specific management objectives have been stated for the species and area in question; or
- (b) There is a reasonable expectation that foregone opportunity will be claimed and the harvestable surplus cannot be carried forward to the next year of harvest; and
- (c) Full-fleet participation with time, space, or gear restrictions cannot achieve the harvest goal.

(2) Only licensed commercial salmon fishers may participate in a limited participation fishery. Only one listing is allowed per license. Fishers who wish to have their name placed on a limited participation register must mark the appropriate box on their license renewal application, or so notify the department, in writing, by July 31st. Interested fishers must provide a message phone number at which they may be contacted.

(3) Each year the department will, from the list of interested fishers, use random selection to create a priority list for gillnet fishers and a priority list for purse seine fishers. Priority registers will be available for inspection at the department's Olympia office, or upon written request to the department. Once the priority lists have been created, sale or transfer of the license shall invalidate the receiver from participation in that year's limited participation fishery.

(4) The number of units of each gear type selected to participate in a limited participation fishery will reflect the most recent ratio of gear types in the full-fleet fishery directed at the species in question, except when conservation concerns, biological data collection needs, or specific management objectives dictate alternative ratios or use of a single gear type.

(5) When a limited participation fishery is authorized, the department will contact fishers from the priority register at least twenty-four hours prior to the opening of the fishery. When a fisher cannot be contacted after reasonable effort, the department will select the next name, until the maximum number of allowable units of gear is reached. If not reached, the fisher's name will remain at the priority position, but the fisher may not participate in that limited participation fishery. Agreement to participate, or declining to participate, will remove the fisher from the priority position, and place the name at the bottom of the priority list.

Agreement to participate in an authorized limited participation fisheries will require a department observer on board a participating vessel. An additional permit may be required by a participating vessel to allow for a department observer to complete work associated with biological data collection needs meeting specific management objectives.

(6) Examples of specific management objectives include but are not limited to:

- (a) Reducing levels of incidental catch of wild salmon stocks;
- (b) Reducing incidental catch of nontarget salmon species originating from regions other than the fishing area; or
- (c) Specific recreational emphasis action.

WAC 220-354-100 Puget Sound salmon—Lawful gear—Purse seine.

(1) Lawful purse seine salmon nets in Puget Sound must not exceed 1,800 feet in length along the cork line while wet, and purse seine and lead combined must not exceed 2,200 feet. Neither type can contain meshes of a size less than 3-1/2 inches. Meshes of the seine and lead cannot be lashed together to form one continuous piece of webbed gear. A person may have, as part of the purse seine, a bunt not more than 10 fathoms long. However, the mesh size must not be less than 3-1/2 inches.

(2) It is unlawful to take or fish for salmon in Puget Sound with purse seine gear that contains mesh webbing constructed of a twine-size smaller than 210/30d nylon, 12-thread cotton, or the equivalent diameter in any other material.

(3) It is unlawful for any purse seine vessel to carry an extra lead or portion thereof unless stowed below decks during the fishing operation. It is also unlawful to carry an extra lead or portion thereof aboard the skiff of the purse seine vessel.

(4) Purse seine mesh size is defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh. Minimum mesh size is met if a wedge of legal size can be passed without undue force through the mesh while the mesh is wet.

(5) A purse seine is not considered to be fishing once both ends of the seine are attached to the primary vessel.

(6) It is unlawful to take or fish for salmon with purse seine gear in Puget Sound unless at least four sections, each measuring no less than 12 inches in length along the cork line in the bunt, and within 75 fathoms of the bunt, have no corks or floats attached. These four sections must be spaced such that one section is along the cork line in the bunt, within 5 fathoms of the seine net, and the other three sections are spaced at least 20 fathoms apart along the cork line within 75 fathoms of the bunt.

(7) When brailing is required, it is unlawful to take or fish for salmon with purse seine gear unless the purse seine vessel has aboard and uses operable recovery boxes as described in this subsection.

(a) Dimensions and capacities of required recovery boxes:

(i) Recovery boxes must have two chambers per box if one box is used, or one chamber per box if two boxes are used.

WAC 220-354-130 Purse seine—Release of incidentally caught fish. (1) It is unlawful for any purse seine vessel operator landing salmon to do so directly into the hold. All salmon must be landed onto the deck or sorting tray or table of the harvesting vessel with the hold hatch cover(s) closed until all salmon that cannot be retained are released; and additionally:

(2) In Areas 7 and 7A, and prior to the Fraser Panel relinquishing management control in Areas 7B and 7C, it is unlawful for any purse seine vessel operator to bring salmon aboard a vessel unless all salmon captured in the seine net are removed from the seine net using a brailer or dip net meeting the specifications in this section prior to the seine net being removed from the water, unless otherwise provided for in this section.

