

**WAC 296-806-42536 Follow these requirements for dividers.** You must enclose or safeguard the moving parts in the back of the divider with **all** of the following:

(1) A complete cover to enclose **all** moving parts OR an enclosure or guard for each individual part to remove separate hazards.

(2) A limit switch to shut off the machine when the rear cover is open.

(3) A hinged guard on the back that cannot be completely removed.

(4) You must make sure that, if a catch or brace is provided for holding the cover open, make sure it will not release due to vibrations or minor bumping, causing the cover to drop on an employee.

**Note:** Dividers as discussed in this section utilize pistons, knives and blades to cut and divide large quantities of dough. This does not apply to small vibrating or oscillating rounders.
