WAC 296-842-100 Scope and application. (1) Respirators are required whenever respiratory hazards (including oxygen-deficient conditions) are present. For example, use respirators at any of the following times:

(a) While exposure controls are being evaluated or put in place;

(b) When it is not feasible to use exposure controls to remove or reduce the airborne hazard to below the PEL.

(2) This chapter applies whenever respirators are used at work. **IMPORTANT:**

Before using respirators, employers are required to evaluate respiratory hazards and implement control methods as outlined in chapter 296-841 WAC, Airborne contaminants.

The term "respiratory hazards" will be used throughout this chapter to refer to oxygen-deficient conditions and harmful airborne hazards.

You may use Table 1 for general guidance on which chapter sections apply.