(3) The brailer must be constructed in the following manner and with the following specifications:

(a) A bag of web hung on a rigid hoop attached to a handle;

(b) The bag must be opened by releasing a line running through rings attached to the bottom of the bag; and

(c) The web must be of soft knotless construction, and the mesh size cannot exceed 57 mm (2.25 inches) measured along two contiguous sides of a single mesh.

(4) Hand-held dip nets must be constructed of a shallow bag of soft, knotless web attached to a handle.

(5) Fish may be brought on board without using a brailer or dip net as specified in this section if the number of fish in the net is small enough that the crew can hand-pull the bunt onto the vessel without the use of hydraulic or mechanical assistance.

(6) In order for fishers to participate in openings where brailing is required, fishers must use a recovery box and operate the box in compliance with the provisions of WAC 220-354-100 (7)(a) through (f). It is unlawful to fail to do so.

WAC 220-354-140 Puget Sound salmon—Lawful gear—Gillnet. (1) It is unlawful to use drift gillnet salmon gear in Puget Sound that ex-

ceeds 1,800 feet in length or contains meshes of a size less than 5 inches.

(2) It is unlawful to use skiff gillnet salmon nets in Puget Sound that exceed 600 feet in length, 90 meshes in depth, or that contain meshes of a size less than 5 inches, except in Area 9A, where skiff gillnets are further restricted by not being more than 60 meshes deep. It is unlawful to retrieve skiff gillnets by any means except by hand (no hydraulics may be used). It is unlawful to fail to attend to skiff gillnets at all times.

(3) Drift gillnets and skiff gillnets shall be operated substantially in a straight line. It is unlawful to set such nets in a circle or to set them in other than a substantially straight line.

(a) It is unlawful to operate any drift gillnet, attended or unattended, unless there is affixed, within five feet of each end of the net, two red size A-3 buoys, marking the visible end of the cork line portion of the net. (4) It is unlawful to take or fish for salmon with gillnet gear in Areas 7 or 7A sockeye or pink salmon fisheries unless said gillnet gear is constructed so that the first 20 meshes below the cork line are composed of five-inch mesh, white opaque, minimum 210/30d (#12) diameter, nylon twine.

(5) It is unlawful to take or fish for salmon with gillnet gear when recovery box(es) are required in areas defined under WAC 220-301-030 unless the gillnet vessel has aboard and uses said operable recovery box(es) as described in this subsection.

(a) Dimensions and capacities of required recovery boxes:

(i) Recovery boxes must have two chambers, if one box, or one chamber in each box, if two boxes.

(ii) Each recovery box chamber must have an inside length measurement of 48 inches, an inside width measurement of 10 inches, and an inside height measurement of 16 inches.

(iii) Each chamber of the recovery box must have an inlet hole measuring between 3/4 inch and 1 inch in diameter. The inlet hole must be centered horizontally across the door or wall of the chamber, and the bottom of the hole must be located 1-3/4 inches above the floor of the chamber.

(iv) Each chamber of the recovery box must include a water outlet hole on the opposite wall from the inlet hole, and the outlet hole must be at least 1-1/2 inches in diameter, with the bottom of the outlet hole located 12 inches above the floor of the chamber.

(v) Flow of water through each chamber of the recovery boxes must be not less than 16 gallons per minute, nor more than 20 gallons per minute.

(b) Each box and chamber must be operating during any time that the net is being retrieved or picked.

(c) The vessel operator must demonstrate to department employees, upon request, that the pumping system is delivering the proper volume of fresh seawater into each chamber.

(d) All salmon not to be retained must be released immediately with care and with the least possible injury to the fish, or placed into the operating recovery box.

(e) Any fish that is bleeding or lethargic must be placed in the recovery box prior to being released.

(f) All fish placed in the recovery boxes must be released within the same catch area as the area of capture, and the release must occur prior to landing or docking.

(6) It is unlawful to fish for salmon with gillnet gear in Areas 7 and 7A unless the vessel operator has attended a "Fish Friendly" best fishing practices workshop and is in possession of a department-issued certification card.

WAC 220-354-200 Puget Sound salmon—Beach seine—Emerging commercial fishery—Eligibility—Lawful gear. (1) The Puget Sound beach seine salmon fishery is designated as an emerging commercial fishery for which a vessel is required. An emerging commercial fishery license and an experimental fishery permit are required to participate in this fishery.

(2) The department will issue four salmon beach seine experimental fishery permits.

(3) The following is the selection process the department will use to offer a salmon beach seine experimental permit.

(a) Persons who held a salmon beach seine experimental fishery permit in the previous management year will be eligible for a permit in the current management year.

(b) The department will work with the advisory board, per RCW 77.70.160(1), to establish criteria by which applicants will qualify to enter the pool. The pool established by this drawing will be maintained to replace any permit(s) which are voided.

(4) Permit holders are required to participate in the salmon beach seine experimental fishery.

(a) For purposes of this section, "participation" means the holder of the salmon beach seine experimental permit is aboard the designated vessel in the open fishery.

(b) If the salmon beach seine experimental permit holder fails to participate, the salmon beach seine experimental permit issued to that fisher will be voided, and a new salmon beach seine experimental permit will be issued through a random drawing from the applicant pool.

(c) The department may require permit holders to show proof of participation by maintaining a department approved log book or registering with state officials each day the salmon beach seine experimental permit holder participates.

(d) Persons who participate in the fishery but violate conditions of a salmon beach seine experimental permit will have their permit voided, and a new salmon beach seine experimental permit will be reissued through a random drawing from the pool of the voided permit holder.

(5) In Quilcene Bay, chum salmon may not be retained by a salmon beach seine experimental permit holder. Chum salmon in Quilcene Bay must be released alive.

(6) Any person who fails to purchase the license, fails to participate, or violates the conditions of a salmon beach seine experimental permit will have his or her name permanently withdrawn from the pools.

(7) It is unlawful to take salmon with beach seine gear that does not meet the requirements of this subsection.

(a) Beach seine salmon nets in Puget Sound shall not exceed 990 feet in length or 200 meshes in depth, or contain meshes of a size less than 3 inches or greater than 4 inches.

(b) Mesh webbing must be constructed with a twine size no smaller than 210/30d nylon, 12 thread cotton, or the equivalent diameter in any other material.

Gear:

(2) Gillnet gear restrictions - All areas:

(a) Drift gillnet gear only. It is unlawful to use set net gear.

(b) It is permissible to have on-board a commercial vessel more than one net, provided the nets are of a mesh size that is legal for the fishery, and the length of any one net does not exceed one thousand five hundred feet in length.

(c) It is unlawful to use a gillnet to fish for salmon if the lead line weighs more than two pounds per fathom of net as measured on the cork line.

(d) It is permissible to have a gillnet with a lead line weighing more than two pounds per fathom aboard a vessel when the vessel is fishing in or transiting through Willapa Bay, provided the net is properly stored. A properly stored net is defined as a net on a drum that is fully covered by a tarp (canvas or plastic) and bound with a minimum of ten revolutions of rope that is 3/8 (0.375) inches or greater.

(e) From 12:01 a.m. September 3 through 11:59 p.m. November 29, 2019: Mesh size must not exceed six and one-half inches stretched, except mesh size must not exceed four and one-quarter inches stretched in Area 2N on September 3, 6, 9, 11, and 13, and in Area 2M on September 4.

(i) Each box and chamber must be operating during any time the net is being retrieved or picked. The flow in the recovery box must be a minimum of 16 gallons per minute in each chamber of the box, not to exceed 20 gallons per minute.

(ii) Each chamber of the recovery box must meet the following dimensions as measured from within the box:

(A) The inside length measurement must be at or within 39-1/2 inches to 48 inches;

(B) The inside width measurements must be at or within 8 to 10 inches; and

(C) The inside height measurement must be at or within 14 to 16 inches.

(iii) Each chamber of the recovery box must include a water inlet hole between 3/4 inch and 1 inch in diameter, centered horizontally across the door or wall of the chamber and 1-3/4 inches from the floor of the chamber. Each chamber of the recovery box must include a water outlet hole opposite the inflow that is at least 1-1/2 inches in diameter. The center of the outlet hole must be located a minimum of 12 inches above the floor of the box or chamber. The fisher must demonstrate to department employees, fish and wildlife enforcement officers, or other peace officers, upon request, that the pumping system is delivering the proper volume of fresh river/bay water into each chamber.
